GOVERNMENT OF ANDHRA PRADESH
ANDHRA PRADESH ROAD DEVELOPMENT CORPORATION

ANDHRA PRADESH ROAD SECTOR PROJECT
Feasibility Study, Design and Detailed Engineering

FINAL DETAILED PROJECT REPORT
(UPGRADING OF KURNOOL - DEVANAKONDA ROAD)

ANNEXURE TO VOLUME - VIII : SOCIAL MANAGEMENT PLAN
(INCLUDING RESETTLEMENT ACTION PLAN)

Submitted by:
THE LOUIS BERGER GROUP, INC.
Engineers, Planners, Scientists, Economists
Plot No. 41, Sector - 18, Near Manali Industrial Area,
Gurgaon - 122 015, Haryana, India

Submitted to:
Chief Engineer (R&B) & Managing Director
A.P. Road Development Corporation
Erramanzil, Hyderabad 500 082, A.P., India
LIST OF ANNEXURES

Annexure 1.1: Andhra Pradesh Road Sector Project (APRSP) - Phase I Roads and Key Map (with Chapter-1)

Annexure 1.2: Questionnaire for Census Survey Format

Annexure 1.3: Questionnaire for Base Line Socio-Economic Survey Format

Annexure 2.1: Impact on Road Side Properties

Annexure 2.2: Road Side Community Properties Resources (Indirect Impact)

Annexure 2.3: List of Project Affected Families

Annexure 2.4: List of Project Displaced Families

Annexure 3.1: Policy on Resettlement and Rehabilitation for Project Affected Families, 2005

Annexure 3.2: Proposed Amendments in the AP R&R Policy for Road Sector Projects

Annexure 3.3: Approved Amendments in the AP R&R Policy for Road Sector Projects

Annexure 4.1: Newspapers Cutting along with the Consultation Findings

Annexure 4.2: Public Consultation at the Feasibility Stage

Annexure 5.1: The Andhra Pradesh Land Acquisition (Negotiations Committee) Rules, 1992

Annexure 6.1: Implementation Mechanism

Annexure 7.1: Contract Clause in Bid Documents

Annexure 8.1: Terms of Reference for the nodal Level NGO

Annexure 8.2: Terms of Reference for the Package

Annexure 8.3: Indications of Monitoring

Annexure 8.4: Terms of Reference for Technical Support
**ANDHRA PRADESH ROAD SECTOR PROJECTS (APRSP):**

Questionnaire For Census Survey for the Identification of the Project Affected Families in 900 km World Bank Assisted Project in Andhra Pradesh.

5. Options for Resettlement and Rehabilitation (Please ask only to PAF other than knaps)

6.1 Resettlement

6.1.1 As a result of the loss you need to be relocated. How do you like to be shifted?

1) Self Resettled

2) Project to make arrange for relocation...
6.1.2. If 2 in 6.1 above where do you want to be relocated?

| Within the village/Town | 1 |
| Outside the village / Town | 2 |
| Within the district | 3 |
| Outside the district | 4 |

6.1.3. What should be distance from the present location?

| Within 5 Km | 1 |
| 5-10 km | 2 |
| More than 10 km | 3 |

6.1.3. What type of support expected from the project in your relocation?

| Compensation of the structure | 1 |
| Assistance in shifting house hold materials | 2 |
| Assistance for alternative house site | 3 |
| Assistance in construction of house | 4 |
| Permissin to salvage of building materials | 5 |
| Support in trans position in salvage materials | 6 |
| Other support (Specify) | 7 |

6.1.4. If self relocated what arrangement you will make?

| Extend existing structure | 01 |
| Construct (home in vacant plot) | 02 |
| Move out of the area | 03 |
| Stay at relatives/mends place | 04 |
| Any other (Specify) | 05 |

6.2 Rehabilitation - ask those PAPs whose livelihood would be affected नियुक्तिविवरण - उनमें से चेतावनी दिये जाने के लिए चेतावनी दिये जाने के लिए कृपया पढ़ें।

6.2.1. What type of support do you expect from the project in restoration of your livelihood उनमें से चेतावनी दिये जाने के लिए चेतावनी दिये जाने के लिए कृपया पढ़ें।

<p>| Compensation at replacement value | 01 |
| Assistance in shifting | 02 |
| Assistance in Transition | 03 |</p>
<table>
<thead>
<tr>
<th>Alternative site for shop</th>

<td>09</td>
</tr>
<tr>
<td>Others</td>
<td>99</td>
</tr>
</tbody>
</table>

6.2.2 If more than 25% agricultural land is not acquired support required in restoring their income level.

| Land for land | 31 |
| Adequate compensation for replacing land | 32 |
| Grants to take up alternate self employment activity | 05 |
| Employment during Project Construction | 04 |
| Employment during maintenance | 05 |
| Training to upgrade the skill level | 08 |
| Others (specify) | 99 |

6.3 R&R Support Tenant

| Sliding Allowance | 07 |
| Grants to tenant | 07 |
| Self Account or Others (specify) | 02 |
| Others (specify) | 04 |

6.4 R & R support to share holders

6.4.1 What type of support you expect from the project for loss of share cropping or leasing-in and your share thereof is about (show calculation of share)}
01 Cash grant for the unexpired lease period

02 Support in improving farm production

03 Others (specify)

11. PERCEPTION ABOUT THE PROJECT

11.1 Are you aware that the state road passing through your area is under development?

Yes / No

11.2 If No, explain them about the project. If yes and after explanation, ask the following:

11.3 What benefits do you foresee from the project?

(a) Increased employment opportunities
(b) Improved road network
(c) Increased accessibility to education, health services
(d) Greater opportunities for economic advancement
(e) Higher wages for manual labor
(f) Improved access to markets
(g) Increase in the value of the land and structures
(h) Any other benefits predicted

11.4 Do you also expect any adverse or negative impacts of the project?

Yes / No

If Yes, what are these?

(a) Loss of land and other assets
(b) Vulnerability to accidents
(c) Loss of common and infrastructure
(d) Loss of access to common properties
(e) Increased waterlogging
(f) Increased incidence of HIV/AIDS and other diseases
(g) Women, children, and elderly at risk
(h) Dusting and pollution during construction
(i) Increasing noise pollution
(j) Any other impact

</table>

Note: The table details the demographic and economic information of affected families, including name, annual income, vulnerability, ownership, type of loss, total area, compensation, and total compensation with a number of displaced individuals. The figures indicate the extent of displacement and compensation needed for resettlement.

Policy on Resettlement and Rehabilitation for Project Affected Families

2005

Government of Andhra Pradesh
Hyderabad
GOVERNMENT OF ANDHRA PRADESH

ABSTRACT

Rehabilitation and Resettlement (R&R) Policy for Government of Andhra Pradesh - Issued

Irrigation & CAD (Project Wing - LA IV R&R) Department

Date and Regd April 2005

Compulsory acquisition of land for implementation of development and infrastructure projects displaces people from their homes, land and/or their means of livelihood. Apart from depriving them of their land, livelihood and resources base displacement has other psychological, social and cultural consequences also. The Government recognize the need to minimize large-scale displacement to the extent possible and where displacement is inevitable, it needs to address the issue of displacement with utmost care, human touch and low cost. Such an approach is especially necessary in respect of tribal, socially and marginally backward communities.

2. Various policies relating to the Resettlement and the Rehabilitation (R&R) of displaced persons have been in place from time to time varying from project to project and district to district. The need has been felt for the evolution of a comprehensive policy on R & R to ensure uniformity of benefits across the State and also to ensure the delivery of benefits in a transparent manner.

A committee was constituted by the Government vide G.O. No. 71, Irrigation & CAD Project Wing Department dated 12-5-2005 for preparation of Draft R&R Policy for Government of Andhra Pradesh. The recommendations of the Committee were discussed in a State Level meeting comprising of major stakeholders in the policy like the Department of Energy, Industries, Revenue & Land, Environment, Forest, Science & Technology, Finance, Tribal Welfare, Law and Revenue. The State Level Meeting endorsed the recommendations of the Committee.
Government after careful examination of the Committee recommendations as endorsed by State Level meeting hereby approve the Rehabilitation & Resettlement Policy for Government of Andhra Pradesh enclosed to this order for implementation by all the Departments for Government of Andhra Pradesh.

It is further ordered that as per Section 8.5 of this Policy the provisions of G.O. Ms. No. 98, Irrigation & CAD (Projects Wing) Department, dated 15-04-1986 and G.O. Ms. No.64, Social Welfare (T) Department, dated 18-04-1990 and any other Government order/Memo/Instructions issued by any other Department of Government of Andhra Pradesh shall cease to operate as far as those Projects are concerned that are notified under this Policy.

(By Order and in the Name of Governor of Andhra Pradesh)

MOHAN KANDA
CHIEF SECRETARY TO GOVERNMENT

To: All the Departments of Secretariat

All the District Collectors in the State,
All the Special Collectors of Irrigation Projects,
The Engineer-in-Chief (AW)/(Irrigation), Errum Manzil, Hyderabad
All the Chief Engineers of the Projects.
Annexure - 3.1

Government Of Andhra Pradesh
Resettlement And Rehabilitation
Policy 2005
For Project Affected Families

1.0 PREAMBLE:

Introduction

1.1 The emergence of modernist and the public purpose including infrastructure projects challenge people finding them to give up their home, assets and means of livelihood. Apart from disturbing their lifestyle, it also affects the social and economic aspects of life simultaneously having an adverse impact on the society. The Government of Andhra Pradesh recognizes the need to mitigate large scale displacement to the extent possible, and where displacement is inevitable, the need to handle with utmost care, human touch and forethought, issue, relating to Resettlement and Rehabilitation of Project Affected Families. Such an approach is especially necessary in respect of tribal, small & marginal farmers and women.

1.2 The system of extending cash compensation does not, by itself, in most cases, enable the affected families to obtain cultivable agricultural land, homestead and other resources, which they have to surrender to the State. The difficulties are more acute for persons who are critically dependent on the acquired assets for their subsistence. Individuals, such as landless agricultural workers, forest dwellers, tenants and artisans, as their distress and destitution is more severe, and yet they are not eligible for cash compensation.

1.3 The Policy essentially addresses the need to provide succour to the asset less rural poor, support the rehabilitation efforts of the resource poor sections, namely small and marginal farmers, handloom and women who have been displaced. Besides, it seeks to provide a broad canvas for an effective dialogue between the Project Affected Families and Project Implementers.
families and the Administration for Resettlement & Rehabilitation. Such a dialogue is expected to enable timely completion of projects with a sense of ownership among all stakeholders, costs and adequate attention to the needs of the displaced persons, especially the women and the poor sections. The intention is to impart greater flexibility for interaction and negotiation so that the resultant package gains all-round acceptability in the shape of a valuable instrument providing satisfaction to all stakeholders. Resettlement Process

1. The DOAP Policy on the Resettlement and Rehabilitation of Project Affected Families and other Dwellers, liable will be applicable to the cases of families involved in the rehabilitation of coal affected areas in order that all affected

2. Administration for Resettlement & Rehabilitation of Project Affected Families and other Dwellers, liable will be applicable to the cases of families involved in the rehabilitation of coal affected areas in order that all affected
CHAPTER 2

OBJECTIVES OF THE POLICY

1. To minimize displacement and to identify non-displacing or least-displacing alternatives;
2. To plan the resettlement and rehabilitation of Project Affected and Displaced Families (PAFs);
   Families including special needs of Tribals and vulnerable sections;
3. To provide better standard of living to PAFs and PPFs; and
4. To facilitate harmonious relationship between the Requiring Body and PAFs through mutual cooperation.
CHAPTER - III

Definitions 3.0 DEFINITIONS

The definitions of various terms used in this Policy Document are as follows:

3.1 "Administrator for Resettlement and Rehabilitation" means an official not below the rank of Joint Secretary of the State Government appointed by the State Government for the purpose of welfare of the Project Affected Families under this Project in consultation with the Central Government.

3.2 "Affected zone" means the area falling within 500 meters of surface distance from FR and includes all government-owned land and lands acquired under Land Acquisition Act and lands held by the Project Authority.

3.3 "Agricultural family" means any agricultural family, i.e. family of cultivators as well as tenants, small tenants of cultivators, agricultural labourers and sharecroppers, out of whom at least two are agricultural labourers.

3.4 "Agricultural labourer" means a person who is normally resident in the affected zone for a period of not less than three years immediately before the declaration of the affected zone who does not own any land in the affected area and who earns his livelihood by manual labour on agricultural land within the affected area immediately before the declaration and who has been engaged in agricultural activities as a member of his household as a customary stopping residence in the gram panchayat.

3.5 "Agricultural land" includes lands used or capable of being used for the purpose of:

(a) agriculture or horticulture;
(b) dairy farming, poultry farming, pisciculture, breeding of horticulture and nursery growing, medicinal plants;
(c) raising of tobacco, sugar cane and cotton;
(d) and used by an agriculturist for grazing of cattle, buffalo and goats or for the setting of deer only.

3.6 "Appropriate Government" means:

(a) in relation to a State, the State Government;
(b) in relation to a project which is executed by the Central Government, the Central Government and the State Government in consultation with the Central Government;
(c) in relation to a project which is executed by the State Government, the State Government and the Central Government.

3.7 "BPL Family" means the families whose income falls below the poverty line of the Planning Commission of India.

3.8 "Project" means the land(s) notified under this policy and displaced.
3.0 "Commissioner for Resettlement and Rehabilitation", means the Commissioner for Resettlement and Rehabilitation appointed by the State Government not below the rank of Commissioner/Secretary of that Government.

3.10 "Family" means family consisting of such persons as his or her spouse, minor sons, unmarried daughters, minor brothers or unmarried sisters, father, mother and other members residing with him and dependent on him for their livelihood.

3.11 "Holding" means the total land held by a person as an occupant or tenant or as both.

3.12 "Marginal farmer" means a cultivator with an unirrigated land holding up to one hectare or irrigated land holding up to half hectare or combination of both on same principle.

3.13 "Non-agricultural labourer" means a person who is not an agricultural labourer but is normally residing in the affected zone for a period of not less than three years immediately before the declaration of the affected zone and who does not hold any land under the affected zone but who earns his livelihood principally by manual labour or as a manual artisan immediately before such declaration and who has been deprived of earning his livelihood principally by manual labour or as such artisan in the affected zone.

3.14 "Notification" means a notification published in the Official Gazette.

3.15 "Occupiers" means members of Scheduled Tribe community in possession of forest land prior to 25th October, 1980.

3.16 "Project Affected Family" means

(a) a family whose source of livelihood are substantially affected by the losses of acquisition of and for the project and who has been residing continuously for a period of not less than three years immediately preceding the date of declaration of the affected zone and whose traditional occupation of cultivation or vocation continuously for a period of not less than three years in the affected zone, preventing the date of declaration of the affected zone, regardless of the fact whether they owned land or not.

(b) a family whose more than 50% of land is acquired and left over land after acquisition is less. Act, 46 of 1978 and combination of both on above principle.

(c) a Project Displaced Family.

3.17 "Project Displaced family" means any family, who on account of acquisition of his dwelling house in the village in the affected zone for the purpose of the project, has been displaced from such dwelling house.

3.18 "Resettlement zone", in relation to a project, means the declaration of any area under Para 5.12 of this Policy by the appropriate Government acquired or proposed to be acquired for resettlement of Project Displaced Family as a resettlement zone.

3.19 "Requiring Body" shall mean any company, a body corporate, an institution, or any other organization, for which land is to be acquired by the appropriate Government, and includes the appropriate Government if the acquisition of land is for such Government either for its own use or for subsequent allotment of such land to public interest in a body corporate, institution, or any other organization or by any company under lease, licence or through any other system of transfer of land to such company, as the case may be.

3.20 "Small farmer" means a cultivator with an unirrigated land holding of more than one hectare but up to two hectares or with an irrigated land holding of more than half hectare and up to one hectare or combination of both on same principle.
1.21 "Substantially affected" means where average annual income of PAF is likely to be reduced by more than 50% and is likely to become BPL family due to acquisition of his land or others' land for the project, as compared to his average annual income in last three years preceding the date of notification, from land and or other sources of incomes.

3.22 "Tribal areas" means areas as declared so by the Tribal Welfare Department, Government of Andhra Pradesh from time to time.
CHAPTER - IV

APPPOINTMENT OF ADMINISTRATOR AND COMMISSIONER FOR RESETTLEMENT AND REHABILITATION AND THEIR POWERS & FUNCTIONS

Where the appropriate Government is satisfied that acquisition of land for any project involves displacement of families from their lands and or houses as a result of acquisition of land it shall, by notification, appoint in respect of that project, an officer not below the rank of Joint Collector of the State Government to be the Administrator for R&R in respect of that project.

Powers and Functions of Administrator

Subject to the superintendence, direction and control of the appropriate Government, the Administrator for Resettlement & Rehabilitation shall perform the following powers and functions:

1. Maintain control and superintendence of the formulation of resettlement and rehabilitation plans and scheme of the same shall rest with the Administrator Resettlement & Rehabilitation.

2. Subject to the general or special order of the appropriate Government, the Administrator for Resettlement & Rehabilitation shall perform the following functions:

   a. Minor readjustment of persons and identify non-displacing or least displacing alternative site in consultation with the project.

   b. Initial consultation with the Project Affected Families while preparing a resettlement and rehabilitation scheme.

   c. Ensure that interest of the adversely Project Affected Families of Scheduled Tribes and Scheduled Castes are protected.

   d. Prepare a draft project scheme of resettlement and rehabilitation and after obtaining authority of the responsible authority/authority, wherever these falls under the same, shall be provided to the project affected persons with respective and Project Officer (RDA/SSC).
c) prepare a budget including estimated expenditure of various components of acquisition of land, resettlement and rehabilitation activities or programmes in consultation with representatives of the Project Affected Families and requiring body for whom the land is acquired;
f) acquire adequate land for the project and also for resettlement and rehabilitation of the project affected families;
g) select and sanction benefits to project affected families;
h) perform such other functions as the appropriate Government, from time to time, deems necessary or advisable.

Delegation of powers of Administrator R&R

The Administrator for Resettlement & Rehabilitation may, by order in writing, delegate any of the administrative powers conferred and duties imposed on him by or under this Policy to any officer not below the rank of RDO/Sub Collector or equivalents who will be called an R&R officer for the said project.

All officers and staff appointed by the appropriate Government under this Policy shall be subordinate to the Administrator for Resettlement & Rehabilitation.

Commissioner for R & R

The State Government shall appoint an officer of the rank of Commissioner/Secretary of the Government for Resettlement and Rehabilitation in respect of such projects in which the Policy applies to be called the Commissioner for Resettlement & Rehabilitation.

For the purposes of this Policy, the Administrator for Resettlement & Rehabilitation and other officers and employees appointed for the purposes of resettlement and rehabilitation of Project Affected Families shall be subordinate to the Commissioner for Resettlement and Rehabilitation.

Functions of Commissioner for R&R

The Commissioner shall be responsible for supervising the formulation of resettlement and rehabilitation programmes, proper implementation of such plans and for the prevention of grievances as mentioned in Chapter VI of this Policy. Whenever tribal PAFs are involved Commissioner, TW shall also be involved in above responsibilities in functions.
CHAPTER V

5.0 SCHEMES/PLANS FOR RESETTLEMENT AND REHABILITATION:
The procedure mentioned in this Chapter shall be followed for declaration of Affected Zone carrying out survey & Census of Project Affected Families. Assessment of Displacement land available and land to be acquired for the purpose of resettlement and rehabilitation.

Declaration of Affected Zone

The declaration of Affected Zone, if not made by the Government, but if in the opinion that occupation of land for a project is likely to displace families from their homes and in houses, be thereby affected or is likely to be affected and order affixing a copy of the notification in the manner specified by the Government shall be affixed on the walls of the affected zone.

Procedure to be followed for survey and census of PAFs and PDFs etc.

Every survey should contain the following information:

1. Village wise, number of families who are affected by the project
2. Number of families who are permanently residing, practising any trade or occupation on the land covered by the project
3. Number of families who are likely to lose their houses, agricultural land, and livestock, at the existing level substantially from the main source of their livelihood
4. Any other relevant and non-obtrusive information.

Project Affected Families and the survey has been carried out before 25 October, 1986. That is to the commencement of the notified (Commission Act, 1986).
Every survey undertaken under Para 5.4 shall be completed within a maximum period of ninety days from the date of declaration made under Para 5.1.

On the expiry of the period of ninety days as mentioned in para 5.4, the Administrator for Resettlement and Rehabilitation shall publish in the Official Gazette a list of the lands surveyed and the findings of the survey. The list shall also include suggestions for the land to be affected. The list shall be published in a manner which is clear and understandable. After considering the list, the Administrator for Resettlement and Rehabilitation shall issue a declaration under Para 5.6.

The Administrator for Resettlement and Rehabilitation shall ensure that the land is surveyed and available for resettlement. The survey shall be conducted in a manner which is fair and transparent. The survey shall be conducted with the cooperation of the local community and shall be based on the recommendations of the survey.

For the purposes of Para 5.5 above, the Administrator for Resettlement and Rehabilitation shall issue a list of lands which may be affected by the resettlement. The list shall be based on the recommendations of the survey and the recommendations of the local community.

The list shall be published in the Official Gazette. The list shall be published in a manner which is clear and understandable. After considering the list, the Administrator for Resettlement and Rehabilitation shall issue a declaration under Para 5.6.

The Administrator for Resettlement and Rehabilitation shall ensure that the land is surveyed and available for resettlement. The survey shall be conducted in a manner which is fair and transparent. The survey shall be conducted with the cooperation of the local community and shall be based on the recommendations of the survey.

For the purposes of Para 5.5 above, the Administrator for Resettlement and Rehabilitation shall issue a list of lands which may be affected by the resettlement. The list shall be based on the recommendations of the survey and the recommendations of the local community.

The list shall be published in the Official Gazette. The list shall be published in a manner which is clear and understandable. After considering the list, the Administrator for Resettlement and Rehabilitation shall issue a declaration under Para 5.6.
It shall be the responsibility of the acquiring body to provide sufficient funds to the Administrator for R&R for proper implementation of resettlement & rehabilitation scheme/plan of Project Affected families.

The Administrator for R&R shall keep proper books of accounts and records of the funds spent at his disposal and submit annual returns to the Appropriate Government in this behalf.

Contents of the Scheme/Plan of R&R

1. A statement of the project and the benefits to be derived by the affected families.
2. A detailed list of Project Affected families, and likely number of displaced persons, land, water, and other assets and features of land and immovable property, if any, including the survey number, extent, and nature of land and immovable property, if any, obtained from the survey officials.
3. A list of agricultural labourers in such area and the names of such persons whose livelihood depend on agricultural activities.
4. A list of persons who have lost or are likely to lose their employment or livelihood who have been generated by way of substantially from their main source of subsistence or occupation consequent to the acquisition of land for the project.
5. A list of beneficiaries, if any.
6. A list of public utilities and Government buildings which are likely to be affected.
7. An itemized list of benefits and packages which are to be provided to Project Affected Families:
8. Details of the extent of land acquired which may be acquired in settlement area for resettling of the Project Affected Families:
9. Details of the extent of Government land available which may be allotted to R&Rs in lieu of land acquired for the project:
10. Details of the extent of cadastral land available in project beneficiaries area that can be acquired for allotment to R&Rs in lieu of land acquired for the project:
11. Details of the basic amenities and infrastructure facilities which are to be provided for resettlement:
12. The time schedule for shifting and resettling the displaced families in resettlement area:
13. A certificate from the Administrator for Resettlement & Rehabilitation that final

Final publication of Scheme/Plan of R&R
CHAPTER VI

R&R BENEFITS FOR PROJECT AFFECTED FAMILIES

6.0 R&R BENEFITS FOR PROJECT AFFECTED FAMILIES

6.1 The rehabilitation and rehabilitation (R&R) benefits shall be provided to the Project
Affected Families (PAFs) on the basis of the PAOs received by the Project
Authority. The R&R benefits shall be given as per the guidelines issued by the
Government from time to time.

Free house site:

- The site shall be provided free of cost to the PAOs.
- The site shall be suitable for the construction of a house.

Grant for house construction:

- The grant shall be provided to the PAOs for the construction of a house.
- The grant shall be provided based on the approved construction plan.

Allocation of Government land to PAOs who become Small or Marginal farmers or
Landlords after acquisition, in lieu of acquired land:

- The land shall be allocated to the PAOs who become Small or Marginal farmers or
Landlords after acquisition, in lieu of acquired land.
- The land shall be allocated based on the approved construction plan.

These benefits shall be provided to the PAOs without any discrimination based on
sex, age, or any other factor.

The PAOs shall be informed about the provision of these benefits and the
procedure to be followed for availing the benefits.

The PAOs shall be provided with the necessary assistance for the construction of a
house.

The PAOs shall be provided with the necessary assistance for the construction of a
house.
Allotment of land acquired by Government from the project benefitted area to Schedule Tribe PAFs, who become Small, or Marginal farmers or Landless after acquisition, in lieu of Acquired land from them: Government may acquire land within the project benefitted area as per guidelines issued by the Government from time to time such that no person should become small or marginal farmer or landless due to such acquisition, for allotment of such land to ST PAFs (who become small or marginal farmers or landless due to acquisition of their land for the project), if such PAFs are deemed eligible for allotment, from them however such allotment will be restricted to the extent of land acquired from such PAFs to 2.5 ha of land or 1.25 ha wet land which ever is lower. Further provided that in such cases no compensation will be payable for the lands acquired from the PAF for the project to the extent of such land is allotted.

No compensation will be payable for the lands returned from PAF, once project to the extent as it had in allotted.

The land allotted under Para 6.2.1, 6.4 and 6.5 shall, be free from alien encumbrances. The land allotted may be in the joint names of wife and husband of PAF.

Grant for cattle shed: Each PAF having cattle at the time of acquiring 1.5 ha shall get financial assistance of Rs. 3000, or as fixed by Government from time to time for construction of cattle shed in new settlement.

Grant for transporting materials: Each PAF shall get lump sum one time financial assistance of Rs. 2000 or as fixed by Government from time to time for transportation of building materials, belongings and cattle etc. from the affected area to the resettlement area.

Income Generating Scheme Grant: Each PAF comprising of male one earning member and one unemployed person shall get one time lump sum financial assistance of Rs. 2500 or as fixed by Government from time to time for construction of working shed.

Wages if after acquisition land owner becomes landless: Each PAF owning agricultural land in the affected area and whose entire land has been acquired shall get one time financial assistance of Rs. 25,000 or as fixed by Government from time to time for construction of working shed.

Wages if after acquisition land owner becomes marginal farmer: Each PAF owning agricultural land in the affected area and whose entire land has been acquired shall get one time financial assistance equivalent to 250 days minimum agricultural wages if no land is allotted in lieu of acquired land.

Wages if after acquisition land owner becomes marginal farmer: Each PAF owning agricultural land in the affected area and whose entire land has been acquired shall get one time financial assistance equivalent to 500 days minimum agricultural wages if no land is allotted in lieu of acquired land.

Wages if after acquisition land owner becomes small farmer: Each PAF owning agricultural land in the affected area and whose entire land has been acquired shall get one time financial assistance equivalent to 250 days minimum agricultural wages if no land is allotted in lieu of acquired land.

Wages to labourers: Each PAF belonging to the category of agricultural workers, or non-agricultural workers shall be paid on one time financial assistance equivalent to 365 days of the minimum agricultural wages.

Subsistence allowance to displaced family: Each PAF whose family is left landless after acquisition shall get financial assistance equivalent to 240 days of minimum agricultural wages. It will be admissible to any other benefit awarded to such PAF.
6.15 In the case of acquisition of land in emergent situation such as under Section 12 of the Land Acquisition Act 1894 or similar provision of other Acts to have been made to provide with transit accommodation pending resettlement and rehabilitation scheme, the families shall also get R&R benefits as mentioned in above Paras under the R&R.

6.16 The Project Affected families who were in occupation of the land prior to the Implementing Agency's acquisition, shall get the R&R benefits as per Government of India's guidelines. In the absence of accurate and authentic information, the最低 Basic Amenities to be provided at Resettlement Centre for Project Affected Families

CHAPTER - VII

7.0 DISPUTE REDRESSAL MECHANISM

Project Level

R&R Committee at Project Level:

In respect of every project to which this Policy applies, the State Government shall constitute a Committee under the chairmanship of the Administrative Officer to be called the Settlement and Rehabilitation Committee to monitor and review the progress of implementation ofAngel. Settlement and Rehabilitation measures under the Project/Aggregate Fund.

The Settlement and Rehabilitation Committee shall constitute a Committee under the chairmanship of the Administrative Officer to be called the Settlement and Rehabilitation Committee to monitor and review the progress of implementation of settlement and rehabilitation measures under the Project/Aggregate Fund.

R&R Committee:

1. The composition of the R&R Committee at Project Level shall include:
   a. A representative of the Project Authority/Agency,
   b. Labour/Trade Union Leader as per the draft Labour Act,
   c. An economist/machinery expert, and
   d. A legal expert.

2. The members of the Committee shall be appointed by the Administrative Officer after obtaining the advice of the R&R Committee.

3. The R&R Committee shall have the power to address the grievances of the affected persons relating to the settlement and rehabilitation measures under the Project/Aggregate Fund.

4. The R&R Committee shall be empowered to recommend to the State Government the settlement and rehabilitation measures under the Project/Aggregate Fund.

Dispute Redressal Mechanism:

Grievance Redressal Mechanism:

In respect of every project to which this Policy applies, the State Government shall constitute a Grievance Redressal Committee to monitor and review the progress of implementation of settlement and rehabilitation measures under the Project/Aggregate Fund.

The Grievance Redressal Committee shall have the power to address the grievances of the affected persons relating to the settlement and rehabilitation measures under the Project/Aggregate Fund.

Commission for Settlement and Rehabilitation may, from time to time, after obtaining the advice of the State Government, constitute and notify an Experts Committee for the purpose of

Page - 18
INTERSTATE PROJECTS:

1. The Projects, which have an area of more than one district or involve the Project Affected Families, and Project Affected Families in more than one district, it is proposed to be resettled in the States and the States are requested to appoint the Administrator for Resettlement & Rehabilitation and the Commissioner for Resettlement and Rehabilitation for the purposes of this Act.

2. The matter of implementation of the Act and the management of the Projects shall be included in the States, through the State Implementing Agency (SIA) proposed to be constituted under the Act. The States are requested to constitute the SIA and the immediate action for the same is advised.

3. Any disbursement of funds by any authority other than the Project Authority, as defined in the Act, may be referred to the Central Government in the Ministry of Land Resources of the Government of India and the decision of the Central Government will be final on the matters relating to the Inter-State Projects and Urban Projects.
CHAPTER - VIII

8.6 MONITORING MECHANISM AND APPLICABILITY

State Level Monitoring Committee:
The State Level Monitoring Committee is constituted by the Principal Secretary/Secretary, Department of Revenue, for reviewing and monitoring the implementation of installation and rehabilitation schemes. The Committee shall meet at least once in three months to review and monitor the implementation of RDA schemes or projects. The Committee will consist of the following officials under the chair of Joint Secretary, as its members:

Secretary, Planning
Secretary, Water Supply
Secretary, Public Works
Secretary, Housing
Secretary, Education
Secretary, Agriculture
Secretary, Industry and Commerce
Secretary, Energy
Secretary, etc.
Secretary, Finance

The Committee will meet once in a month. The minutes shall be circulated to the Members of the Committee.
THIRD PARTY CONCURRENT AUDIT OF IMPLEMENTATION

Chairman State level committee shall conduct a state level concurrent party level audit of implementation of R&R Plan. The audit report shall be put before state level committee for decision.

PROJECT LEVEL MONITORING COMMITTEE

The project level monitoring committee shall conduct a project level concurrent audit of implementation of R&R Plan. The audit report shall be put before the monitoring committee for decision.

Applicability

This policy is applicable to

- Resettlement and Rehabilitation of Project Affected People
- Project Displaced Families

The policy shall come into effect from the date of issue of Government Order.
Green Revolution in Andhra Pradesh
PROPOSED AMENDMENTS IN THE AP R&R POLICY FOR ROAD SECTOR PROJECTS

The present AP R&R policy 2005, apparently addresses R&R issues of water resources projects and the provisions available under this policy do not adequately cover R&R issues associated with non-linear projects (including road sector). Based on the resettlement issues in the road sector project and the provisions of the R&R policy framework which was prepared for the first AP State Highways Project (APSHP), funded by the Bank and also the experience from the implementation of Resettlement Plan under the APSHP, following modifications are proposed in the state R&R policy so as to cover R&R issues of roads and highways projects.

<table>
<thead>
<tr>
<th>S. No</th>
<th>Provisions under the present AP R&amp;R Policy 2005</th>
<th>R&amp;R issues not covered under the policy</th>
<th>Proposed modifications in A.P. R&amp;R policy 2005</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Para 1.3: '.... Provide succor to the assets less rural poor. Who have been displaced</td>
<td>Displaced should also include those affected but not displaced</td>
<td>Add &quot;and /or affected&quot; after displaced</td>
</tr>
<tr>
<td>2</td>
<td>Para 3.2: The definition of affected zone refers to water sector projects</td>
<td>The definition of affected zone does not cover linear (like road sector) projects</td>
<td>Add one more parameter &quot;(c) for linear projects area falling within the project corridor of impact&quot;</td>
</tr>
<tr>
<td>2</td>
<td>Para 3.8: Project means the project(s) notified under this policy and displacing. a) 100 or more families en-mass in plain areas b) 25 or more families en mass in tribal areas or in areas mentioned in Schedule V of the constitution of India from their lands and or houses</td>
<td>Limiting the number to only those displaced would exclude families affected but not displaced. In road projects, the number of partially affected families out numbers those requiring relocation. Such families suffer substantially but are not regarded as displaced. Further in these projects those displaced/affected are not en-mass but are spread over large areas. If the current definition is followed, most of the road projects are not covered under the state R&amp;R policy, and project execution will face stiff resistance by those affected.</td>
<td>Replace the definition of the project as: &quot;Project means the project(s) notified under this policy and resulting in partial losses and/or displacing&quot;. Add one more parameter as (c) for linear project displacement is not en mass but scattered</td>
</tr>
<tr>
<td>3</td>
<td>Para 3.0: There is no mention under the policy of families with no legal title and non-agricultural families</td>
<td>In linear projects (as well as other sector projects) quite often, one comes across with affected/displaced families who have no legal titles to the land occupied by them. They are generally referred to as encroachers and squatters. Majority of these people are poor, asset less and belong to ST/SC and other poor sections. It is also the experience that there are affected/displaced families whose living is not based on agriculture but is dependent on trade/business and industry. Both the above groups of affected/displaced families are presently not covered under the state R&amp;R policy.</td>
<td>Add the following definition: Families with no legal titles are the persons (i) Occupying government/other land for cultivation to earn their living (ii) Residing or carrying out economic activity in structures built within the affected zone/corridor of impact Non agricultural families: means whose primary source of livelihood is from non agricultural source (like trading, business and manufacturing etc.) within the affected zone/corridor of impact</td>
</tr>
<tr>
<td>3</td>
<td>Para 3.16: A Project Affected Family is defined as one whose more than 50% of land is required</td>
<td>Families losing even up to 25% have been found to be adversely affected and without R&amp;R support it would be difficult to provide better standard of living (which is one of the main objectives of the policy indicated under Para 2.0). On similar ground, people losing more than 25% of</td>
<td>Under Para 3.16 (b) replace 50% by 25% and add (d) families losing more than 25% of their residential/commercial structures.</td>
</tr>
<tr>
<td>S. No</td>
<td>Provisions under the present AP R&amp;R Policy 2005</td>
<td>R&amp;R issues not covered under the policy</td>
<td>Proposed modifications in A.P. R&amp;R policy 2005</td>
</tr>
<tr>
<td>-------</td>
<td>------------------------------------------------</td>
<td>----------------------------------</td>
<td>----------------------------------</td>
</tr>
<tr>
<td>4</td>
<td>Para 3.17 project displaced family is defined as “means any family. Dwelling house in the village in the affected. ...Dwelling house”</td>
<td>This is a distorted definition as it excludes losses to commercial structures (used for business/trade and work place). It also excluded losses in non-village areas.</td>
<td>Revise the definition as follows: “Project Displaced family” means any family, who on account of acquisition of dwelling house and structures used for commercial purposes including business/trade in the affected zone for the purpose of the project, has been displaced from such dwellings and/or commercial structures.</td>
</tr>
<tr>
<td>5</td>
<td>The notification under section 4(i) of LA Act pertains to those whose lands/other immovable properties are acquired</td>
<td>No cut off date has been mentioned for the non titleholders among the affected families</td>
<td>Add: under Chapter III, the following Cut off date: For the legal owners of the land and structures the date of land acquisition notification will be the cut off date. For squatters/encroachers the date of social survey will be the cut off date for R&amp;R entitlements.</td>
</tr>
<tr>
<td>6</td>
<td>Para 5.4: Procedure to be followed for survey and census of PAFs and PDFs etc.</td>
<td>This Para is silent on the affects/displaced families from among encroachers/squatters</td>
<td>Revise Para 5.4 (b) as follows: “Project affected families... agriculture land business/work place, employment... Or vocation. Also add the following: (e). The project affected persons who have unauthorized occupied the land /structures in the affected area.</td>
</tr>
<tr>
<td>6</td>
<td>Para 5.14: After completion... In consultation with ...Project area is situated.</td>
<td>Consultation with project affected/displaced families and not just with their representatives will help in preparing a more acceptable R&amp;R plan. The experience so far is that an R&amp;R plan prepared in close consultation with affected/displaced families is found to be more acceptable and helps in smooth implementation. Affected/displaces families generally resist plans prepared in consultation with their representatives.</td>
<td>Revise Para 5.14 as under: After completion... In consultation with Project Affected families and Project Displaced families and their representatives, women, Chairpersons... Area is situated.</td>
</tr>
<tr>
<td>7</td>
<td>Para 5.18: Contents of Draft Scheme/Plan of R&amp;R</td>
<td>The project does not specify the time schedule for extending R&amp;R benefits to project affected/displaced families. Without this time limit more often affected families are dispossessed of their land and other assets and in such cases the affected community resists project works and progress suffers. It also complicates implementation of R&amp;R plan.</td>
<td>Add the following: n) The time schedule to extend R&amp;R entitlements to project affected / displaced families</td>
</tr>
<tr>
<td>8</td>
<td>Para 6.2: Free house sites: This is presently available to</td>
<td>This is against the spint of the policy mentioned under Preamble (Para 1.0)</td>
<td>Add: Any project displaced family</td>
</tr>
<tr>
<td>S. No</td>
<td>Provisions under the present AP R&amp;R Policy 2005</td>
<td>R&amp;R issues not covered under the policy</td>
<td>Proposed modifications in A.P. R&amp;R policy 2005</td>
</tr>
<tr>
<td>-------</td>
<td>------------------------------------------------</td>
<td>----------------------------------------</td>
<td>---------------------------------------------</td>
</tr>
<tr>
<td>9</td>
<td><em>Para 5.14: After completion... In consultation with... Project area is situated.</em>&lt;br&gt;Consultation with project affected/displaced families and not just with their representatives will help in preparing a more acceptable R&amp;R plan. The experience so far is that an R&amp;R plan prepared in close consultation with affected/displaced families is found to be more acceptable and helps in smooth implementation. Plans prepared in consultation with their representatives are generally resisted by affected/displaced families.</td>
<td></td>
<td><em>Revise Para 5.14 as under:</em>&lt;br&gt;After completion in consultation with Project Affected families and Project Displaced families and their representatives, women, Chairpersons... Area is situated.&lt;br&gt;Add the following:&lt;br&gt;&lt;br&gt;n) The time schedule to extend R&amp;R entitlements to project affected / displaced families</td>
</tr>
<tr>
<td>10</td>
<td><em>Para 5.18: Contents of Draft Scheme/Plan of R&amp;R</em>&lt;br&gt;The project does not specify the time schedule for extending R&amp;R benefits to project affected/displaced families. Without this time limit more often affected families are dispossessed of their land and other assets and in such cases the affected community resists project works and progress suffers. It also complicates implementation of R&amp;R plan.</td>
<td></td>
<td><em>Add:</em>&lt;br&gt;Any project displaced family (including squatters losing dwelling/shops/work place) has been acquired should be allotted site for&lt;br&gt;&lt;br&gt;(i) Dwelling house site free of cost&lt;br&gt;(ii) Site for shop 30 sq.m in rural areas 25 sq.m in urban areas, free of cost</td>
</tr>
<tr>
<td>10</td>
<td><em>Para 6.2: Free house sites: This is presently available to losing their private properties</em>&lt;br&gt;This is against the spirit of the policy mentioned under Preamble (Para 1.0) and the objectives of the policy (Para 2.0). Further, it becomes extremely difficult for the project implementers to address issues relating to encroachers &amp; squatters among the project affected and displaced families if there are no specific provisions for their relocation. The policy also does not provide alternates site for those who lose shop/work place.</td>
<td></td>
<td><em>Add:</em>&lt;br&gt;Any project displaced family (including squatters losing dwelling/shops/work place) has been acquired should be allotted site for&lt;br&gt;&lt;br&gt;(i) Dwelling house site free of cost&lt;br&gt;(ii) Site for shop 30 sq.m in rural areas 25 sq.m in urban areas, free of cost</td>

### Participants
- Project preparation team: Social and Environmental team members.
- Stakeholders: Village sarpanch, important people of the village.
- Female participation

### Issues Discussed
- Brief discussion of the project and the funding agency.
- ROW Deficient stretches.
- Land acquisition plan and the compensation to the affecting people.
- Loss of common property resources.
- Resettlement and Rehabilitation of the displaced population.
- Highway related diseases.

### Suggestions
- They are not against the project.
- Asking to reduce the road to 10mts in the village.
- Some special programme for the people living below the poverty line.
- They are asking compensation as per the market price.
- Other basic facilities required for the development of the village.

### Important Finding
- Many structures will be damaged partially.
- There are many people residing along the road side.
- Most of the people are living below poverty line.

### Future course of action
- Identification of rehabilitation site should be done after involving the local people in the management plan.

### Participants
- **Project preparation team**: Social and Environmental team members.
- **Stake holders**: Local sarpanch, inhabitants of the village.
- Active participation of the women.

### Issues Discussed
- Design of the project and its requirements.
- Resettlement and Rehabilitation of the displaced population.
- **R&R** policy of the state Government.
- Loss of common property.
- Compensation for the vulnerable groups.
- Facilities available as well as government programs in the village.
- Highway related diseases.
- Drainage and safety issues
- Village development

### Suggestion /Comments
- They are not against the project.
- Will not accept compensation on the Government Registration rate
- They asking to provide shelter to the poor who will be affected due to the road widening.
- Acquire less land for saving religious structures
- Different kinds of business opportunities should be provided for men and women or provisions for other government schemes should be given

### Important Finding
- Many structures will be damaged partially
- There are some religious structures along the road side.
- People are aware of HIV but lack of treatment guidance and facilities.
- Need to provide AIDS control facilities in the village.
- A separate AIDS control cell for providing guidance to the women.

### Future course of action
- Land acquisition strategy should be devised
- HIV/AIDS awareness campaign should be part of social management plan to generate awareness and BCC among general people

• Asking to reduce the road to 10mts in the village.  
• They are asking for some support from the government for the poor.  
• They are asking compensation according to the market price.  
• Asking to provide a perfect drainage system.  
• Facilities for drains should be given  
• Medical facilities should be provided  
• Public toilets should be constructed |        |
| **Important Finding** | • There are many people residing along the road side.  
• People are aware of HIV and they have the treatment facilities.  
• Plants (trees) should be planted as early as possible after acquiring the required land. |        |
| **Future course of action** | • Intensive consultation between the locals and the executing agency |        |
### Structured Consultation

| Date: 22.7.2007 | Venue: Chodur  
Dist.: Kadapa | Photos |
|-----------------|-----------------------|--------|

#### Participants
- **Project preparation team**: Social and Environmental team members.
- **Stake holders’**: Potential project affected persons. Village head and women of the village.

#### Issues Discussed
- Proposal Jammalamadugu-Maidukuru SH-56(46 Kms).
- Benefits and losses of the project.
- Loss of common property resources.
- Compensation package.
- Compensation for the people living below poverty line and the vulnerable groups.
- HIV/AIDS and other Highway related diseases.

#### Suggestion
- Villagers are against the project if it is going to be more than the limits.
- Safety and proper care for sanitation should be taken during the project implementation phase.
- Other facilities required for the development of the village.
- They are asking to extend the road up to the existing drainage system.
- Employment opportunities for the affected people should be explored.
- Employment for women, in particular, should be taken into account.

#### Important Finding
- Most of the structures along the road are going to affect.
- There is need to water facilities near the road.
- Need to provide Public toilets along the roads especially in the market area.

#### Future course of action
- Intensive and continued consultation with other stakeholders.
- Confidence building among the villagers in the procedure of Land Acquisition so that it can be completed timely without any litigation.

<tr>
<th>Date: 18.07.2007</th>
<th>Venue: Gujjangivalasa</th>
<th>News paper - Date</th>
</tr>
</thead>
</table>

### Participants
- **Project preparation team**: Social and Environmental team members.
- **Stake holders**: Village sarpanch, villagers and Press reporter.

### Issues Discussed
- R&R policy of the state Government.
- Loss of Pucca buildings of encroachers along the road during widening.
- Compensation for the commercial structures.
- Medical facilities or women and children.
- Educational institutions and the level of literacy among the females.
- Welfare centers.
- Apprehensions amongst the shopkeepers that as a result of the widening of the road, they may probably lose their livelihood.
- Drainage system
- Medical facilities
- Road safety and other issues

### Suggestions/Comments
- Sarpanch and shopkeepers suggested that service roads would be useful for public to reduce accidents and to segregate local traffic.
- Prefer adjustment of affected SBEs within ROW.
- People would cooperate by means of labour sharing in constructing temporary leased shops and kiosks.
- People were scared of the disruption in business during construction period of highway.
- Regularization of vendor markets would reduce congestion on highway.

### Important Findings
- Only Health sub center is in the village.
- No drainage system in the village.
- Culverts are damaged.

### Future course of
- To facilitate hospital facilities in the

<th>News paper - Date</th>
</tr>
</thead>
</table>

#### Participants
- **Project preparation team**: Social and Environmental team members.
- **Stake holders**: Village sarpanch, villagers and Press.

#### Issues Discussed
- Brief discussion of the project and the funding agency.
- About Andhra Pradesh Road Development corporation.
- About the Resettlement and Rehabilitation policy of the State government.
- Women empowerment and their activities.
- Road safety, rules and regulation.
- Trees compensation
- Land acquisition and compensation Process.
- Awareness of HIV/AIDS among the women and the illiterate people.

#### Suggestion
- Appropriate compensation to the people who will loss their trees during the implementation of the project road.
- Compensation for the illegal title holders also.

#### Important Findings
- All the residential structures along the road will be damaged due to the proposed widening of the road.
- No community latrines seen in the village. 4 Mandalis come under this Village Panchayat, but still peoples are waiting for basic facilities.
- Temporary clinics should be opened on the road side during the implementation of the project.
- Bus stops are need at the appropriate locations.
## Structured Consultation

<table>
<thead>
<tr>
<th>Date: 17.07.2007</th>
<th>Venue: Ganissettipalem Mandal</th>
<th>News paper - Date</th>
</tr>
</thead>
</table>

### Participants
- **Project preparation team:** Social and Environmental team members.
- **Stake holders:** Local surpach, village head, villagers.

### Issues Discussed
- R&R policy of the state Government.
- Loss of Pucca buildings of encroachers along the road during widening.
- Compensation for the commercial structures.
- Medical facilities or women and children.
- Educational institutions and the level of literacy among the females.
- Welfare centers.

### Suggestion
- Lot of population will be affected due to this project especially the commercial along the road.
- Shopkeepers and Sarpanch suggested that if possible the likely affected cabins could be put some feet away from the four-track road.
- Even after widening of the road, allot cabins along the same road.
- They preferred community latrines.
- Flood lights and proper safety signs.
- Villagers are requested for the establishment of Anganwadi centers and provision of Community Hall.

### Important Findings
- Majority of the commercial buildings are of encroachers.
- Majority of the population in the village is agriculturalist.
- No schools for the children.
- No bus stop in the village.
## Structured Consultation

<table>
<thead>
<tr>
<th>Date: 17.07.2007</th>
<th>Venue: Gullepalli Mandal: Sabbavaram</th>
<th>News paper - Date</th>
</tr>
</thead>

### Issues Discussed
- Water resources both natural and man made.
- Drainage system and Sanitation.
- Medical facilities: women information cells.
- Road safety.
- HIV/AIDS issues and other highway related diseases.

### Suggestion
- Villagers need bus shelter in their village on the left side of the road.
- Speed breaker is necessary at 24th milestone.
- Sufficient water facility is required as there is water scarcity and water tank must be provided.
- There is a pipeline along the road from Nellimarla to Penubarti. Villagers suggested that if public taps are installed at desired locations so that they can get sufficient water.
- Pucca drainage system is required.
- Community latrines need to be constructed.
- PHC and Veterinary health care should be there in their village as 4 villages come under their village panchayat.
- Community hall is required.

### Important Findings
- No proper water resources found in the village.
- No community latrines found in the village.
- No health care systems.

### Future course of action
Intensive consultation with potential project affected population and the land

| Agriculture & commercial land.  
- Resettlement and Rehabilitation options.  
- Women’s responsibility in HIV/AIDS.  
- Sanitary facilities  
- Women welfare  
- Market yard | | |
| **Suggestion/Comments** | | |
| - Need funds in order to develop panchayat mainly for the construction of roads inside the village and even for the construction of drainage system.  
- Villagers requested to open a community hall in their village.  
- Construction of community latrines and individual latrines is required.  
- They said to facilitate infrastructure for Anganwadi centers.  
- A mini stadium/play ground for the youth who are interested in sports.  
- They requested to provide land for the market as the villagers are traveling 9km for the goods.  
- Women requested to provide stitching machines and other facilities which help them in earning their livelihood. | | |
| **Important Findings** | | |
| - No community hall.  
- No proper market place.  
- No medical facility in the village | | |
## Structured Consultation

<table>
<thead>
<tr>
<th>Date: 20.07.2007</th>
<th>Venue: Nivagam Mandal: Kothavalasa</th>
<th>News paper - Date</th>
</tr>
</thead>
</table>

### Participants
- **Project preparation team:** Social and Environmental team members.
- **Stake holders:** Village head, villagers.

### Issues Discussed
- Water resources
- Educational facilities
- Sanitation
- Medical facilities
- Road safety

### Suggestions/Comments
- Need a PHC center for the villagers so they are traveling 10kms for first aid and treatment.
- Community latrines should be constructed.
- Speed breakers are required at school zone and panchayat office.
- A degree college and junior college are required in their village. Public health care center must be provided to the villagers.
- Opening of degree and junior colleges in the village
- Construction of speed breakers at the specified locations

### Important Findings
- No community latrines in the village.
- No speed breakers at school zone.
- No health care centers.

### Future course of action
## Structured Consultation

<table>
<thead>
<tr>
<th>Date: 20.07.2007</th>
<th>Venue: Kotturu Mandal: Kotturu</th>
<th>News paper - Date</th>
</tr>
</thead>
</table>

### Participants
- **Project preparation team**: Social and Environmental team members.
- **Stake holders**: village head, villagers and Press.

### Issues Discussed
- Drainage system
- Sanitary facilities
- Road safety.

### Suggestion
- About the Resettlement and Rehabilitation policy of the State government.
- Women empowerment and their activities.
- Road safety, rules and regulation.
- Trees compensation
- Land acquisition and compensation Process.
- Awareness of HIV/AIDS among the women and the illiterate people.

### Important Findings
- No Pucca drainage system in the village.
- No community latrines found in the village.
- Speed breakers need to be constructed during road widening at SHIVALAYAM Temple.

---

## Structured Consultation

<table>

</table>
| **Suggestion/Comments** | - Land acquisition and compensation.  
- Resettlement and rehabilitation.  
- Tree felling replacement.  
- Village development.  
- HIV/Aids Awareness.  
- Though protected water scheme is running in the village, sufficient water is not supplied to them. So water resources are required.  
- Speed breakers are necessary at 8th km from Chipurupalli.  
- PHC center and Veterinary health centers are also required in the village as they traveled 9kms for medical facilities.  
- Bus shelter is required on the right side if the existing is dismantled during road widening.  
| **Important Findings** | No proper Protected water scheme.  
No health care systems in the village.  
Speed breakers need to be constructed at specified points during road widening |

**Structured Consultation**

<table>

| **Issues Discussed** | - Water resources.  
- Drainage system.  
- Educational Facilities.  
- Sanitary facilities.  
- Health care.  
- Bus shelter.  |
### Suggestion /Comments
- Drinking water is not sufficient in summer to the villagers.
- There is no proper supply of water and even the quality of water is poor.
- There are no sufficient funds for the construction of 2nd phase Protected Water Scheme.
- Community latrines are required.
- Pucca drainage system should be reconstructed.
- No proper medical facilities are provided to the women suffering from gynec problems.
- Need bus shelter if it is dismantled during road widening.

### Important Findings
- Insufficiency of Drinking water.
- No community latrines in the village.
- No proper educational facilities.

### Future course of action
- Good quality water supply to the villagers.
- Construction of community latrines.
- To facilitate junior and degree colleges to the youth.
- Proper health care must be provided especially to the women groups in the village.
- Bus shelter at the junctions near Palkonda.

### Structured Consultation

| **Suggestion/Comments** | • Drainage system  
• Road safety  
• Medical facilities  
• Welfare activities for children and Women.  
• Drainage system is required.  
• There is no Hospital facility in the village. And they are traveling 5kms for the treatment. So they need a hospital facility in their village.  
• Need roads in the interior of the village of about 150m long.  
• At Malligadda, they need a returning wall as they are facing problems during floods.  
• Villagers requested to facilitate Anganwadi center.  
• Speed brakers are necessary at the start-end points of the village.  | |
| **Important Findings** | • No Drainage system in the village.  
• No health care systems in the village.  
• To construct school building as the existing one is damaged.  | |
| **Future course of action** | • To provide health care systems.  
• To facilitate Anganwadi center in the villagers.  
• To construct school building as the existing one is damaged.  
• Construction of returning wall at Malligadda.  
• To construct speed brakers. | |
## Structured Consultation

| Date            | Venue: Nandi Medaram  
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>24/07/2007</td>
<td>Distt: Karimnagar</td>
<td></td>
</tr>
</tbody>
</table>

### Participants
- **Project Team**: Social, Environmental and Technical Experts.
- Potential project affected persons, Village head, Representatives, & other Important People of the Village.
- Women Representatives.

### Issue Discussed
- Introduction of the two-lane road at Nandi Medaram.
- Brief discussion of the funding agency.
- Advantages of widening the road.
- Land acquisition and bypass proposal.
- Benefits of improvement road.
- Resettlement and Rehabilitation of displaced population.
- Compensation for lost properties.
- Women's responsibility in HIV/AIDS.

### Suggestions
- In this village land rates are high so they (people) want compensation as per their market value.
- They want speed breakers.
- They want some particular trees to be planted in their village.
- Flood lights and proper safety signs.
- Loss of business structures and business, should be compensated.
- Compensation for homestead land should be given.
- Income will be enhanced through this Project.
- Facilities for public toilets and tube wells should be provided.

### Important Finding
- It is accident prone area.
- Geometry is very bad in the Nandi Medaram village.
- Land rates are high as compared to other village.
- People are aware of the benefits and
<table>

<th>Venue: Nandi Medaram</th>
<th>Photos</th>
</tr>
</thead>
<tbody>
<tr>
<td>24/07/2007</td>
<td>Distt: Karimnagar</td>
<td></td>
</tr>
</tbody>
</table>

Advantages of road widening:
- The construction of this road will decrease approximately 60 km distance from Godaveri Kani to Jagatiyal.
- Most of the structures are of semi-Pucca Nature.
- Existence of large pond on right side and residential structures on the left in the village is the main obstacle in the widening of existing road.
- They already know about the bypass option.

Future Course of Action:
- Need to spread awareness regarding the sexually transmitted diseases.
- Land rates in the same village vary. So need to hold a consultation with selected representatives of the village and the R&B department for the fixation of rates.
## Structured Consultation

**Structured Consultation**

| Date: 13-06-2007 | Venue: Singarajupalli  
|                 | Distt: Warangal |

**Participants**
- **Project Team:** Social, Environmental and Technical Experts.
- Potential project affected persons, Village head, Representatives, & other Important People of the Village.

**Issue Discussed**
- Brief introduction of the project and funding agency.
- Resettlement and Rehabilitation policy of the Andhra Pradesh Government.
- Introduction of the two lane road at Devarruppala.
- Time of starting the construction process.
- Resettlement and Rehabilitation of the displaced population.
- Tree felling and Replacement.
- Women's responsibility in HIV/AIDS.

**Suggestion**
- In this village land rates are high so that they want compensation as per their market value.
- They want some particular trees to be planted in their village.
- They preferred Community toilets. Homestead land should be compensated with homestead land or adequate compensation should be given for the same.
- Facilities for business opportunities should be provided to the affected.

**Important Finding**
- Land rates are high as compared to other villages.
- People are aware about the benefits and advantages of road widening.

**Future Course of Action**
Local peoples especially those who are going to displace should be involved in the land acquisition process for the speedy completion of the project.

Stake holders: Village head, local peoples and potential project affected persons. |
| **Issues Discussed** | Brief introduction of the project and the funding agency.  
Benefits and losses perceived due to the project.  
Rehabilitation option and livelihood restoration choices.  
Felling of trees along the road.  
Government schemes.  
Accidents prone areas of the project roads. |
| **Suggestions** | Affected persons those who are going to loss their land should be given appropriate compensation.  
Compensation should be given before the implementation of the project.  
They required speed breakers at school zone and hospital.  
Proper drainage system. |
| **Important Finding** | There are very few structures along road.  
People are very interested in the project.  
People in the village are unaware about the government running schemes.  
They are not aware about the HIV/AIDS epidemic. |
| **Future course of action** | Need to spread awareness about the above said epidemic. |
# Structured Consultation

**Date:** 20.07.2007  
**Venue:** Mahammadabad  
**Dist.:** Anantapur

## Participants
- Social and Environmental team members.
- Stake holders: Village head, local peoples and potential project affected persons.

## Issues Discussed
- Discussion of two lane proposal of Mahammadabad village.
- Available ROW.
- Land acquisition process and its compensation.
- Loss of common property resource.
- Discussion on the Govt. running schemes.
- Highway related diseases and specifically AIDS epidemic.

## Suggestion /Comments
- Asking not to cut the trees along the road side.
- Adequate compensation.
- Proper safety measure should be taken during the construction phase.
- Compensation on current market rate.
- Safety measures should be taken during the time project implementation.
- Suggesting for providing houses for the people who are living on the road side.

## Important Finding
- Most of the structures will be damaged partially.
- There are many people residing along the road side.
- People are aware of HIV and they have the treatment facilities.
- They are not against the road but asking for the reduction of the damage to their properties.
- Asking to minimize the land acquisition.

## Future course of action
- Involvement of people in the identification of the resettlement sites

# STRUCTURED CONSULTATION

**Date: 23/07/2007**

**Venue:** Apparajupeta  
**Dist.:** Nellore

| Participants |  
| --- | --- |  
| • Project team members.  
• Village head and other elected representatives.  
• Potential Project affected persons. |  

| Issues Discussed |  
| --- | --- |  
| • Proposal of two lane road at Apparajupeta.  
• Discussed about accident-prone area.  
• Resettlement and Rehabilitation of the displaced population  
• Compensation of the trees, standing crops and land.  
• Benefits of road widening. |  

| Suggestions |  
| --- | --- |  
| • People living here are very poor.  
• Need to develop the resettlement and rehabilitation site at the nearby locations so that affected population should not face social alienation.  
• Compensation should be given at the market value. |  

| Findings |  
| --- | --- |  
| • Roadside people are very poor. Many structures will be damaged partially.  
• There are many people residing along the road side.  
• Religious structures should be relocated at proper place. |  

| Future course of action |  
| --- | --- |  
| • Confidence building among the villagers in the procedure of Land Acquisition so that it can be completed timely with out any litigation. |  

---

# STRUCTURED CONSULTATION

**Date: 23/07/2007**

**Venue:** Sangam  
**Dist.:** Nellore

| Participants |  
| --- | --- |  
| • Project team members.  
• Project effected persons.  
• Village head and Elected representatives.  
• Potential project affected people. |  

| Issues Discussed |  
| --- | --- |  
| • Proposal of two-lane road at Sangam.  
• Discussed about accident-prone area.  
• Benefits of road winding.  
• Land acquisition and compensation.  
• Road side tree cutting  
• Benefits of road widening.  
• Improved health, market on educational facilities or stress on existing infrastructure  
• Government policies.  
• Discuss about employment generation capacity. |  

| Suggestions |  
| --- | --- |  
| • The improvement of the road will give new opportunities to the people for running business. |  

---
| Date: 23/07/2007 | Venue: Sangam  
| Dist.: Nellore |
| --- | --- |
| - Proper compensation should be given to the project affected persons.  
- Compensation should be given at the market value.  
- They want speed breakers.  
- Proper safety measures should be taken into consideration during the implementation phase.  
- Present road is enough no need of extension. |
| Findings | - Bypass should be planned if it is possible.  
- They want to reconstruction dismantle structures.  
- Develop awareness of traffic control. |
| Future course of action | - Intensive and continued consultation with other stakeholders |
| Date: 22/07/07 | **Venue:** PULLUR CROSS  
**Dist.:** Kadapa | **Photos** |
|---|---|---|
| **Participants** | • Project Team: Social, Environmental and Technical Experts.  
Potential Project affected persons, Village head, Representatives, & other Important People of the Village.  
• Senior citizens of the village | |
| **Issues Discussed** | • Brief introduction of the project and the funding agency.  
• State government policy of R&R.  
• Loss of structures like commercial and residential due to the project.  
• Compensation for the lost properties.  
• Resettlement and Rehabilitation sites.  
• Gender issues. | |
| **Suggestions** | • Acquire minimum land so that the fragile environment can be saved.  
• Most of the commercial structures along the road are going to bear the burn.  
• Compensation should be given at the market value.  
• Every displaced person should get the compensation whether legal or illegal.  
• Provisions should be made for tube wells in village | |
| **Important finding** | • Most of the people are dependent upon business.  
• Against the cutting of trees.  
• Immediate plantations of the new trees needed to keep them pacify. | |
| **Future course of action** | • Intensive and continued consultation with other stakeholders.  
• Involvement of local engineers for successful implementation of the proposed project. | |
| Date: 20/07/07 | Venue: SANTHINAGAR  
Dist.: Kadapa | Photos |
|---------------|-------------------|-------|
| **Participants** | Project Team: Social, Environmental and Technical Experts.  
Potential Project affected persons, Village head and Representatives & other Important People of the Village.  
Senior citizens of the village | |
| **Issues Discussed** | Existing road condition  
Requirements of road.  
Proposal of road widening.  
Land acquisition and compensation process.  
Resettlement and rehabilitation process.  
Tree cutting and compensation procedure.  
HIV/AIDS awareness. | |
| **Suggestion** | Compensation should be given before the dismantling of structures.  
After the cutting of trees new trees should be planted immediately.  
Proper care of the displaced population.  
Provide every basic facility at the Relocation sites | |
| **Important finding** | They don’t want disturb trees along the roadside.  
Commercial structures are more along the road.  
Need to start awareness campaign for spreading about the AIDS. | |
| **Future course of action** | Identification of rehabilitation site should be done after involving the local people in the management plan. | |
**Structured Consultation**

| **Suggestion** | • Compensation at the current market rate.  
                         • Already twice they had dismantled their structures due to the other projects & now they need compensation before the starting of construction work.  
                         • Public toilets in the villages.  
                         • They need floodlights along the road.  
                         • Proper safety measure should be taken during the construction phase.  
                         • Proper drainage on both side of the road.  
                         • Speed breakers at the appropriate intervals. | ![Photo 2] |
| **Important Finding** | • There are very few structures along the road.  
                          • They are going to loose their agricultural land along the road.  
                          • There is no drainage facility  
                          • High Fluoride level in the water. |        |
## Future Course of Action

- Approximately 10 people in the village are suffering by Aids.
- Government should campaign widely to make people aware of Sexually Transmitted Diseases and HIV/AIDS.
- Joint action of the public and the state government is needed for successful and the speedy implementation of the project.

## Structured Consultation

### Date: 11-07-2007

### Venue: Medak

#### Participants

- **Project Team**: Social, Environmental and Technical Experts.
- Potential Project affected persons, Village head, & other Important People of the Village.
- Representatives.

#### Issue Discussed

- Introduction of the two lane road at Kayadampalli
- Benefits of widened and improved road.
- Compensation for commercial and Residential structures.
- Compensation for the affecting trees and crops.
- Discussed about the cost of both Agriculture & commercial land.
- Resettlement and Rehabilitation of displaced population.
- Women's responsibility in HIV/AIDS.

#### Suggestion

- The villagers suggested that compensation must and should be on the current market rate.
- They want to have floodlights along the road.
- Majority of the people suggested that
**Important Finding**

- There are very few structures along the road.
- They are losing agricultural land besides the road.
- Absence of the drainage along the road.
- In this village, people are deprived from the basic facilities like middle school, dispensary, Post office, No bus stop etc.
- There is no community hall or public toilets.

**Structured Consultation**

### Important Finding

Date: 14-07-2007

**Venue:** Bachipally  
**Distt:** Medak

**Suggestion:**
- Proper mitigation measures for minimizing displacement.
- Special provision for the vulnerable groups.

**Important Finding:**
- Few structures are along the road.
- They are losing agricultural land besides the road.
- Deprived of basic facilities like dispensary.
- Every Saturday people from surrounding villages come there to listen the sermons.

**Future Course of Action:**
There is a need to develop specific planning for vulnerable groups and the people living below the poverty line because the loss of assets for them brings unforeseen results.

</tr>
</thead>
</table>

### Participants
- **Project preparation team**: Social and Environmental team members.
- **Stake holders**: Village head, Potential project affected persons, Women of the village.

### Issues Discussed
- Proposed two lane road widening project
- Benefits and losses perceived due to the project.
- Compensation for the trees, standing crops and the land.
- Government schemes for women and children running in the village.
- Compensation for the affecting properties.

### Suggestion
- Suggesting for providing houses for the people who are living on the road side.
- Safety measures should be taken during the time project implementation.
- They required speed breakers several intervals.

### Important Finding
- Condition of the existing road is not good.
- Majority of the people in the village are unemployed.
- Most of the are people illiterates.
- Required by pass road.
- Heavy vehicles run on the road.

### Future course of action
- Road safety camps needs to be started during the phase of project implementation.

| | • They want bypass road.  
| | • Geometry of the road is bad. |
| **Future course of action** | A combined Public and private partnership is needed to complete this project successfully |
## Structured Consultation

**Date:** 25/07/07  
**Venue:** Tada  
**Dist.:** Nellore

### Participants
- Project team members,  
- Project effected persons,  
- Sarpunch and Elected representatives,

### Issues Discussed
- Proposal of two land road at Tada  
- Process of compensation and acquisition.  
- Land acquisition and compensation.  
- HIV/AIDS awareness.  
- Trees cutting and their replacement.  
- Resettlement and rehabilitation of the displaced population.

### Suggestions
- They want compensation at current market value.  
- R&R policy of the state for the displaced population.  
- Existing road is very narrow and widening is the best solution.  
- Adequate compensation should be given to affected people.  
- Widening is the only way for traffic control  
- Speed breakers and divider should be planned

### Findings
- CORE Society also working in this area.  
- Existing Road is very narrow  
- Geometry is bad.  
- People of the village are poor  
- Women literacy rate is very low.  
- Most of the religious structures are along the road.  
- Most of the people awareness about the road widening.

### Future course of action
- Intensive and continued consultation with other stakeholders.  
- Involvement of local engineers for successful implementation of the proposed project
### Structured Consultation

</tr>
</tbody>
</table>

#### Participants
- **Project Team:** Social Expert.
- Potential project Stakeholder, Village head, Representatives, & other Important People of the Village.
- Women also participated

#### Issue Discussed
- Brief discussion of the project and the funding agency.
- About Andhra Pradesh Road Development Authority.
- About the Resettlement and Rehabilitation policy of the State government.
- Women empowerment and their activities.
- Road safety, rules and regulation.
- Trees compensation
- Land acquisition and compensation Process.
- Awareness of HIV/AIDS among the women and the illiterate people.

#### Suggestion
- They suggested that four speed breakers are required in this village.
- A technically sound planning is required to dislocate the pipe lines under the existing road.
- Appropriate compensation to the people who will loss their tree while the implementation of the project road.
- Income enhancement through road widening will be a positive outcome of this Project
- Compensation for the illegal title holders also.

#### Important
- Most of the people in the project area are literate.
### Finding
- Very few structures will bear the burn.
- More over the area is steadily developing and required proper arrangement for spreading information about aids and sanitation.

### Future Course of Action
Women should be consulted while implementing social management plan.

## Structured Consultation

| Date: 11-07-2007 | Venue: Bachannapet  
| Distt: Warangal |
|------------------|---------------------------------------------|
| **Participants** | Project Team: Social Expert and other technical experts.  
| | Potential Project affected persons, Village head, Owners of Residential and Commercial structures. |
| **Issue Discussed** | Brief introduction of the project and funding agency.  
| | Resettlement and Rehabilitation policy of the Andhra Pradesh.  
| | Proposal of road widening and its benefits.  
| | Traffic safety.  
| | Cutting of trees and its replacement.  
| | Drainage and sanitary facility.  
| | HIV/AIDS awareness. |
| **Suggestion** | Compensation for every section of the society whether the affected person is illegal or legal title-holder.  
| | Not only main road, other roads joining the project road should be widened.  
| | Construction of Speed breakers is compulsory for avoiding any mishappening.  
| | Compensation should be given before dismantling the structures.  
| | Proper Resettlement and rehabilitation of the displaced population. |
| **Important Finding** | Most of the houses are beyond the 50 fts.  
| | Accidents occurred frequently.  
| | A developing commercial market. |
| **Future Course of Action** | As there is a huge difference of land rates in the same village, there is need of developing a mechanism for the fixation of land rates acceptable to all the PAPs. |

# STRUCTURED CONSULTATION

<table>
<thead>
<tr>
<th>Date: 19/07/07</th>
<th>Venue: GOKAVARAM Distt.: East Godavari</th>
<th>News paper - Date</th>
</tr>
</thead>
</table>

## Participants
- **Project preparation team:** Social and Environmental team members.
- **Stake holders:** Village sarpanch, Potential project affected persons and other important people of the village.
- Female participation

## Issues Discussed
- Proposed way of the road.
- Loss of residential, commercial and religious structures.
- Land acquisition plan and the compensation to the affecting people.
- Loss of common property resources.
- Resettlement and Rehabilitation of the displaced population.
- Drainage, water logging & flooding problem.
- Road accidents and safety issues.

## Suggestion
- People are demanding for bypass or land acquisition should be less.
- Speed breakers at regular intervals and Divider should be planned.
- If possible try to save Panchayat as well as Saibaba water pipelines.
- Drainage facility is not good.
- Trees should be replaced as soon as possible.
- 60% of HIV cases are observed.
- Many accidents occur near the bridge.
### Important finding
- HIV/AIDS awareness camp needed for spreading aids awareness.
- Pipelines, temples, mosque, church and some statues will come under the proposed way.
- Verankapalli Bridge is very narrow.

### Future course of action
- Intensive consultation between the locals and the executing agency

### Structured Consultation

| Date: 19/07/07 | Venue: KOLAMURU

|---|---|---|
| **Issues Discussed** | - Stake holders: Village surpanch, important people of the village.  
- Female participation  
- Brief discussion on the aims & objectives of the APRDC.  
- Discussion of the Resettlement and Rehabilitation policy of the Andhra Pradesh State Government.  
- Loss of common property.  
- Benefits of road widening.  
- Land acquisition and compensation.  
- Resettlement and Rehabilitation of the displaced population.  
- Accident-prone areas.  
- Cutting of road side trees and their compensation.  
- Highway related diseases like STD and HIV/AIDS. | |
| **Suggestion** | - Loss of pipelines and streetlights are more and they should be replaced immediately.  
- Land acquisition plan and the compensation to the affecting people.  
- Involvement of locals in the resettlement and Rehabilitation of the affected persons.  
- Drainage on both side of the road, otherwise there is no need of road improvement.  
- Ramalingeswara and Ganga temples are more than 400 years old and people are against the dismantling of these temples. | |
| **Important findings** | - People are aware of the future benefits of the project.  
- Religious structures are close to the ROW.  
- Around 200 families will be affected due to this project.  
- Around 150 coconut trees will be disturbed due to this project. | |
| **Future course of action** | - For the relocation of the temples there is need of developing sound cooperation between the R&R division of the Government and the representatives of the project area. |
## Structured Consultation

**Date:** 21/07/07  
**Venue:** SANTANUTALAPADU Dist. Prakasam  
**Photos**

### Participants
- **Project preparation team:** Social and Environmental team members.
- **Stake holders:** Village surpanch, important people of the village.
- Female participation

### Issues Discussed
- Brief discussion of the project and the funding agency.
- Accident-prone area and dangerous curves.
- Awareness of HIV.
- ROW Deficient stretches.
- Land acquisition plan and the compensation to the affecting people.
- Loss of common property and religious structure.
- Resettlement and Rehabilitation of the displaced population.
- Highway related diseases.
- Safety issues.

### Suggestion
- Water tank and other community resources are going to effect with the widening of the road.
- A majority of accidents occur near Shivalayam temple and there are three more sharp turns (accidental prone).
- With the widening of the road traffic will increase and safety measures are necessary to be taken like Signs, speed breakers etc.
- Demanded for bypass if possible.
- Need to spread awareness of HIV/AIDS among the illiterate population of the village

### Important finding
- There will be loss of Sagar water pipe line, which is the main source water.
- Many religious structures are
Most accidents occur near Shivalayam temple due to sharp curves. Proper safety measures are needed to be taken during the construction phase at this location.

If possible participation of women with other representatives in the identification of site and resettlement of the displaced population.

<th>Venue: CHIMAKURTHI Dist. Prakasam</th>
<th>News paper - Date</th>
</tr>
</thead>
</table>
| **Suggestion** | people may suffer due to this project.  
- Drainage facility is not very good along the proposed road and need to improve.  
- Accidents frequently occurred near old police station due to lack of speed breakers.  
- Speed breakers should be provided to reduce the speed of vehicles.  
- Appropriate safety measures needs to taken before the starting & after the completion of the project.  
- By-pass road should be recommended. |                     |
| **Important finding** |  
- There are around 600 HIV cases in the village, 60% of the people living here are non-local.  
- They need more information about HIV. There is no proper guidance about HIV AND STD’s.  
- Only once in 4 month HIV related programmes held in the village.  
- There are many small scale industries around 3 km from the village and this leads to pollution.  
- There are around 56 Granite factories and 50 crushers as well as polish industries for which each consists of 15 to 20 vehicles. |                     |
| **Future course of action.** |  
- There is urgent need of involving some local NGOs in dissemination of HIV/AIDS awareness |                     |
among the people and specifically among the targeted groups like factory workers, truckers, illiterate people.

**STRUCTURED CONSULTATION**

<table>
<thead>
<tr>
<th>Date: 21/07/07</th>
<th>Venue: PODILI District Prakasam</th>
</tr>
</thead>
</table>

**Participants**
- Project Preparation Team: Social, environmental and technical expert of the consultant,
- Stakeholders Village surpanch, important people of the village.
- Female participation

**Issues Discussed**
- Proposal of the project
- Rehabilitation policy of the state.
- Compensation package for the affecting population.
- Relocation of temple in general from road side

**Suggestion**
- Relocation is possible if replacement is done.
- Resettlement and Rehabilitation of the displaced population.
- Cost of land is very high because it is a productive land of lower deltaic flood plain

**Important finding**
- Land acquisition should be minimized
- Direct purchasing of land should be done to avoid litigation
- HIV/AIDS is not considered important because of low level of awareness and people find restricted themselves in discussing HIV/AIDS issue

**Future course of action.**
- There is need of involvement of representatives of the potential affected population in the land acquisition process so that any kind of obstacle can be avoided during the acquisition.

| - Project preparation team: Social and Environmental team members.  
  - Stake holders: Village surpanch, important people of the village. | - Proposal of the project road.  
  - Loss of religious property and its compensation.  
  - Benefits of road widening.  
  - Land acquisition and compensation.  
  - Resettlement and Rehabilitation of the displaced population.  
  - ROW Deficient stretches  
  - Highway related diseases. | - Road existing is very narrow and widening is the best solution  
  - Compensation should be given to affected people at the current market rate.  
  - Speed breakers and divider should be planned.  
  - Widening is the only way for controlling traffic.  
  - Avoid the Water tank, and graveyards coming in the proposed road.  
  - Suggesting for saving the religious structures. |
| **Important finding** | | - No speed breaker observed.  
  - Religious structures should be rebuilt at a proper place.  
  - People are aware of HIV/AIDS and the precaution need to be taken for nipping the epidemic in the bud.  
  - There are many people residing along the road side. |
## Structured Consultation

**Date:** 21/07/07  
**Venue:** JAGGAMPETA  
**Distt.:** East Godavari

### Participants
- **Project preparation team:** Social and Environmental team members.
- **Stake holders:** Village surpanch, important people of the village.
- Female participation.
- MRO, Surpunch, MPTC Members, Elected representatives.
- Press reporters.

### Issues Discussed
- Proposed way of the road.
- Loss of residential, commercial and religious structures.
- ROW Deficient stretches.
  - Land acquisition plan and the compensation to the affecting people.
- Loss of common property resources.
- Resettlement and Rehabilitation of the displaced population.
- Government programs.
- Drinking water facility.
- Drainage, water logging & flooding problem.
- Accident-prone area, dangerous curves and safety issues.

### Suggestion
- Jaggampet is a rural area and people living here are very poor.
- Mosque in the village was built more than 400 years ago, church as well as 5 temples come in this way.
- During the construction of Fly over soil NHA RJYM did test and it was said that it is loose soil and bridge may get down within 15 years.
- This is completely business area; surrounding 40 villages come here for purchasing.
- Drinking water is polluted.
- Major accident occurs near Sitanagaram, 2 km away from Jaggampeta, as there are many sharp curves.
- People were already disturbed during construction of Fly over and High way. Around 200 families left the town at that town.
**Important finding**

- Demanded for bypass.
- If the road is widened then heavy vehicles may pass through village and it may cause traffic as well as pollution problem in the village.
- By-pass road should be recommended.
- There are around 300 HIV cases and people need more information about HIV/AIDS.
- Many structures will be damage.
- Project road is 2km but bypass road is less than 2km.
- Current land price in the village is very high.
- They need more information about HIV.
- There will be loss of temples, mosque, church, market and hospital due to this project.
- People are against the project.
- They are demanding for a by-pass.

**Future course of action**

- HIV/AIDS awareness campaign should be part of social management plan to generate awareness and BCC among general people.

---

**Venue:** SAMARLAKOTA  
**Distt.:** East Godavari

**Participants**

- **Project preparation team:** Social and Environmental team members.
- **Stake holders:** Village surpanch, important people of the village.
- Female participation

**Issues Discussed**

- Proposed way of the road.
- Loss of residential, commercial and religious structures.
- ROW Deficient stretches.
- Land acquisition plan and the compensation to the affecting people.
- Loss of common property resources.
- Resettlement and Rehabilitation of the displaced population.
- Highway related diseases like HIV/AIDS.
- Drinking water facility.
- Drainage, water logging & flooding problem.
- Road accidents and safety issues.
| Date: 21/07/07 | Venue: SAMARLAKOTA  
Distt.: East Godavari |
|----------------|---------------------------------|
| **Suggestion** | - Accident-prone area and dangerous curves.  
- Samarlakota is completely residential area and the roads are very narrow.  
- Lives will be completely disturbed due to this project.  
- 60 feet of road widening would be a better option or else by-pass is recommended.  
- Heavy vehicles pass through the town if the road is widened as it may cause accidents, pollution etc.  
- This is completely business area.  
- Major accidents occur near Matam center.  
- HIV/AIDS cases reported here are more. |
| **Important finding** | - Many structures will be damaged partially.  
- There are many people residing along the road side.  
- Roads are very narrow  
- Current land value in the village is very high.  
- They need more information about HIV. |
| **Future course of action** | - Need regular interaction with the people |
**Structured Consultation**

| Date: 22-06-07 | Venue: Annaram  
Distt: Medak | Photos |
|----------------|----------------|--------|
| **Participants** | - **Project Preparation Team:** Social, Environmental and Technical Experts.  
- Stakeholders, Village head, Representatives, & other Important People of the Village.  
- Women running business along the road also participated in the meeting | |
| **Issue Discussed** | - Proposal of two lane road at Annram.  
- Compensation package for the commercial structures.  
- Issues regarding the water Pipe lines, which are under the existing road.  
- Land acquisition and compensation.  
- Resettlement and rehabilitation.  
- Tree felling and replacement.  
- Village development.  
- HIV/Aids Awareness. | |
| **Suggestion** | - They want speed breakers at regular’s interval.  
- There is no govt. land in this village.  
- They require floodlight, Street Lights & Bus Shelter.  
- They also required speed Breakers & Dividers at School zones.  
- They want only land-to-land in compensation.  
- Need a Auto Stand. | |
| **Important Finding** | - People will get offended if temples/mosque is dismantled.  
- They will oppose dismantling of religious structures.  
- Village has lot of forest which can be converted into productive agricultural land.  
- They are ready to give the land for road widening. | |
| **Future Course of Action** | - HIV/AIDS awareness campaign should be part of social management plan to |
### Date: 22-06-07
**Venue:** Annaram  
**Distt:** Medak

- generate awareness and BCC among general people

---

### Structured Consultation

#### Date: 21-06-07
**Venue:** Gagillapur  
**Distt:** Rangareddy

#### Participants
- **Project Team:** Social, Environmental and Technical Experts.  
- Potential Stakeholder, Village head, Representatives of some political parties & other Important People of the Village.  
- Women also attended the meeting

#### Issue Discussed
- Proposal of two lane roads at Gagillapur  
- Compensation of land, Residential and Commercial structures.  
- Discussion about accidents prone area.  
- Trees would be felled if necessary  
- HIV awareness.

#### Suggestion
- Those who are going to loss their land, the government should give appropriate compensation to them.  
- Cash compensation or alternate business opportunities should be provided  
- Drinking water facilities should be given.  
- Money for the lost property  
- They suggested alternative alignments.

#### Important Finding
- Very few structures are going to affect, as the most of the stretch of the road under proposal, is out side the village.

#### Future Course of Action
- Intensive and continued consultation with other stakeholders  
- Involvement of local engineers for successful implementation
| Date: 20-6-07 | Venue: Gumadidala  
Distt: Medak | News Paper – Date |
|---|---|---|
| **Participants** | • **Project Team:** Social, Environmental and Technical Experts.  
• Stakeholder, Village head and other Representatives, & Important People of the Village. |  |
| **Issue Discussed** | • Proposed two line roads at Gumadidala.  
• Proposal of road widening.  
• Process and proposal of road Widening  
• Process of compensation and time.  
• Land acquisition and compensation.  
• HIV/Aids awareness. |  |
| **Suggestion** | • If road is widened commercial centre will be affected. People fear of losing their livelihood.  
• Affected persons those who are going to loss their land should be given appropriate compensation.  
• Compensation should be in money form.  
• They (People) want compensation before the starting of Construction work. |  |
| **Important Finding** | • The volume of traffic is not so high on this road.  
• People are eager to know as to when the road construction will start.  
• Only limited numbers of structure are along the existing road.  
• Some organizations are also working in the area for spreading awareness about HIV/Aids and Children welfare.  
• Some chemical industries are also running along the road and at the time the implementation of the project utmost care should be taken of the fragile environment. |  |
| **Future Course of Action** | • Need to develop mechanism for fixing of market value of land as there is huge escalation of rates |  |
## Structured Consultation

### Participants
- **Project Team:** Social, Environmental and Technical Experts.
- Stakeholder, Village head, Representatives, & other Important People of the Village.

### Issue Discussed
- Proposed two lane roads at Domadugu.
- Compensation of residential and commercial structures along the road.
- Land acquisition and its compensation.
- HIV/AIDS awareness.
- If road is widened small markets along the road will be affected.
- Try to minimize
- Those who are loosing the land and other assets, government should give compensation to them
- Compensation should be in money form.
- Need Auto stand in the village

### Suggestion
- People are very poor in this village.
- This is the third time govt. is planning for the widening of the existing road.
- Earlier they (people) dismantled their structures that were in the proposed road but did not get any compensation.
- Most of the Residential and commercial structures are away from the proposed road.
- Main problem in road widening as per the saying of people is the location of Air force Academy and due to its location, the proposal of its widening is already postponed two times.

| - People are aware of benefits due to road widening.  

### Structured Consultation

**Date:** 22/07/07  
**Venue:** GANGADHARA NELLURU  
**Dist.:** Chittore

- Accidents occurred frequently in the village.
- They are required drainage system and speed breakers
- Every body welcomes the road widening.
- AIDS awareness programme is needed to spread awareness.

#### Future course of action
Involvement of the locals in the resettlement and rehabilitation of the project affected population.

### Structured Consultation

**Date:** 19/07/07  
**Venue:** BURUGUPUDI  
**Dist.:** Chittore

#### Participants
- Project team members,
- Potential Project affected persons,
- Surpunch and other Elected village representatives,
- Women representatives of the village.

#### Issues Discussed
- Proposed design of the road.
- Loss of residential, commercial and religious.
- Drinking water facility.
- Drainage, water logging & flooding problem.
- Accident-prone area and dangerous curves.

#### Suggestion
- There may be loss of 4 temples, Church, streetlights and water taps.
- High-tension current wires are along the road and need to be shift carefully during utility shifting.
- Irrigation Lake comes under the proposed way.

#### Important finding
- HIV cases are more and they need more information about highway related diseases.
- Some reputed NGOs are required to start the aids awareness programme.

#### Future course of action
HIV/AIDS Campaign is required to start in the project area.

### Structured Consultation

</table>

| within 3 km and daily 600 oil tankers and other vehicles passes through the village. |
| • Aids awareness programme is must in the village. |
| • Road widening is the only way for traffic problem. |
| • Speed breakers should be planned near schools. |
| • Need separate bus stop and signals. |

| Important finding | • There have no objection in shifting the Temple. |
|                  | • Speed breakers are not observed. |
|                  | • Need more information about HIV. |
|                  | • 2 water tanks, ponds, dhobi Ghats, graveyard come under the proposed way. |
|                  | • People welcomed the project. |
|                  | • Temples, water pipelines will be damaged |

| Future course of action | • Before the demolition of community resources alternative sources of drinking water like water tanks etc. must be provided. |
## Structured Consultation

**Date:** 28-06-2007  
**Venue:** Rustapur  
**Distt:** Nalgonda

### Participants
- **Project Team:** Social Expert.
- **Stakeholders:** Potential project affected persons, Village head, Representatives, & other Important People of the Village.
- **Women** also attended the meeting.

### Issue Discussed
- Proposed two-lane road at Rustapur.
- Proposal of road widening.
- Land acquisition and compensation.
- Resettlement and rehabilitation of the displaced population.
- Tree felling and their replacement value.
- HIV/AIDS awareness.

### Suggestion
- They require Speed breakers near school hospital and at the end of the village.
- They want bus stop at the left side of the road.
- Proper safety measures
- Common Property Resources (CPR) should be re-constructed.
- Facilities for public toilets and tube wells should be provided.
- Temples should be re-constructed.
- The Government should spread awareness about HIV/AIDS.

### Important Finding
- They are willing to have a widened road.
- Already existing road is two lane with paved shoulders.
- Already People built their houses away from the required width of the road.
- They are happy with implementation of the project and welcomed it.

### Future Course of Action

---
**Structured Consultation**

| Date: 28-06-2007 | **Venue:** Turkapalli  
|                 | Distt. Nalgonda |
| **Participants** | • Project Team: Social Expert.  
|                 | • Stakeholder, Village head,  
|                 |   Representatives, & other Important  
|                 |   People of the Village. |

| **Issue Discussed** | • Proposed two lane roads at Turkapalli.  
|                     | • Land acquisition and compensation  
|                     |   process.  
|                     | • Resettlement and Rehabilitation policy  
|                     |   of the Government.  
|                     | • Resettlement and rehabilitation of the  
|                     |   displaced population.  
|                     | • Tree felling and replacement value.  
|                     | • HIV/AIDS awareness.  

| **Suggestion** | • Near Rampur the stretch of the road is  
|               |   elevated and due to this accidents  
|               |   frequently occurred here.  
|               | • They want speed breakers at regular  
|               |   intervals to avoid accidents, which are  
|               |   very frequent.  
|               | • Water contains high fluoride levels and  
|               |   they were asking for dispensary for the  
|               |   local so that they can get treatment.  
|               | • Road near Rampur is Kutcha due to this  
|               |   the plying of vehicles almost become  
|               |   difficult in the rainy season.  
|               | • Turkapalli to Yadagiri Gutta road is  
|               |   very narrow.  
|               | • Near Mulkalapalli and Rampur turning  
|               |   accidents occurred frequently.  
|               | • They were asking to hold programmes  
|               |   related with road safety.  

| **Important Finding** | • People face multiple Problems  
|                      | • People are interested the project and  
|                      |   welcomed.  
|                      | • Yadagiri gutta is religious place and in  
|                      |   Saturday and Sunday lot of pilgrims use  
|                      |   to visit the holy place.  
|                      | • In Saturday and Sunday plying of  
|                      |   vehicles on the road increases  
|                      |   immensely, due to this People have to  
|                      |   face traffic jam and sometimes have to  
|                      |   lose their life due to accidents.

• Some NGOs should be involved for spreading aids awareness.  
• Free Condoms distribution at the critical location in the project area. | ![Image](image) |
LEGAL FRAMEWORK FOR LAND ACQUISITION

Proposed land acquisition will be done according to Land Acquisition Act 1894 (Amended up to 68 of 1984). Land Acquisition Act of 1894 illustrates stage wise procedure of land acquisition. These stages are described as section of LA act 1894. The detailed procedure is attached in the Annexure.

According to the Act, where the appropriate Government is satisfied that for a public purpose any land is required, appropriate authority may, by notification in the Official Gazette, declare its intention to acquire such land. Land will be acquired by District Collector on behalf of State Government for which consultant will be preparing the land acquisition plan with the help of field maps of villages. The marked region along with details of area to be acquired shall be verified by Village Agricultural Officers of each village and subsequently be submitted to Andhra Pradesh Road Development Corporation (APRDC). Thus detailed Land Acquisition Plan prepared by the consultant would be sent to respective Project Implementing Unit (PIU). The Project Director (PD) PIU would submit proposal of land to be acquired along with requisite fees to District Collector. The District Collector if satisfied with the cause of Land Acquisition will issue notification under LA Act 1894 Act. The act defines

- Section 4(1) - power to enter in land for survey work;
- Section 5 - Payment for Damages;
- Section 5 A - Hearing of Objections;
- Section 6 - Declaration of Intended Acquisition;
- Section 7 - Collector to take Order for Acquisition;
- Section 8 - Land to be marked out, measured and planned;
- Section 9 - Notice to Person Interested;
- Section 10 - Power to require and enforce the making of
- Section 11 - Enquiry and award by Collector
- Section 12 - Award of Collector when to be final
- Section 16-Power to take possession
- Section 18-Reference to the Court

Land acquisition will follow under LA Act 1894 in Andhra Pradesh R&R Policy 2005. The present document discusses legal and administrative framework for informal dwellers in next section.

Key Terminology used in Land Acquisition Procedure

Market Value

The Land Acquisition Act of 1894 (u/s 23) stipulates that while determining compensation the market value prevailing on the date of preliminary notification (u/s 4/1) should be taken into consideration. However the act or rule neither define market value nor specify the mechanism to fix the same.

Solatium

1 Whenever it appears to the appropriate government that land in any locality is needed or is likely to be needed for any public purposes a notification to that effect shall be published in local newspaper at least one in local language of the region) which empowers project proponent to enter in land for survey and other project related works.
2 Any person interested in any land which has been notified under section 4, (1) within thirty days from the date of publication of the notification object to the acquisition of land in writing to District Collector.
3 When the appropriate Government is satisfied that any land is needed for public purposes, a declaration shall be made to that effect under the signature of secretary to such Government or of some officer duly authorized to certify its orders.
4 The Collector shall then cause public notice to be given at convenient places on or near the land to be acquired. Such notice shall state the particulars of the land so needed and require service all entitled persons.
5 The Collector if satisfied with the LA proceedings under said act; may declare award, which shall cover true area of land, compensation amount and other provisions of the act.
6 When the Collector has made award under section 11, he may take possession of the land, which shall thereupon vest absolutely with the government free from all encumbrances.
7 Section 18 to section 28 deals with intervention of court in land acquisition processes.
Acquisition of land by the state is compulsory in nature. Such acquisition may be even under compulsion. The law therefore provides mandatory solatium. The percentage of solatium from September 1984 (LA amendment Act) is 30% of the value of properties.

Additional market value

There is a time gap between the notification of LA and actual possession of the properties. If time gap between valuation of properties done and taking actual possession is substantial; it would cause a great loss to owner. The law therefore, provides for an additional market value at the rate of 12 percent per annum of the market value from the date of notification till the award or taking possession whichever is earlier.

Interest

In case of delay, the law provides for the payment of interest on the compensation. For the first 12 months, the interest at the rate of 12 percent is payable from the date of declaration of award. For delays more than 12 months interest rate would be 15 percent.

Methods of Calculating Compensation

As per Land Acquisition Act 1894 there is no fixed method of calculating compensation at market value. Within the framework of law it is understood that market value is the price that a willing purchaser would pay to a willing seller for a property-giving due regard to its existing condition. In the resettlement plan, to calculate market value following procedure has been suggested.

Steps for Valuation of Land and Properties:

The replacement value of the land is calculated as per procedure approved by DCAC. The following methods may be suggested:

1. **Average Stamp Registration Rate for Past Five Years**
2. **Circle Rates**
3. **Crop Productivity Rate**

**Average Stamp Registration Rate**

The land rate based on the sale deed of the plots is collected from the office of the registrar. Also the stamp registration for each project affected villages would be collected. Based on these, an average rate of sale of land would be worked out.

**Circle Rates**

The Circle rates both for agricultural and non-agricultural land to work out the market value (in market) of land as per Circle Rate Method would be collected from the office of registrar for all project-affected villages.

**Unit Replacement Cost of Land By Crop Productivity Rate:**

To find out the market value (in market) of land by crop productivity method, the following data would be used

Report on Socio-Economic Review of Andhra Pradesh

Taluka-wise production of different crops for last five years.

The standard production and yield of crops (kg per hectare).

To arrive at the yield/productivity of land, the productivity for last five years on the crop production would be collected from various RI/Tahsils. Data related to type of land was collected from various talukas and the data related to crops grown on each parcel of land was collected from the Panchayat office. The productivity rates have been derived from the information collected regarding the types of crops. The data so collected would be used for calculating three sets of productivity rate per square meter for highly productive land, medium productive land and low productive land, depending on type of land such as irrigated, partly irrigated or un-irrigated land.

The average market rate of different crops has been collected from the Agriculture Production Market Committee (APMC). The actual productivity value of crops in reference periods would be calculated by multiplying actual crop produced and the average market price. Accordingly, the average productivity value would be derived by taking the average costs of all crops over a period of last five years as under:

- The market value (in market) of land would be calculated as 20 times the average productivity in Rupee per hectare.
- Determination of compensation by the SLAO through DCAC.
The SLAO through DCAC has decided the value of land based on the prevailing practice of the Govt. of Andhra Pradesh. They have considered either Registry or Circle rate whichever is higher.

**Land Acquisition by Negotiation (Consent Award)**

Land may also be acquired by mutual negotiation between landholders and NHAI and following procedure would be adopted:

- Consent by No Objection sheet in writing is taken from the owner of the properties i.e. (4.a) Notification without objection.
- Consolidated proposal is sent to District Magistrate DCAC.
- Collector constitutes DCAC (as per rules prescribed in The Andhra Pradesh R&R Policy 2005) for such negotiation involving administrative officers such as RDO, SLAO, APRDC officers and people representatives.
- Representatives of PAPs, member of VLC to fix up the rates.
- After detailed discussion with DCAC, RPDAC and project authorities, the Collector fixes and approves the rate.
- Thereafter a sale deed would be registered for such transaction between owner of the land and APRDC.

**Valuation of Structures**

For the assessment of structures, the Schedule of Rate (SOR) maintained by district office of Andhra Pradesh Road Development Corporation (APRDC) was collected. The SOR of respective Districts was the basis for valuation of structure under acquisition, which was duly verified by the R & B department on the instruction of the SLAO through DCAC.

**Compensation Payment**

As noted above, the compensations / entitlements due to the PAPs will amount to the market prices of the affected properties. Given that the existing law (LA Act 1894 in conformity with procedure laid down in The Andhra Pradesh R&R Policy) will be used to legalize the acquisitions. A part of this compensation will be assessed and paid to the title holding PAPs by the District Collector (as chairperson of DCAC- responsible for land acquisitions). If this payment, 'compensation-under-law', is lower than the market price, the project office will directly pay the difference (top-up) to make up the shortfall. The compensations / entitlements due to all other PAPs, such as squatters, business employees, and the like (who are not recognized as affected persons by the law) will also be directly paid by project office as per entitlement matrix.

Where a person loses land or other assets in more than one village (land administration unit), the person will be counted once, and his / her top-up will be paid together. The amount of top-up due to a PAP will be determined by comparing the total amount of compensation paid by the DC for all acquired lands and other assets in all mouzas with the total replacement costs / market prices thereof.

---

8 Government in Revenue Department may constitute a District Compensation Advisory Committee (DCAC) under the chairmanship of the Collector to determine negotiated price. Adequate representation will be given to women and indigenous communities (wherever applicable) in the committee. If any dispute arises on recommendation of the DCAC, the matter will be referred to the State level Compensation Advisory Committee (SCAC) chaired by the Member-Board of Revenue whose decisions shall be final and binding on all concerned. The composition of this state level Compensation Advisory Committee will be notified by the Government (The Andhra Pradesh R&R Policy 2005, section 15).

9 Methodologies to determine market price is mentioned above.
THE ANDHRA PRADESH LAND ACQUISITION (NEGOTIATIONS COMMITTEE) RULES, 1992

APPENDIX -- 14

6. (i) The interested persons may also file petitions in such form for the settlement of the claims before the Negotiation Committee for settlement of compensation or for sharing in the compensation.

(ii) In respect of the cases pending in any Court including High Court/Bhupender Court or Executive Court the persons interested shall withdraw the cases pending in the Court before action is initiated by the Negotiation Committee.

(iii) On receipt of such application for settlement of compensation, the Convener of the Negotiation Committee shall take further action in accordance with the provision contained in Rule 8. After obtaining the permission of the regulation department further action for negotiations and for final settlement shall be taken.

(iv) In case any interested person or representative interested in such application the notice in Form 1 shall be sent to him by post or in a letter addressed to him at his last known residential address or place of business and registered under Section 20 and 29 of the Indian Post Office Act, 1898 in the year 1898.

(v) Negotiations for settlement shall commence only when all interested persons or representatives interested in such application by a notification give a statement expressing willingness for settlement by Negotiation Committee.

7. Every person required to make or deliver a statement under these rules shall be deemed to be legally bound to do so within the meaning of Section 176 and 178 of the Indian Penal Code (Act 45 of 1860).

8. The Collector shall also serve a notice to Form 2 to the regulation department to make a statement that it is willing for settlement of compensation and interest thereon and the statement is to be filed by the Collector with the Department of Regulation and Time and the department of the same in the form given.

9. (a) The statements filed under rules 5, 6, 7 & 8 along with all connected records of award enquiry, Premises Value statements and other relevant papers etc. duly verified by the Land Acquisition Officer shall be placed before the Negotiation Committee for its consideration.

(b) The members of the Committee shall go into the evidence in the presence of the Collector and shall be submitted to the Collector for his consideration.

Annexure - 5.1

APPENDIX - 14

THE A.P. LAND ACQUISITION MANUAL (App. 14)
Annexure - 5.1

Clause 23:

1. After Form III is approved, the Land Acquisition Officer shall obtain an advance from the concerned interested person on the same day in Form IV.

2. Although the Negotiations Committee will have the notes, and other particulars concerning the lands, it will however discharge middlemen as advocates in the negotiations to ensure that the interests of the solicitors are satisfied. The committee may appoint an outsider to the committee to look after the interests of the solicitors.

3. When the settlement is handed over, the Land Acquisition Officer after preparing a summary of all the materials contained in the Land Acquisition Officer's office shall prepare a summary report for the benefit of the Land Acquisition Officer and the landowners as per the Land Acquisition Act, 1984 and the report will be submitted to the Land Acquisition Committee as per the report submitted in Form III.

4. The settlement as approved by the Negotiations Committee, shall not be more than 25% in lieu of the total land for the purpose of compensation as per the report submitted in Form III.

5. The increase from 15% to 20% shall be deemed upon appeal of each case.

6. Any increase beyond 20% shall be referred to the Land Acquisition Officer to the Competent Authority in which the amount may be sanctioned by the Government by circular.

7. The quantum of compensation as arrived at by the Negotiations Committee shall not be paid until the settlement report is submitted by the Negotiations Committee to the Competent Authority. The report shall contain the compensation details for the lands as per the Land Acquisition Act and the Settlements Ordinance. The report shall be submitted to the Competent Authority in accordance with the Land Acquisition Act, 1984 and shall be considered as the final report for the purpose of compensation.

8. If there is delay in paying the amount after settlement or in paying the amount as provided under Section 34 of the Land Acquisition Act shall be paid from the due date.

9. If the settlement is approved the Land Acquisition Officer shall enter further in accordance with the procedure of Land Acquisition Act.

FORM -- V
(See Rule 6(v) and 8)

To
The District collector & Chairman,
District Level Negotiation Committee.

Sir,

It is hereby informed that a notification under Section 4(1) of L.A.,
Act 1894 was duly published at pages................. of Part I of A.P. Gazette
Dated.................... for acquiring the land in Sy. No................ measuring an
extent of Acres................ Village in................ Mandal
of.................... District to wit for..................

It is requested that the above lands may be acquired by passing
consent award under Section 11(2) of the Land Acquisition Act, as the lands
are urgently required by the Requisitioning Department or Authority for
grounding or implementing the project of scheme expeditiously.

Requisitioning Dept. of Authority

FORM -- VI
(See Rule 11)

To
The District/Chairman,
District Level Negotiation Committee,

Sir,

The negotiations at the District Level for fixation of market value in
respect of acquisition of lands to an extent of Acres............... covered by Sy.
No................. Village of................ Mandal in................
................. District have failed. Keeping in view the need for execution
and completion of the project or works as per schedule to avoid escalation
of costs and keeping in view the importance of completing the projects to
avail the grant or loan or aid in time, it is necessary to complete the
acquisition of lands at an early date.

It is, therefore, requested to refer the matter to the State Level
Negotiation Committee for further negotiations and fixation of compensation
in respect of the above lands for passing consent award under Section 11(2)
read with second proviso to sub-section (2) of Section 31 of the Land
Acquisition Act as the lands are urgently required by the Requisitioning
Department or Authority for grounding or implementation of the project or
scheme expeditiously.

Requisitioning Department/Authority.
APPENDIX - 60

A.P. LAND ACQUISITION (STATE LEVEL NEGOTIATION COMMITTEE) RULES, 1968 — CONSTITUTION OF STATE LEVEL NEGOTIATION COMMITTEE FOR PAYMENT OF COMPENSATION AND TOTAL BENEFITS

[GO. Ms No. 423, Revenue (6-2), dated 14th June, 1968 Published in A.P. Gazette, Part II, dated 18-6-1968]

In exercise of the powers conferred by sub-section (1) of Section 33 of the Land Acquisition Act, 1894 (1 of 1894) as subsequently amended, the Governor of Andhra Pradesh hereby makes the following rules for the constitution of the Audit Committee established under sub-section (2) of Section 33 of the said Act. An earlier draft of the following Rules

1. Short title and extent. — (1) These rules may be called the Andhra Pradesh Land Acquisition (State Level Negotiation Committee) Rules, 1968.

(2) They shall come into force on the date of their publication in the Official Gazette.

2. In the rule “Committee” means the State Level Negotiation Committee constituted under this rule.

3. (1) The Committee shall be known for payment of compensation and total benefits payable under the Act through negotiations as the State Level Negotiation Committee.

(2) The composition of the State Level Negotiation Committee shall be as follows:

(a) Chairman—Chairman, State Level Land Acquisition Office.

(b) Secretary—Secretary to the Government, Revenue.

(c) Joint Secretary to the Government, Revenue.

(d) Joint Secretary to the Government, Finance.

(e) Principal Secretary to Government, Secretaries to the Government of the Local Government, Transport, Supplies and Industries.

(f) Representative of the prescribed Rehabilitation Department/Rehabilitation Appraisal Agencies.

(g) Managing Director, Andhra Pradesh Industrial Corporation Limited.

(h) Secretary, State Level Land Acquisition Office.

The members of the Committee shall be appointed by the Government.

4. The Committee shall consist of not less than three and not more than five members.

5. The Chairman shall preside over the meetings of the Committee and in his absence, any other member may be elected to preside over a meeting of the Committee.

6. The proceedings of the Committee shall be governed by the provisions of the Land Acquisition Act, 1894 (1 of 1894) as amended by the Land Acquisition (Amendment) Act, 1967 (21 of 1967).

7. The quorum necessary for the constitution of the Committee shall be the presence of not less than three members.

8. The meetings shall be held in the office of the State Level Land Acquisition Office and shall be recorded in the Minute Book of the Committee.

9. The records and minutes of the meetings of the Committee shall be maintained in the office of the State Level Land Acquisition Office.

10. The Committee shall have power to direct the State Level Land Acquisition Office to make such amendments to the terms and conditions of the compensation and total benefits payable under the Act through negotiations as the State Level Negotiation Committee shall consider necessary.

11. The Committee shall have power to direct the State Level Land Acquisition Office to make such further amendments to the terms and conditions of the compensation and total benefits payable under the Act through negotiations as the State Level Negotiation Committee shall consider necessary.

12. The Committee shall have power to make such recommendations to the State Government as it may deem fit in the interest of justice to the persons affected by the acquisition of land.
IMPLEMENTATION MECHANISM

Introduction
Successful implementation of the RAP requires adequate personnel and resources, and appropriate, close and timely coordination among all players and stakeholders within the project. This would include not only the NGOs, but also all the line agencies including the local administration. Thus, it is proposed to carry out the implementation of the RAP by an NGO.

Objectives
The broad objectives of this project are to:
1. Formulate Information, Education and Communication material and carrying out awareness in relation to the RAP and for the PAPs in this stretch.
2. Ensure appropriate and timely disbursement of entitlements as per the RAP and the Resettlement and Rehabilitation Policy OSRP.
3. Carry out training programmes for the PAPs in relation to their income restoration
4. Assist the PAPs during grievance redress, relocation and rehabilitation
5. Assist the Project Implementation Unit (PIU) in ensuring social responsibilities such as compliance with labour laws, prohibition of child labour in the civil works of the project
6. Facilitate updating land revenue records in the context of the project

Tasks
Based on the objectives of the assignment, the scope of work and the responsibilities, consultants have drawn up the following tasks towards successful implementation of RAP.

Task 1: Collection of Secondary Information
- RAP document and related annexure
- List of PAPs prepared by DPR consultants
- Filled-in socio-economic survey formats
- Photographs of structures likely to be affected (if submitted by DPR consultants)
- Videocassettes/CDs of the entire stretch (cross-reference document in a digital form)
- Videocassettes/CDs of consultation meetings with PAPs by DPR consultants
- Strip plan containing ROW/CO1 data, chainage, etc.

Task 2: Preliminary Verification Survey and Rapport Building
Under this task, the NGO will carry out the following activities:
- Familiarisation with the area and rapport building with the PAPs including identification of opinion leaders
- Preliminary verification and updating of the list of PAPs and structures likely to be affected
- Information dissemination on entitlement framework and distribution of the same in vernacular language
- Demarcation of chainage at 50 m interval and two consecutive edges of the corridor of impact joined by a straight line.

Task 3: Detailed Verification Survey
Verification of baseline data generated by DPR consultants is the most important task to be undertaken by the implementing agency. This also involves correcting and updating the available data wherever required. It will include recording changes in PAP/PAF numbers and updating affected properties and assets. This will be carried out by following the steps mentioned below:
- Modifications, if required, in the socio-economic survey questionnaire in order to make sure that all the required information is collected
- Preparation of discussion guidelines/checklist for detailed survey
- Training of survey staff by key professionals of the implementing agency and pre-testing of the questionnaire
• Advance (one or two days) information to the PAPs about the date and time of the visit by the team for the detailed survey
• Conducting a detailed verification survey as per the following steps:
  1. Engineering team to measure and mark the affected structures
  2. Verification and updating of socio-economic data by the social team
  3. Photographing of the PAPs with the structure and its number clearly visible in the background with his name written on the wall of the structure, if possible, or with the name of the PAPs and the number of his structure written with a chalk on a black slate, held in the front of his chest
  4. Collection of documents establishing the identity of the PAP, verifying the correctness of her/his name, her/his presence on the site on or before the cut-off date and whether she/he belongs to vulnerable group. These documents could include:
    • Ration Card
    • Voter’s Identity Card
    • Electricity/Telephone/Water Bill
    • Bank Account
    • BPL Card
    • SC/ST Certificate
  5. In case no documents are available for the purpose, a certificate from Sarpancha / opinion leader/village elder will be procured or else verification in a mass meeting of community members
  6. Concerned PAP and a witness will be requested to sign the updated socio-economic data in each case
• Repeating the detailed verification survey, if required, to make sure that there are no left outs

STEPS TO BE FOLLOWED FOR MEASUREMENT OF AFFECTED STRUCTURE
• Review COI / ROW data
• In case COI is not marked on the ground, plotting will be carried out at 50 m interval and joining the plotted pillars by straight line
• Identify structures coming within COI
• Measure the distance of each affected structure from the centreline of existing alignment (perpendicular and parallel distance to the road) ensuring that every protruding section of the structure is measured so as to understand the exact design of the affected structure
• Measure the entire structure including length, breadth and height of the structure. At the same time measure the area affected (i.e., portion of the structure coming within COI) to calculate the degree of loss
• Examine the construction typology of each structure with respect to walls, roof and floor. Note down number of rooms, verandah (if any), sanitation facility, kitchen, etc.

EXPECTED OUTPUT OF THE TASK
The expected output of the task will be:
1. Revised inventory of PAPs, CPRs and other movable and immovable assets
2. Updated data on the socio-economic characteristics of PAPs
3. Finalisation of PAPs’ list
4. Information dissemination about the project
5. Informed choice among PAPs
The list of PAPs thus finalised will be displayed in prominent public places.

Task 4: Valuation of Structures and Other Assets
During the verification exercise, the implementing agency will also undertake the task of valuation of affected structures. The NGO will hire the services of government-approved valuer to carry out this task. The objective of this task is to establish the extent of loss and estimation of replacement cost.

The major tasks are as follows:
1. Measurement of each affected structure and other immovable assets
2. Establishing construction typology
3. Establishing extent of loss
4. Estimation of replacement cost

The first two tasks run parallel with verification activity as discussed in task 3. Other works will include collection of Basic Schedule of Rates (BSR). BSR provides the consolidated unit rates for permanent, semi-permanent and temporary construction. Details as to how such consolidated unit rates have been arrived are also explained in the BSR. Using the analysis as a guide, the civil engineer will arrive at the compensation value of a structure. BSR will also provide rates for hand pumps, dug wells, tube wells, etc., including installation charges.

Establishing Extent of Loss

Extent of loss would be determined primarily in terms of the portion of the structure getting affected. In order to establish the extent of loss, the following steps will be undertaken:

- Collect information on total area of the structure/land to be affected (as described in task 3)
- Collect information on distance of structure/land from the existing central line (as described in task 3)
- Plot the structure/land on strip map with existing road and proposed design
- The area within Corridor of Impact shall be considered as affected portion

Calculate the degree of loss in categories shown below:
- Less than 10% of the total area
- Between 10 to 25% of the total area
- Between 25 to 50% of the total area
- More than 50% of the total area

Estimation of Replacement Cost

The replacement cost will be worked out based on the construction material used and the extent of loss as registered during the verification survey. For arriving at the replacement cost, the steps followed will be:

- Procurement of Basic Schedule of Rates (BSR) of the APRDC division the road is passing through (the implementing agency will ensure that the latest revision is included in the BSR)
- Calculate the total area of the affected structure
- Confirm the unit for rate analysis provided in BSR, e.g., sq ft or sqm, etc. Convert the measurement data of the structures collected during verification as per the unit followed in BSR
- Calculate the replacement cost by multiplying the total units of structure as measured with the rate provided in BSR as per different categories of construction types

As BSR is usually revised annually, it is more likely to be closer to the replacement value. Hence, it could be a good basis for estimating replacement costs.

EXPECTED OUTPUT OF THE TASK

The expected output of this task is given below:

- Extent of loss of affected structures
- Replacement value of affected structures

Once the replacement value is worked out, its summary will be reported in the following format, whereas details of each individual structure would appear in the micro plan:

<table>
<thead>
<tr>
<th>Construction Typology</th>
<th>Total number of such structures</th>
<th>Total Area in sq. m</th>
<th>Extent of loss in sq. m.</th>
<th>Replacement Value arrived at per sq. m.</th>
<th>Total Cost</th>
</tr>

Task 5: Preparation of Micro Plan

Micro plan is the base document for the entire implementation process. Entitlement, compensation, etc., are finalised on the basis of micro plans. However, it is a live document and may require and undergo certain changes as implementation progresses. The base for preparing micro plan is the verification exercise. Before preparing the micro plan, the team will be briefed on the policy and entitlement framework; definitions of BPL family; vulnerable family; Economic Rehabilitation Grant; Transitional Allowance; Sustenance Allowance; Shifting Allowance; Replacement Value; etc. The preparation of micro plan will include the following steps:

Once the micro plan is prepared and self verified by the NGO, it will be submitted to the local Package unit. The NGO, after preparing the micro plan, will arrange for a public disclosure for transparency.

Contents of Micro Plan

A tentative content of the micro plan is given below. Summary indicating financial implications under different R&R assistances and compensation will also be included in the micro plan.

(a) Identification
(b) Socio-demographic information
(c) Economic information
(d) Entitlement (compensation and assistances)

Identification section will include:
(a) Schedule/Questionnaire no. (canvassed among the PAPs)
(b) Location of the structure and its number (e.g., for village Dahi, the code will be 'D'. If the structure is the first one getting affected and is on the north of the road, the code would be D1N. Similarly the one on the south would be D1S.
(c) Chainage (This is very important as this the only common indicator between the micro plan and Strip Map.)
(d) Name of the district, block and village
(e) Distance of the structure from existing & total areas and areas within COI

Socio-demographic information will include:
(a) Name of the head of the household and other family members
(b) Relation of other family members with the head
(c) Age, sex, marital status, literacy level, caste configuration of every individual

Economic information will include:
(a) Occupation practices
(b) Income and expenditure
(c) Usual activity
(d) Any skill possessed
(e) Ownership details such as ration card; name in voter’s list; whether owner of the structure or tenant or shareholder, etc.

Entitlement section will include:
(a) Loss (of structure or land etc.)
(b) Category such as residential, commercial, etc., and extent of loss
(c) Entitlement as per loss and category (in line with the entitlement framework)
(d) Compensation as assessed by the engineer
(e) Replacement value as productive asset grant (difference between the compensation and market value)
(f) Whether vulnerable or not – as this finalises the entitlements

The annexes of the micro plan will include:

(i) Methodology followed for arriving at the replacement value (prototype drawing and valuation process will also be annexed)
(ii) Justification of entitlement proposed (give reference to clauses of entitlement framework)
(iii) Tentative list of trades in which PAPs will be trained and amount required thereof

Task 6: Preparation and Issue of ID Cards

Once the micro plans are prepared and approved by the respective authorities, identity cards carrying the identification of the affected persons, loss and entitlements will be prepared and distributed to the concerned PAPs. An identity card not only identifies the person as project affected, but also carries certain vital information, such as:

(a) Type and extent of loss
(b) Compensation and other assistance s/he is entitled to

For preparation and distribution of ID cards, the following will be the steps:

1) Holding preliminary group meetings for sharing of the importance and relevance of ID cards with PAPs and for raising awareness about the whole exercise
2) Taking still photographs of PAPs (concurrent activity with verification exercise as explained in task 3)
3) Preparation of ID card format
4) Approval of the draft ID card format by APRDC
5) Preparation of ID cards by filling up all the required information as per the approved format including pasting of photographs. ID cards will be prepared not only for the PAPs available, but also for those who have moved out on their own
6) Ensuring signatures of PAP, NGO representative & PACKAGE MANAGER on the card
7) Lamination of ID cards – as lamination will make it tamper proof
8) Consultation with individual PAPs to inform them about the importance of ID cards and its contents in detail
9) Issuance of ID cards in the presence of witnesses. Date of distribution will be fixed and PAPs will be pre-informed about the date of distribution of ID cards

EXPECTED OUTPUT OF THE TASK

The expected outputs of these tasks are:

- Micro plan finalised
- Final list of PAPs
- Final entitlement(s) of each PAP
- Final figure of expense on entitlements
- ID Cards prepared and distributed to PAPs

Task 7: Disbursement of Compensation and other Assisances

Disbursement of Compensation

Since disbursement of compensation is primarily a responsibility of the revenue department, we envisage a limited role, including the following facilitation tasks:

- To give prior information to PAPs about the date of disbursement of compensation
- To ensure that PAPs carry with them their ID cards on the appointed date
- To be present at the time of disbursement to assist the competent authority in the disbursement process
- To identify and confirm the actual titleholder at the time of disbursement, since the NGO is in constant touch with the PAPs
To ensure that every titleholder losing immovable asset is compensated and has received the compensation cheque

**Disbursement of Assistance**

The NGO in consultation with PACKAGE MANAGER and the representatives of PAPs will develop suitable mechanism for disbursement of assistances. However,

- Assistance to titleholder PAPs to be paid along with compensation and instalment of assistance as mentioned above
- Assistance to non-titleholders (informal dwellers) to be paid as one-time grant disbursable to local bank through joint account, in a public meeting in the presence of PACKAGE MANAGER, people's representatives, PAPs' representatives and NGO representative. Photographs of PACKAGE MANAGER, NGO representative and PAPs at the time of handing over the cheques is a pre requisite of the above activity
- Assistance for livelihood restoration to be given as training assistance in the form of tool kit, training modules for skill upgradation by trainers and coordination with local NGOs and other institutions like SEWA, DWCRA, etc.

**General Tasks of the Implementing NGO**

The implementing NGO will facilitate the process of disbursement of assistances, as per the entitlements worked out and available in micro plans prepared. The general tasks of the NGO in this regard will include:

- It will determine and document the entitlement of each of the PAPs / PAFs on the basis of entitlement framework and in consultation with PACKAGE MANAGER.
- The NGO will assist the project authorities in ensuring a smooth transition (during the part or full relocation of PAPs / PAFs), helping the PAPs to take salvaged materials and shift with proper nomenclatures. In close consultation with the PAPs, the NGO will inform the PACKAGE MANAGER about the shifting dates agreed with the PAPs in writing and the arrangements desired by the PAPs with respect to their entitlements.
- It will assist the PAPs in opening bank accounts, explaining the implications, rules and obligations of a joint account, and how s/he can access the resources s/he is entitled to.
- The NGO will ensure proper utilisation of the R&R budget available. The NGO will ensure that the PAPs have found economic investment options and are able to restore their lost economic status against the loss of land and other productive assets. The NGO will identify means and advise the PACKAGE MANAGER to disburse the entitlements to the eligible persons/families in a manner that is transparent, and will report to the APRDC on the level of transparency achieved in the project.

**Specific Tasks of the Implementing NGO**

The specific tasks of the implementing NGO regarding disbursement of assistances as envisaged are:

- Preparing disbursement plan in a phased manner: Phasing will be on the basis of category such as kiosks, squatters, encroachers and titleholders; or it can also be on the basis of location such as contiguous settlements. Phasing can also be on the basis of priority stretches. Final decision on this will be taken in close consultation with PACKAGE MANAGER.
- Drawing up phase-wise list of PAPs to be assisted, following preparation of disbursement plan.
- Making a formal request to PACKAGE MANAGER for the release of required funds.
- Opening of bank accounts: Past experience shows that PACKAGE MANAGER and NGO face a lot of problems while opening joint accounts in the name of all the PAPs, NGOs and PACKAGE MANAGER. Such accounts also have operational problems. To simplify the procedure, the following steps are suggested:
  - Open a joint account (preferably in the branch of the bank where RBL has its main account) in the name of PACKAGE MANAGER and implementing NGO
  - Transfer the amount indicated in the approved micro plan to the joint account of PACKAGE MANAGER and NGO
  - Open separate accounts for all eligible PAPs in the same branch (PACKAGE MANAGER and/or NGO will introduce the PAP. The bank may be requested to accept the ID card issued by APRDC as document for introduction).
  - Transfer amount (stage-wise) from the joint account of PACKAGE MANAGER and NGO to the individual accounts of PAPs
  - However, if the amount to be disbursed is less than Rs. 2000, the NGO feels there is no necessity to open a joint account. For disbursement of shifting allowance, no joint account will be opened.
For opening of bank accounts, the NGO will:

- Make copies of the photographs taken during verification. The expense of making copies of photographs shall be borne by APRDC.
- Inform PAPs in advance of the date for opening of joint accounts (at least a week before).
- Arrange for a vehicle for ferrying PAPs to the Bank on the pre-fixed date. The expense incurred towards hiring a vehicle will be borne by RBL.
- Accompany the selected group to the Bank. The NGO will fill up the requisite forms, paste the photographs, take the signature/thumb impression of the PAPs on the forms and submit the same to the bank.
- Preparing cheques for disbursement: After opening of bank accounts, the NGO will prepare the cheques for disbursement, which will be signed by PACKAGE MANAGER and NGO's authorised representative. It is possible that all the PAPs may not be available for opening of joint accounts at one time. NGO will ensure that issue date of cheques prepared for disbursement is not prior to that of opening of joint accounts.
- Organising a joint meeting of PACKAGE MANAGER and bank officials: After preparation of cheques, the NGO will call a joint meeting of the PACKAGE MANAGER and bank officials to fix up a date for disbursement.
- Distributing the cheques and getting them deposited in bank: The NGO will ensure the distribution of cheques to the concerned PAPs as per the pre-fixed venue and time. Another related function will be to get the cheques deposited in concerned banks. For account payee cheques (amounting to more that Rs.2000), the PAP need not go to the bank for deposit of cheque. The following needs to be ensured:
  - In case of account payee cheques
    - The deposit slip will be given to the PAP after keeping a copy of the same with the NGO and PACKAGE MANAGER.
    - The NGO will maintain a register with names of PAPs to whom cheques have been disbursed, along with the cheque number and date of issue. The photocopy of the deposit slip will be pasted on the same register.
    - While giving the deposit slip to the PAP, the NGO will take the signature/thumb impression of the PAP on the photocopy.
  - In case of bearer cheques
    - For bearer cheques, the NGO will inform PAPs about the date of disbursement in advance (at least a week before).
    - The NGO will arrange for a vehicle to take the PAPs to the bank. The expense towards hiring of vehicle will be borne by APRDC.
    - The NGO will take signatures/thumb impressions of the PAP on the photocopy of the bearer cheque. The NGO will also ensure that the PAP carries the ID card distributed earlier at the time of receiving the bearer cheque and produces the same at the time of disbursement.
    - As mentioned above, for bearer cheques too, the NGO will maintain a register carrying names of PAPs to whom cheques have been disbursed along with cheque number and date of issue. The register will have the photocopy of the cheque.

Task 8: Community Participation and Consultation

The effectiveness of RAP implementation is directly related to the degree of involvement of those affected by the project. This is also an essential requirement of the resettlement process, if it has to be responsive to the needs of the affected population. Their involvement vastly increases the probability of their successful resettlement. It also serves as a 'tool for managing two-way communication between the project sponsor and the public. Its goal is to improve decision making and build understanding by actively involving individuals, groups and organisation with a stake in the project. This involvement will increase a project's long-term viability and enhance its benefits to locally affected people and other stakeholders.  

Community participation and consultation is not an isolated event or activity. It is a continuous process and an approach that needs to inform all the activities to be undertaken for the implementation of the Resettlement Plan. The Team: Before carrying out any consultation, the team will be briefed on the issues to be discussed. The agenda for the consultation will be prepared in advance.

---

1 International Finance Corporation, 'Doing better business through effective public consultation and disclosure: A good practice manual'
The consultation team will consist of a minimum of three staff members (Facilitator acting as Team Leader, Observer and Reporter). The facilitator will lead the team and pose questions/issues to the PAPs. The observer will keep an eye on the participants and ensure that all assembled participate in the discussion. The reporter will note down the proceedings. The proceedings will be noted verbatim.

**Types of Consultation**

The types of consultation with the communities of affected people inter alia will include the following:

1. **Information**: It is a one-way consultation where the PAP is a passive listener. The Society will inform the PAP about the project, or date of next consultation, etc. This consultation will take place during preliminary verification and rapport-building stage.

2. **Interaction**: A two-way process where ideas and views are actively shared. This consultation will also take place during the rapport-building stage, where not only the project will be discussed, but also various other problems of the PAP which may not have any connection with the project.

3. **Decision making**: Another two-way interaction, where PAPs' views will be sought for certain issues like relocation of PAPs and/or CPR, finalisation of sites, etc.

The last two will be carried out on a continual basis.

**Consultations will be carried out at various stages as follows:**

- Rapport building with the PAPs is the first activity and requires consultation. This will be carried out at the time of verification survey.
- One-to-one consultations will also be carried out while updating baseline socio-economic information.
- Shifting of non-title holders. This issue may require several rounds of consultations.
- Identification and finalisation of site for relocation of CPRs and PAPs, market place, etc.
- Relocation of PAPs, CPRs, etc.
- Awareness generation for control of highway-related diseases, trafficking of women and children, control of child labour and road safety.
- For arriving at a replacement value of a structure or land.
- Identification of PAPs eligible for training and assessment of training needs.
- Identification and finalisation of trades for training.
- Identification of master trainer and assessment of trainer.
- Formation of self-help groups or CBOs or formation of any other groups for economic rehabilitation.
- It is desirable that representatives from the project authority be present at the time of consultations.

**Tentative Checklist**

1. Consultation is a continuous process and not always a planned one. At times, the situation demands consultation that has to be carried out on the spot. However, for a planned consultation, PAPs will be pre-informed at least a day before.

2. Decision taken during consultations should be followed up and final decision be made public.

3. Ensure that staff involved in consultation is well acquainted with the language and culture of the PAPs and has adequate experience in interactive planning methods.

4. Facilitator will prompt and guide the group, but never get involved in decision-making process. Asking too many unrelated questions may drift the group from the decided agenda.

5. It is always better to start the discussion with village problems and gradually shift to project-related issues. The facilitator should try to address the problems being faced by the community and should have a positive helping approach.

**Process**

- Semi-structured guidelines in accordance with the agenda will be prepared beforehand.
- Consultation team will ensure that separate consultations are held for male and female groups, commercial and residential affected persons, etc.
- Facilitator will ensure that not more than 12-15 members form a group at one point of time.
- Observer will ensure that all participants sign the attendance sheet and that the sheet is attached with the proceedings.
Task 9: Institutional Mechanisms for Grievance Redress

The NGO has an important role to play in redress of grievances, as a link between the PAPs and the project authorities. To facilitate redress of grievances, the NGO proposes to carry out the following tasks:

- Public consultation for information dissemination regarding functions and importance of GRC
- Assessment of PAPs' grievances on a continuous basis
- Accompanying and representing the EPs at the Grievance Committee Meetings
- Documentation of all cases referred to GRC and maintenance of related records
- Public Consultation regarding functions and importance of GRC

The NGO will hold public consultation meetings with the PAPs to disseminate information regarding the composition, functions and importance of Grievance Redress Committee and how to approach it in case of need.

Assessment of PAPs' Grievances

The NGO will continuously monitor the grievances of PAPs through informal interactions during their visits to the project villages.

Accompanying and representing the EPs at the GRC Meetings

In order to effectively represent the EPs, the NGO will:

- Nominate a suitable person (from the proposed staff) to be a member of the GRC
- Make the PAPs aware of the Grievance Redress Committees (GRCs)
- Train the PAPs on the procedure to file a grievance application and to confirm that a statement of claim from the concerned PAP accompanies each grievance application
- Help the PAPs in filling up the grievance application and also in clearing their doubts about the procedure as well as the context of the GRC award
- Record the grievance and bring the same to the notice of the GRCs within 7 (seven) days of receipt of the grievance from the PAPs
- Submit a draft resolution with respect to the particular grievance of the PAP, suggesting multiple solutions, if possible, and deliberate on the same in the GRC meeting through the NGO representative in the GRC
- Accompany the PAPs to the GRC meeting on the decided date, help the PAP to express his/her grievance in a formal manner, if requested by the GRC, and inform the PAPs of the decisions taken by the GRC within a stipulated period (say in three days) of receiving a decision from the GRC

Documentation and maintenance of related records

The Society will maintain the related records of the proceedings of the grievance redress committee and document all cases referred to it.

Task 10: Land Acquisition

The Society envisages a very limited role in the entire land acquisition process, as most activities are the responsibility of the competent authority. The task of the NGO in the acquisition process is one of facilitation. The various tasks related to this activity are envisaged as follows:

1. Preparation of land acquisition plan
2. Socio-economic survey of titleholders (THs)
3. Preparation of micro plans
4. Preparation and distribution of ID cards
5. Calculation of replacement value of land
6. Public consultation and disclosure

Preparation of Land Acquisition Plan

The steps to be followed for preparation of LA plan are:
• Collection of revenue maps of affected area
• Plotting of road section on the revenue map
• Identification of affected plots
• Identification of khatadars (plot owners) from the records of Rights at Tahasil Level
• Verification of revenue records followed by on-the-spot verification related to identified plots and owners to be carried out by The Society. For proper and effective verification, the NGO proposes to hire the services of retired revenue officials (Amen), having requisite experience and expertise.

Socio-economic Survey of Titleholders (THs)
• The steps to be followed include:
  • Preparation of structured schedule
  • Pre-testing of the same and modification/finalisation
  • Recruitment and briefing of investigators/field enumerators
  • Random field checking by field supervisor on sample basis to ensure error free data
  • Collation and computerisation of data
  • Updating of socio-economic tables and analysis provided in RP
  • Preparation of micro plans: As per task 5
  • Preparation and distribution of ID cards: As per task 6

Calculation of Replacement Value

Replacement Value, the following three different methodologies are proposed. The methodology will be finalised in consultation with.

**Methodology # 1**

Sample required number of villages; in each village, sample required number of land owners (in all categories viz., marginal, small and large. Within these three categories, select sub-samples of irrigated and un-irrigated land).

Canvass structured schedule on inputs of agriculture supplemented by in-depth interview with landowners.

Fix unit for the study such as bigha or acre or hectare and study cropping pattern.

The methodology proposes three stages as follows:

Stage I
Collect input and output data for each major crop. Input data will include cost towards irrigation, labour, pesticides, fertilizer and seeds. Output will be the produce of a particular crop in quintal per unit multiplied by market rate of the produce per quintal and by total extent of the land.

Stage II
If output is Y and input is X, then Y - X = Z (surplus)

Stage III
Replacement Value = Z \times 20 (no. of years)\(^1\)

For example, cost of wheat production per ha is Rs.1000 and the same quantity of wheat is sold in the market for Rs.1200, i.e., at a profit of Rs.200. In this case, Y (output) = 1200 and X (input) = 1000 and therefore Z (surplus) = 200. The replacement value thus calculated would be:

Replacement value per ha = 1200-1000 = 200 \times 20 = 4000, where 20 is the number of years. Hence, replacement value for one ha of land where wheat was grown will be Rs.4000.

Checklist
- In-depth interview with the landowner will be recorded.
- In input data, opportunity cost of the land will also be added.
- For market rate of the produce, minimum support price (MSP) of the current year will be considered.

**Methodology # 2**

\(^1\) Generally in projects, which entail land acquisition, a period of 20 years is taken into account for the purpose of calculating replacement value through productivity method.
This methodology is also based on productivity method as # 1, but instead of primary data, secondary data collected from District Statistical Handbook (DSHB) can be used. From DSHB, data for the last five years under following heads can be culled out:

- Total area as well as total cultivated area
- Produce per hectare
- Rate of the produce per quintal

The data under produce per hectare will be divided by rate and multiplied by 20 (no. of years) to arrive at the replacement value.

Checklist

- Weighted average of produce for the last five years will be considered.
- This method will also be supported by local consultations regarding produce per hectare, minimum support price, input cost, etc. Consultation will help in comparing secondary and primary data.

Methodology # 3

This methodology considers Sales Deed Method for arriving at the replacement value. The methodology considers highest and lowest rates transacted during the last five years and the weighted average is calculated to arrive at the replacement value.

Public Consultation and Disclosure

The NGO will conduct public consultation in the villages/settlement where land needs to be acquired, for the following issues:

- To inform plot owners losing land
- For distribution of ID cards
- For disbursement of compensation
- To inform PAPs about their entitlements
- To explain the concept of replacement value and methodology to be followed to arrive at the replacement value

The steps to be followed are:

- Pre-inform the PAPs about the day and agenda of the consultation
- Keep the agenda ready
- Prepare minutes of the meeting
- Note down name and take signature of each participant and attach the sheet along with the minutes of the meeting
- Ensure that group is not of more than 15 participants
- This public disclosure meeting will also be conducted after finalisation of entitlements and replacement value.

Expected Output of the task

- Establishing extent of land to be acquired
- Establishing type of land to be acquired
- Calculation of compensation value of land
- Calculation of replacement value of land

Task 11: Resettlement Sites and Relocation

Relocation is invariably a painful process for displaced people and needs to be handled with utmost care and sensitivity, so as to minimise its adverse impact on them. Relocation involves three major tasks:

- Identification and development of resettlement sites
- Relocation of PAPs
- Relocation of CPRs

Role of NGO is of critical importance not only in the identification and development of resettlement sites, but also in the relocation of PAPs and CPRs, due to their intimate interaction with the affected communities.

- Identification and development of Resettlement Sites
Steps for identification of land for relocation of PAPs and/or CPRs are as follows:

Identification of DPs

1. The NGO will prepare village-wise list of displaced persons and CPRs to be relocated.
2. Based on the list and entitlement framework, The NGO will work out the total quantum of land required. Referring to the entitlement framework is important as the quantum of land to be given varies for residentially and commercially displaced persons.

Consultations with PAPs/ DPs

1. The NGO will initiate the process of consultation (one or more) with the PAPs on the issue of site for relocation.
2. During these consultations, The NGO will try to find out whether the group/community already has any specific site(s) in mind. If not, the NGO will list out community's/group's preferences.

Site selection

1. In case the group has already identified a potential site, The NGO will visit the site along with representatives of the community for assessing the adequacy and suitability of the site. The NGO will also collect information regarding its title and availability from local revenue department. In case the identified land is government/community land, the NGO will obtain 'No Objection Certificate' from the concerned revenue officer.
2. For identification of sites for relocation of CPRs, The Society will take into confidence not only the PAPs, but other interested parties as well, such as priest of the affected temple, committee members of the temple, people staying in that village but not affected, people using a particular hand pump but not affected, etc. The reason being, people staying away from the road also use CPRs.

In case PAPs do not have an identified site, The Society will carry out the following activities:

3. Collect information on government community land available in the vicinity of project road, from the office of Circle Officer/Circle Inspector.
4. Prepare a consolidated village-wise list of government and community land. For relocation of DPs, NGO will ensure that PAPs are relocated along with their peers so as to maintain the existing social fabric.
5. Based on this clubbing, estimate the quantum of land required at a particular resettlement site.
6. Collect information regarding title of the land and its availability for the purpose of resettlement. This information will be collected from sources like revenue/land records department, urban or rural local bodies, etc.
7. To verify the list by visiting all those sites and also to confirm that plots are free from encroachment and other encumbrances.
8. To examine all plots from the point of view of its adequacy and suitability.
9. To make arrangement to bring the representatives of PAPs for finalisation of plot.
10. To ensure that identified site is not far away from the affected site.
11. For relocation of common property resources (CPRs) such as temple, hand pump, village gates, wells, etc., The NGO will try to motivate PAPs to donate private land. As far as possible, no government/community land will be used for relocation of CPRs, especially for religious and cultural structures. In case private land is not available, The NGO will follow the process mentioned under point 6 for identification of government/community land.
12. To make arrangement for site visit by PAPs for approval, The NGO Society will also hold consultation sessions with PAPs for their approval. This may require a series ofconsultations on various sites. Once approval of PAPs is sought, NGO will help approach Circle Officer for obtaining No Objection Certificate (NOC) for the use of the land for the purpose of resettlement.

Site Development

13. After obtaining NOC, The Society will hand over the site to package manager for development and other construction activities as required. Before handing over the site to the contractor for development, NGO will conduct group discussion with PAPs for various requirements that need to be provided in resettlement sites.
14. In case the site identified is close to an existing village or part of an existing village, NGO will take the host population in confidence. NGO will conduct group discussion and if possible one-to-one discussion (if the settlement is small) explaining them the reason behind shifting of PAPs.
15. The NGO will conduct need assessment survey among the host population in order to assess the pressure on existing infrastructure due to influx of PAPs. In case additional infrastructure such as drinking water facility, roads, street lights, drainage, additional rooms and teachers in school, health centre, etc., is required, it will be listed and handed over to package Manager so that the same can be provided before shifting of PAPs.

Relocation of PAPs
Once the resettlement site is ready in all respects, the NGO will initiate the process of relocation of PAPs and CPRs. The specific steps to be undertaken by NGO are:

Ensuring Access to Information
- To give prior information to PAPs about the likely date of relocation. Notice will be given at least a month before so as to enable them to prepare for shifting to their new residence/place of business. Shifting should preferably be done in a phased manner.
- To prepare the list containing the following information:
  - Name of the DP and other dependants
  - Name of the resettlement site where DP and his dependants will be relocated
  - Date of relocation
  - Whether the DP has received all compensation and other R&R assistances as per entitlement framework

Preparing for Relocation
- Prior to physical relocation of PAPs, to ensure that the PAP has received all her/his compensation and R&R assistances s/he is eligible for
- In case a group of PAPs (residential or commercial) are to be resettled at a particular site, the NGO will distribute/allot the plot/house/commercial units to individual PAPs. The allotment can be done through lottery or any other method as decided unanimously between NGO and concerned group of PAPs in consultation with PACKAGE MANAGER.

Shifting and Monitoring
- On the pre-fixed day, the NGO will arrange vehicles for shifting the PAPs and their belongings. Every care should be taken to ensure that no damage is caused to their belongings during shifting. The cost towards hiring of vehicles will be borne by the PAPs.
- After shifting the PAPs to their new location, NGO will monitor them on a regular basis. If any conflict arises between the relocated PAPs and the host community, the NGO will immediately bring it to the notice of PACKAGE MANAGER to sort out the problem amicably.

Relocation of CPRs
Relocation of CPRs includes temples, village gates, hand pump, well, etc. The specific steps proposed in this regard are:
- To discuss with PAPs and other interested parties, such as priests and members of the temple committee, to finalise the date for shifting, rituals to be followed, etc.
- To conduct consultation to arrive at a unanimous decision by the community. For smooth relocation process, it is proposed to form Village Level Committee (VLC) comprising village elders, school teacher, panchayat members and other influential persons in the village. VLC members will be identified during group discussion with the villagers.
- To ensure that the community adheres to the date fixed for shifting of deity.
- On the day of shifting, The NGO will mobilise the community, facilitate in performing the rituals and ensure that deity is shifted as per discussion with the community.

Expected Output Of The Task
- Resettlement sites identified and finalised by community
- Displaced families relocated
- Affected CPRs relocated in consultation with community
- Enhanced CPRs
- Existing CPRs expanded to cope with the pressure/requirement of additional influx of PAPs
- Additional facilities created for host community

![Diagram of Activity Flow](image-url)
**Task 12: Income Restoration Activities**

Development projects may have an adverse impact on the income of project-affected persons. They also have a negative impact on the socio-cultural systems of affected communities. The basic postulate of all developmental activities has to be that no one is worse off than before the project. Restoration of pre-project levels of income is an important part of rehabilitating socio-economic and cultural systems in affected communities.

To achieve this goal, preparation of IR programmes under Rehabilitation Action Plan should proceed exactly as it would have for any other economic development programme. IR schemes should be designed in consultation with the affected persons and should be explicitly approved by them. Income restoration activities would require both short-term and long-term planning. Specifically, the tasks to be undertaken for income restoration of PAPs are as follows:

- Identification of target groups
- Identification of IR activities
- Training
- Training Need Assessment (TNA)
- Identification of trainers/training agencies
- Arrangement of training
- Monitoring of PAPs engaged in new vocations

**Steps**

The steps to be followed under each sub-task are:

**Identification of Target Groups**
- To ensure that persons affected, both directly and indirectly, have been covered. (Indirectly affected persons will include helps in roadside eateries or petrol pumps, or a person who used to transport PAPs' goods from one place to other and earn a living out of that, etc.)
- To conduct focus group discussion (FGD) in the affected settlements/villages for identification of indirectly affected persons, as it is difficult to identify such people merely through a quantitative survey
- To canvass pre-tested structured schedule for collection of socio-economic information

**Identification of IR Activities**
- To prepare a list of possible and feasible income restoration options
- To identify government schemes and programmes, which can be dovetailed with the options suggested by the PAPs
- To conduct in-depth interviews with concerned DRDA officials and manager of Lead Bank of the area to identify various economic activities (source of funding and forward and backward linkages) that could be carried out in the project area
- To analyse the data as collected by DPR consultant during RP preparation. This analysis could provide the number of PAPs against each trade or option proposed
- To organise consultation meetings with PAPs to elicit their views and preferences regarding IR options
- While identifying IR options, the following factors shall also be considered:
  - Education level of PAPs
  - Skill possession
  - Likely economic activities in the post-displacement period
  - Extent of land left
  - Suitability of economic activity to supplement the income
  - Market potential and marketing facilities
- To match the options given by PAPs with their socio-economic characteristics, as per the data already collected during socio-economic survey
- Based on matching exercise, to prepare draft list of trades for IR options
- To work out the input cost and monthly income that will accrue out of the individual trade, market potential, etc.
To ensure that trades/activities selected have low initial cost and require low technology that matches with the resources available in the area

To approach PAPs with draft list of trades for one-to-one consultation to finalize the trade

To explain the reasons, expected income, input cost, skills required to run the venture and other modalities regarding proposed trades. This would help the PAPs to make an informed decision on selection of trades.

Training

One of the strategies for economic sustenance of the PAPs is to help them improve their productive capability by imparting new skills/upgrading skills through training. Past experience of implementing RAP shows that generally PAPs are either dependent on agriculture or have low skill endowment. Hence, training becomes an important component of IR. For PAPs who intend to diversify their economic activity, suitable income restoration schemes will be identified on individual or group basis and training needs will be assessed accordingly. Besides training in scheme-specific skills, general entrepreneurship development will also form part of the training programme, mainly to improve the management capabilities of EP.

Skill Mapping and Training Need Assessment

To conduct skill mapping among the PAPs after finalisation of trades

For skill mapping, quantitative survey with pre-tested structure will be used

To match the skill possessed and options preferred. If the option preferred does not match with the skill possessed, The NGO will provide required training to the concerned PAP.

Management and Staffing

The training would be coordinated by the Team Leader along with the key professionals A & C. The support professionals would provide on site relevant training inputs. However, for specialised training needs additional professionals from training institutions would be associated.

Identification of Trainers/Training Institutes

To identify master trainer and/or training institute for different trades/activities

For selection of trainers, inter alia, following officials will be consulted; since these departments also provide training under various government schemes, consultation with these agencies will help identify and finalise trainers:

- PD, DRDA
- GM, DIC and KVIC
- Representatives of various departments such as agriculture, minor irrigation, animal husbandry, etc.
- District Dairy Development Board
- Manager, Lead Bank
- Apart from these officials, depending on the trades, private entrepreneurs, government departments, local NGOs, etc., will also be consulted.
- Efforts will be made to identify trainers/training institutes that can provide on-the-job training so that the trainees not only enhance their skill, but also earn while receiving the training.

Training Arrangement

To form different groups of PAPs as per trades selected

To finalise in consultation with PACKAGE MANAGER the date for training, venue, arrangement of vehicle for ferrying PAPs to training venue, training material required, etc.

To inform PAPs at least a week in advance about the date of training

To ferry PAPs to the venue and drop them back on the day of training. If PAPs are staying far away from the venue, NGO will arrange for their stay.
CONTRACT CLAUSE IN BID DOCUMENTS

7. Staff and Labour

7.1 Engagement of Staff and Labour

Except as otherwise stated in the Specification, the Contractor shall make arrangements for the engagement of all staff and labour, local or otherwise, and for their payment, feeding, transport, and, when appropriate, housing.

The Contractor is encouraged, to the extent practicable and reasonable, to employ staff and labor with appropriate qualifications and experience from sources within the Country.

7.2 Rates of Wages and Conditions of Labour

The Contractor shall pay rates of wages, and observe conditions of labour, which are not lower than those established for the trade or industry where the work is carried out. If no established rates or conditions are applicable, the Contractor shall pay rates of wages and observe conditions which are not lower than the general level of wages and conditions observed locally by employers whose trade or industry is similar to that of the Contractor.

The Contractor shall inform the Contractor's Personnel about their liability to pay personal income taxes in the Country in respect of such of their salaries, wages, allowances and any benefits as are subject to tax under the Laws of the Country for the time being in force, and the Contractor shall perform such duties in regard to such deductions thereof as may be imposed on him by such Laws.

7.3 Persons in the Service of Employer

The Contractor shall not recruit, or attempt to recruit, staff and labour from amongst the Employer's Personnel.

7.4 Labour Laws

The Contractor shall comply with all the relevant labour Laws applicable to the Contractor's Personnel, including Laws relating to their employment, health, safety, welfare, immigration and emigration, and shall allow them all their legal rights.

The Contractor shall require his employees to obey all applicable Laws, including those concerning safety at work.

7.5 Working Hours

No work shall be carried out on the Site on locally recognised days of rest, or outside the normal working hours stated in the Contract Data, unless:

(a) otherwise stated in the Contract,
(b) the Engineer gives consent, or
(c) the work is unavoidable, or necessary for the protection of life or property or for the safety of the Works, in which case the Contractor shall immediately advise the Engineer.

7.6 Facilities for Staff and Labour

Except as otherwise stated in the Specification, the Contractor shall provide and maintain all necessary accommodation and welfare facilities for the Contractor's Personnel. The Contractor shall also provide facilities for the Employer's Personnel as stated in the Specification.

The Contractor shall not permit any of the Contractor's Personnel to maintain any temporary or permanent living quarters within the structures forming part of the Permanent Works.
7.7 Health and Safety

The Contractor shall at all times take all reasonable precautions to maintain the health and safety of the Contractor's Personnel. In collaboration with local health authorities, the Contractor shall ensure that medical staff, first aid facilities, sick bay and ambulance service are available at all times at the Site and at any accommodation for Contractor's and Employer's Personnel, and that suitable arrangements are made for all necessary welfare and hygiene requirements and for the prevention of epidemics.

The Contractor shall appoint an accident prevention officer at the Site, responsible for maintaining safety and protection against accidents. This person shall be qualified for this responsibility, and shall have the authority to issue instructions and take protective measures to prevent accidents. Throughout the execution of the Works, the Contractor shall provide whatever is required by this person to exercise this responsibility and authority.

The Contractor shall send, to the Engineer, details of any accident as soon as practicable after its occurrence. The Contractor shall maintain records and make reports concerning health, safety and welfare of persons, and damage to property, as the Engineer may reasonably require.

HIV-AIDS Prevention. The Contractor shall conduct an HIV-AIDS awareness programme via an approved service provider, and shall undertake such other measures as are specified in this Contract to reduce the risk of the transfer of the HIV virus between and among the Contractor's Personnel and the local community, to promote early diagnosis and to assist affected individuals.

The Contractor shall throughout the contract (including the Defects Notification Period): (i) conduct Information, Education and Consultation Communication (IEC) campaigns, at least every other month, addressed to all the Site staff and labor (including all the Contractor's employees, all Sub-Contractors and Consultants' employees, and all truck drivers and crew making deliveries to Site for construction activities) and to the immediate local communities, concerning the risks, dangers and impact, and appropriate avoidance behavior with respect to Sexually Transmitted Diseases (STD)—or Sexually Transmitted Infections (STI) in general and HIV/AIDS in particular; (ii) provide male or female condoms for all Site staff and labor as appropriate; and (iii) provide for STI and HIV/AIDS screening, diagnosis, counseling and referral to a dedicated national STI and HIV/AIDS program, (unless otherwise agreed) of all Site staff and labor.

The Contractor shall include in the program to be submitted for the execution of the Works under Sub-clause 7.3 [Programme] an alleviation program for Site staff and labour and their families in respect of Sexually Transmitted Infections (STI) and Sexually Transmitted Diseases (STD) including HIV/AIDS. The STI, STD and HIV/AIDS alleviation program shall indicate when, how and at what cost the Contractor plans to satisfy the requirements of this Sub-Clause and the related specification. For each component, the program shall detail the resources to be provided or utilized and any related sub-contracting proposed. The program shall also include provision of a detailed cost estimate with supporting documentation. Payment to the Contractor for preparation and implementation this program shall not exceed the Provisional Sum dedicated for this purpose.

7.8 Contractor's Superintendence

Throughout the execution of the Works, and as long thereafter as is necessary to fulfil the Contractor's obligations, the Contractor shall provide
all necessary superintendence to plan, arrange, direct, manage, inspect and test the work.

Superintendence shall be given by a sufficient number of persons having adequate knowledge of the language for communications (defined in Sub-Clause 1.4 [Law and Language]) and of the operations to be carried out (including the methods and techniques required, the hazards likely to be encountered and methods of preventing accidents), for the satisfactory and safe execution of the Works.

7.9 Contractor’s Personnel

The Contractor’s Personnel shall be appropriately qualified, skilled and experienced in their respective trades or occupations. The Engineer may require the Contractor to remove (or cause to be removed) any person employed on the Site or Works, including the Contractor’s Representative if applicable, who:

(a) persists in any misconduct or lack of care,

(b) carries out duties incompetently or negligently,

(c) fails to conform with any provisions of the Contract, or

(d) persists in any conduct which is prejudicial to safety, health, or the protection of the environment.

If appropriate, the Contractor shall then appoint (or cause to be appointed) a suitable replacement person.

7.10 Records of Contractor’s Personnel and Equipment

The Contractor shall submit, to the Engineer, details showing the number of each class of Contractor’s Personnel and of each type of Contractor’s Equipment on the Site. Details shall be submitted each calendar month, in a form approved by the Engineer, until the Contractor has completed all work which is known to be outstanding at the completion date stated in the Taking-Over Certificate for the Works.

7.11 Disorderly Conduct

The Contractor shall at all times take all reasonable precautions to prevent any unlawful, riotous or disorderly conduct by or amongst the Contractor’s Personnel, and to preserve peace and protection of persons and property on and near the Site.

7.12 Foreign Personnel

The Contractor may bring in to the Country any foreign personnel who are necessary for the execution of the Works to the extent allowed by the applicable Laws. The Contractor shall ensure that these personnel are provided with the required residence visas and work permits. The Employer will, if requested by the Contractor, use his best endeavours in a timely and expeditious manner to assist the Contractor in obtaining any local, state, national, or government permission required for bringing in the Contractor’s personnel.

The Contractor shall be responsible for the return of these personnel to the place where they were recruited or to their domicile. In the event of the death in the Country of any of these personnel or members of their families, the Contractor shall similarly be responsible for making the appropriate arrangements for their return or burial.

7.13 Supply of Foodstuffs

The Contractor shall arrange for the provision of a sufficient supply of suitable food as may be stated in the Specification at reasonable prices for
the Contractor's Personnel for the purposes of or in connection with the Contract.

7.14 Supply of Water

The Contractor shall, having regard to local conditions, provide on the Site an adequate supply of drinking and other water for the use of the Contractor's Personnel.

7.15 Measures against Insect and Pest Nuisance

The Contractor shall at all times take the necessary precautions to protect the Contractor's Personnel employed on the Site from insect and pest nuisance, and to reduce their danger to health. The Contractor shall comply with all the regulations of the local health authorities, including use of appropriate insecticide.

7.16 Alcoholic Liquor or Drugs

The Contractor shall not, otherwise than in accordance with the Laws of the Country, import, sell, give barter or otherwise dispose of any alcoholic liquor or drugs, or permit or allow importation, sale, gift barter or disposal thereto by Contractor's Personnel.

7.17 Arms and Ammunition

The Contractor shall not give, barter, or otherwise dispose of, to any person, any arms or ammunition of any kind, or allow Contractor's Personnel to do so.

7.18 Festivals and Religious Customs

The Contractor shall respect the Country's recognized festivals, days of rest and religious or other customs.

7.19 Funeral Arrangements

The Contractor shall be responsible, to the extent required by local regulations, for making any funeral arrangements for any of his local employees who may die while engaged upon the Works.

7.20 Prohibition of Forced or Compulsory Labour

The contractor shall not employ "forced or compulsory labour" in any form. "Forced or compulsory labour" consists of all work or service, not voluntarily performed, that is extracted from an individual under threat of force or penalty.

7.21 Prohibition of Harmful Child Labour

The Contractor shall not employ any child to perform any work that is economically exploitative, or is likely to be hazardous to, or to interfere with, the child's education, or to be harmful to the child's health or physical, mental, spiritual, moral, or social development.

7.22 Employment Records of Workers

The Contractor shall keep complete and accurate records of the employment of labour at the Site. The records shall include the names, ages, genders, hours worked and wages paid to all workers. These records shall be summarized on a monthly basis and submitted to the Engineer, and these records shall be available for inspection by Auditors during normal working hours. These records shall be included in the details to be submitted by the Contractor under Sub-Clause 7.10 [Records of Contractor's Personnel and Equipment].

7. Staff and Labour
Substitute the words 'the Country' at the end of 2nd paragraph of sub-
Clause 6.1 with ‘India’

Add the following after the 2nd paragraph in Sub-Clause 7.4

The Contractor and his Sub-contractors shall abide at all times by all
existing labour enactments and rules made there under, regulations,
notifications and bye laws of State or Central Government or local
authority and any other labour law (including rules), regulations, bye laws
that may be passed or notification that may be issued under any labour
law in future either by the State or the Central Government or the local
authority.

The Contractor shall keep the Employer indemnified in case any action is
taken against the Employer by the competent authority on account of
contravention of any of the provisions of any Act or rules made there
under, regulations or notifications including amendments. If the
Employer is caused to pay or reimburse, such amounts as may be
necessary to cause or observe, or for non-observance of the provisions
stipulated in the notifications / bye-laws / acts / rules / regulations
including amendments, if any, on the part of the Contractor, the
Employer shall also have right to recover from the Contractor any sum
required or estimated to be required for making good the loss or damage
suffered by the Employer.

Salient features of some major Labour Laws applicable to establishments
engaged in Construction of Civil Works are given in Annexure A-I for
reference purposes only.

The contractor and sub contractor shall comply with the safety and
welfare provisions as detailed in Annexure A-II.

The lists provided in Annexure A-I & A-II are indicative only. The
Contractor is expected to be acquainted with all the latest applicable
Laws, including those concerning safety at work.
Salient features of some major Labour Laws applicable to establishments engaged in Construction of Civil Works

(i) Workmen Compensation Act, 1923
The Act provides for compensation in case of injury by accident arising out of and during the course of employment.

(ii) Payment of Gratuity Act, 1972
Gratuity is payable to an employee under the Act on satisfaction of certain conditions on separation if an employee has completed 5 years service or more or on death at the rate of 15 days wages for every completed year of service. The Act is applicable to all establishments employing 10 or more employees.

(iii) Employees’ PF and Miscellaneous Provisions Act, 1952
The Act provides for monthly contributions by the employer plus workers @10 % or 8.33 %. The benefits payable under the Act are:
(a) Pension or family pension on retirement or death as the case may be.
(b) Deposit linked insurance on the death in harness of the worker.
(c) Payment of PF accumulation on retirement/death etc.

(iv) Maternity Benefit Act, 1951
The Act provides for leave and some other benefits to women employees in case of confinement or miscarriage etc.

(v) Contract Labour (Regulation and Abolition) Act, 1970
The Act provides for certain welfare measures to be provided by the Contractor to contract labour and in case the Contractor fails to provide, the same are required to be provided by the Principal Employer by Law. The principal employer is required to take Certificate of Registration and the Contractor is required to take a Licence from the designated Officer. The Act is applicable to the establishments or Contractor of principal employer if they employ 20 or more contract labour.

(vi) Minimum Wages Act, 1948
The employer is supposed to pay not less than the Minimum Wages fixed by appropriate Government as per provisions of the Act if the employment is a scheduled employment. Construction of Buildings, Roads, and Runways are scheduled employment.

(vii) Payment of Wages Act, 1936
It lays down as to by what date the wages are to be paid, when it will be paid and what deductions can be made from the wages of the workers.

(viii) Equal Remuneration Act, 1979
The Act provides for payment of equal wages for work of equal nature to Male and Female workers and not for making discrimination against Female employees in the matters of transfers, training and promotions etc.

(ix) Payment of Bonus Act, 1965
The Act is applicable to all establishments employing 20 or more workmen. The Act provides for payments of annual bonus subject to a minimum of 8.33 % of wages and maximum of 20 % of wages to employees drawing Rs. 3,500/- per month or less. The bonus to be paid to employees getting Rs. 2,500/- per month or above up to Rs.3, 500/- per month shall be worked out by taking wages as Rs.2, 500/- per month only. The Act does not apply to certain establishments. The newly set up establishments are exempted for five years in
certain circumstances. Some of the State Governments have reduced the employment size from 20 to 10 for
the purpose of applicability of the Act.

(x) Industrial Disputes Act, 1947
The Act lays down the machinery and procedure for resolution of industrial disputes, in what situations a
strike or lock-out becomes illegal and what are the requirements for laying off or retrenching the employees
or closing down the establishment.

(xi) Industrial Employment (Standing Orders) Act, 1946
It is applicable to all establishments employing 100 or more workmen (employment size reduced by some of
the States and Central Government to 50). The Act provides for laying down rules governing the conditions
of employment by the employer on matters provided in the Act and get the same certified by the designated
Authority.

(xii) Trade Unions Act, 1926
The Act lays down the procedure for registration of trade unions of workmen and employees. The trade
unions registered under the Act have been given certain immunities from civil and criminal liabilities.

(xiii) Child Labour (Prohibition and Regulation) Act, 1986
The Act prohibits employment of children below 14 years of age in certain occupations and processes and
provides for regulation of employment of children in all other occupations and processes. Employment of
child labour is prohibited in Building and Construction Industry.

(xiv) Inter-State Migrant Workmen’s (Regulation of Employment and Conditions of Service) Act, 1979
The Act is applicable to an establishment, which employs 5 or more inter-state migrant workmen through an
intermediary (who has recruited workmen in one state for employment in the establishment situated in
another state). The inter-state migrant workmen, in an establishment to which this Act becomes applicable,
are required to be provided certain facilities such as housing, medical aid, travelling expenses from home
upto the establishment and back, etc

(xv) The Building and Other Construction Workers (Regulation of Employment and Conditions of Service)
Act, 1996 and the Cess Act of 1996
All the establishments who carry on any building or other construction work and employs 10 or more
workers are covered under this Act. All such establishments are required to pay Cess at rate not exceeding
2% of the cost of construction as may be notified by the Government. The employer of the establishment is
required to provide safety measures at the Building or Construction work and other welfare measures, such
as Canteens, First-aid facilities, Ambulance, Housing accommodation for Workers near the workplace etc.
The employer to whom the Act applies has to obtain a registration certificate from the Registering Officer
appointed by the Government.

(xvi) The Factories Act, 1948
The Act lays down the procedure for approval of plans before setting up a factory, health and safety
provisions, welfare provisions, working hours, annual earned leave and rendering information regarding
accidents or dangerous occurrences to designated authorities. It is applicable to premises employing 10
persons or more with aid of power or 20 or more persons without the aid of power engaged in
manufacturing process.
Annexure - 7.1

Safety & Welfare Provisions for labour to be employed by the Contractor

All necessary personal safety equipment as considered adequate by the Engineer shall be available for use of persons employed on the Site and maintained in a condition suitable for immediate use; and the Contractor shall take adequate steps to ensure proper use of such equipment by those concerned.

1. Safety Provisions:

The Contractor shall comply with all the precautions as required for the safety of the workmen.

(i) All workmen at site shall be provided with safety helmets and yellow/orange jackets. Workmen required on site during night hours shall be provided with fluorescent yellow jackets with reflective lopes.

(ii) Workers employed on mixing asphaltic materials, cement, lime mortars, concrete etc. shall be provided with protective footwear, protective goggles.

(iii) Those engaged in handling any material, which is injurious to the eyes, shall be provided with protective goggles.

(iv) Those engaged in welding works shall be provided with welder’s protective eye-shield.

(v) Stone breakers shall be provided with protective goggles and protective clothing and seated at sufficiently safe intervals.

(vi) Suitable scaffolds shall be provided for workmen for all work that cannot safely be done from the ground, or from solid construction except for such short period work as can be done safely from ladders. When a ladder is used, an extra labourer shall be engaged for holding the ladder and if the ladder is used for carrying materials as well, suitable foot-holds and hand-holds shall be provided on the ladder, which shall be given an inclination not steeper than 1/4 to 1.

(vii) Scaffolding or staging more than 3.25 metres above the ground or floor, swung or suspended from an overhead support or erected with stationary support, shall have a guard rail properly attached, bolted, braced and otherwise secured at least 1 metre high above the floor or platform of such scaffolding or staging and extending along the entire length of the outside and ends thereof with only such openings as may be necessary for the delivery of materials. Such scaffolding or staging shall be so fastened as to prevent it from swaying from the support or structure.

(viii) Working platforms, gangways, and stairways shall be so constructed that they do not sag unduly or unequally, and if the height of any platform or gangway or stairway is more than 3.25 metres above ground level or floor level, it shall have closely spaced boards, have adequate width and be suitably provided with guard rails as described in (ii) above.

(ix) Every opening in the floor of a structure or in a working platform shall be provided with suitable means to prevent fall of persons or materials by providing suitable fencing or railing with a minimum height of one metre.

(x) Safe means of access and egress shall be provided to all working platforms and other working places. Every ladder shall be securely fixed. No portable single ladder shall be over 9 metres in length. The width between side rails in a rung ladder shall in no case be less than 30 cm for ladders up to and including 3 metres in length. For longer ladders the width shall be increased at least 6 mm for each additional 30 cm of length. Spacing of steps shall be uniform and shall not exceed 30 cm.

(xi) Adequate precautions shall be taken to prevent danger from electrical equipment. No materials on any of the sites shall be so stacked or placed as to cause danger or inconvenience to any person or the public. The Contractor shall provide all necessary fencing and lights to protect the public from accidents and shall be bound to bear the expenses of defending every suit, action or other proceedings at law that may be brought by any person for injury sustained owing to neglect of the above precautions and to pay any damages and costs which may be awarded in any such suit, action or proceedings to any such person or which may with the consent of the Contractor be paid to compromise any claim by any such person.
(xii) Excavation and Trenching: All trenches, 1.5 metres or more in depth, shall at all times be supplied with at least one ladder for each 20 metres in length or fraction thereof. Ladders shall be extended from the bottom of the trench to at least 1 metre above the surface of the ground. The sides of a trench, which is 1.5 metres or more in depth shall be stepped back to provide a suitable slope, or be securely held by timber bracing so as to avoid the danger of side collapse. Excavated material shall not be placed within 1.5 metres of the edge of any trench or half the depth of the trench, whichever is more. Excavation shall be made from the top to the bottom. Under no circumstances shall undermining or undercutting be done.

(xiii) When workers are employed in sewers and manholes, which are in use, the Contractor shall ensure that manhole covers are open and manholes are ventilated at least for an hour before workers are allowed to go into them. Manholes so open shall be cordoned off with suitable railing and provide warning signals or boards to prevent accidents to the public.

(xiv) Demolition: Before any demolition work is commenced and also during the process of the work:

a) All roads and open areas adjacent to the site shall either be closed or suitably protected.

b) No electric cable or apparatus, which is liable to be a source of danger other than a cable or apparatus used by operators, shall remain electrically charged.

c) All practical steps shall be taken to prevent danger to persons employed by the Employer, from risk of fire or explosion, or flooding. No floor, roof or other part of a building shall be so overloaded with debris or materials as to render it unsafe.

(xv) When work is performed near any place where there is risk of drowning all necessary equipment shall be provided and kept ready for use and all necessary steps taken for prompt first aid treatment of all injuries likely to be sustained during the course of the work.

(xvi) Use of hoisting machines and tackle including their attachments, anchorage and supports shall conform to the following:

(a) These shall be of good mechanical construction, sound material and adequate strength and free from patent defects and shall be kept in good working order be regularly inspected and properly maintained.

(b) Every rope used in hoisting or lowering materials or as a means of suspension shall be of durable quality and adequate strength, and free from defects.

(c) For every hoisting machine and every chain hook, shackle, swivel and pulley block used in hoisting, lowering or as means of suspension, safe working load shall be ascertained by adequate means. Every hoisting machine and all gear referred to above shall be plainly marked with safe working load. In case of a hoisting machine or a variable safe working load, each safe working load and conditions under which it is applicable shall be clearly indicated. No part of any machine or any gear referred to in the paragraph above shall be loaded beyond safe working load except for the purpose of testing.

(xvii) Motors, gearing, transmission, electric wiring and other dangerous parts of hoisting appliances shall be provided with efficient safeguards; hoisting appliances shall be provided with such means as will reduce the risk of accident during descent of load to the minimum. Adequate precautions shall be taken to reduce to the minimum risk of any part of a suspended load becoming accidentally displaced. When workers are employed on electrical installations which are already energised, insulating mats, working apparel such as gloves, sleeves and boots, as may be necessary, shall be provided. Workers shall not wear any rings, watches and carry keys or other material which are good conductors of electricity.

(xviii) All scaffolds, ladders and other safety devices mentioned or described herein shall be maintained in a safe condition and no scaffold, ladder or equipment shall be altered or removed while it is in use. Adequate washing facilities shall be provided at or near places of work.

(xix) These safety provisions shall be brought to the notice of all concerned by displaying on a notice board at a prominent place at the work location. Persons responsible for ensuring compliance with the Safety Code shall be named therein by the Contractor.

(xx) To ensure effective enforcement of the rules and regulations relating to safety precautions, arrangements made by the Contractor shall be open to inspection by the Engineer or his Representative.
(xxi) Notwithstanding anything contained in condition (i) to (xv) above, the Contractor shall remain liable to comply with the provisions of all acts, rules, regulations and bylaws for the time being in force in India and applicable in this matter.

The Contractor shall be responsible for observance, by his sub-contractors, of the foregoing provisions.

2. Labour Welfare Provisions:

(i) First Aid:
At every workplace, there shall be maintained in a readily accessible place first aid appliances including an adequate supply of sterilised dressings and sterilised cotton wool as prescribed in the Factory Rules of the State in which the work is carried on. The appliances shall be kept in good order and, in large work places, they shall be placed under the charge of a responsible person who shall be readily available during working hours.

(ii) Accommodation for Labour:
The Contractor shall during the progress of the work provide, erect and maintain necessary temporary living accommodation and ancillary facilities for labour at his own expense to standards and scales approved by the Engineer.

(iii) Drinking Water:
In every workplace, there shall be provided and maintained at suitable places easily accessible to labour, a sufficient supply of cold water fit for drinking.

Where drinking water is obtained from an intermittent public water supply each workplace shall be provided with storage tanks where drinking water shall be stored.

Every water supply storage shall be at a distance of not less than 15 metres from any latrine, drain or other source of pollution. Where water has to be drawn from an existing well, which is within such proximity of any latrine, drain or any other source of pollution, the well shall be properly chlorinated before water is drawn from it for drinking. All such wells shall be entirely closed in and be provided with a trap door, which shall be dust proof and waterproof.

A reliable pump shall be fitted to each covered well. The trap door shall be kept locked and opened only for cleaning or inspection, which shall be done at least once a month.

(iv) Washing and Bathing Places:
Adequate washing and bathing places shall be provided separately for men and women. Such places shall be kept in clean and drained condition.

(v) Scale of Accommodation in Latrines and Urinals:
There shall be provided within the precincts of every workplace, latrines and urinals in an accessible place, and the accommodation, separately for each for these, shall not be less than at the following scale:

<table>
<thead>
<tr>
<th>No. of Seats</th>
<th>(a) Where number of persons does not exceed 50</th>
<th>(b) Where number of persons exceeds 50 but does not exceed 100</th>
<th>(c) For additional persons per 100 or part thereof</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a)</td>
<td>2</td>
<td>3</td>
<td>3</td>
</tr>
</tbody>
</table>

In particular cases, the Engineer shall have the power to increase the requirement, wherever necessary.

(vi) Latrines and Urinals:
Except in workplaces provided with water-flushed latrines connected with a water borne sewage system, all latrines shall be provided with dry-earth system (receptacles) which shall be cleaned at least four times daily and at least twice during working hours and kept in a strictly sanitary condition. Receptacles shall be tarred inside and outside at least once a year.
If women are employed, separate latrines and urinals, screened from those for men and marked in the vernacular in conspicuous letters "For women only", shall be provided. Those for men shall be similarly marked "For men only". A poster showing the figure of a man and a woman shall also be exhibited at the entrance to latrines for each sex. There shall be adequate supply of water, close to latrines and urinals.

(vii) Construction of Latrines:
Inside walls shall be constructed of masonry or other non-absorbent material and shall be cement-washed inside and outside at least once a year. The dates of cement washing shall be noted in a register maintained for the purpose and kept available for inspection. Latrines shall have at least a thatched roof.

(viii) Disposal of Excreta:
Unless otherwise arranged for by the local sanitary authority, arrangement for proper disposal of excreta by incineration at the workplace shall be made by means of a suitable incinerator approved by the local medical health and municipal or cantonment authorities. Alternatively, excreta may be disposed of by putting a layer of night soils at the bottom of a pucca tank prepared for the purpose and covering it with a 15 cm layer of waste or refuse and then covering it with a layer of earth for a fortnight (when it will turn into manure).

The Contractor shall, at his own expense, carry out all instructions issued to him by the Engineer to effect proper disposal of soil and other conservancy work in respect of Contractor's work-purpose or employees on the site. The Contractor shall be responsible for payment of any charges, which may be levied by municipal or cantonment authority for execution of such work on his behalf.

(ix) Provisions of shelters during rest:
At every workplace, there shall be provided, free of cost, four suitable sheds, two for meals and two others for rest, separately for use of men and women labour. The height of each shelter shall not be less than 3 metres from floor level to lowest part of roof. Sheds shall be kept clean and the space provided shall be on the basis of at least 0.5 sq.m. per head.

(x) Crèches:
At a place where women are ordinarily employed, there shall be provided at least one hut for use of children under the age of 6 years belonging to such women. Huts shall not be constructed to a standard lower than that of thatched roof, mud floor and wall with wooden planks spread over mud floor and covered with matting.

Huts shall be provided with suitable and sufficient openings, for light and ventilation. There shall be adequate provision of sweepers to keep the places clean. There shall be a maidservant in attendance. Sanitary utensils shall be provided to the satisfaction of local medical, health a municipal or cantonment authorities. Use of huts shall be restricted to children, their attendants and mothers of children.

(xi) Canteen:
A cooked food canteen on a moderate scale shall be provided for the benefit of workers wherever it is considered necessary.

(xii) Planning, sitting and erection of the above mentioned structures shall be approved by the Engineer or his Representative and the whole of such temporary accommodation shall at all times during the progress of the Works be kept tidy and in a clean and sanitary condition to the satisfaction of the Engineer or his Representative and at the Contractor's expense. The Contractor shall conform generally to sanitary requirements of local medical, health and municipal or cantonment authorities and at all times adopt such precautions as may be necessary to prevent soil pollution of the Site.

On completion of the Works, the whole of such temporary structures shall be cleared away, all rubbish burnt, excreta or other disposal pits or trenches filled in and effectively sealed off and the whole of the site left clean and tidy, at the Contractor's expense, to the entire satisfaction of the Engineer.

(xiii) Anti-malarial precautions:
The Contractor shall, at his own expense, conform to all anti malarial instructions given to him by the Engineer, including filling up any borrow pits which may have been dug by him.
(xiv) Awareness and Education of HIV/AIDS
The contractor shall provide/carry out HIV/AIDS awareness and training programme to its labour and management, at least twice per year during the construction period.

(xv) Child Labour Prohibition
The contractor shall not employ Child Labour for any works or in any manner under the Contract at any time. In the event that the Contractor uses child labour, the Employer shall terminate the Contract.

(xvi) Amendments:
The Employer may, from time to time, add to, or amend these Rules and issue such directions as it may be considered necessary for the proper implementation of these Rules or for the purpose of removing any difficulty, which may arise in the administration thereof.
TERMS OF REFERENCE FOR THE PACKAGE NGO FOR THE IMPLEMENTATION OF SOCIAL MANAGEMENT PLAN UNDER THE ANDHRA PRADESH STATE ROAD SECTOR PROJECT

1. About the Project

Andhra Pradesh Road Development Corporation (APRDC), which is part of the Road and Building (R&B) Department, Government of Andhra Pradesh (GoAP), through Government of India, has requested for support from the World Bank towards the improvement and maintenance of core road network (about 12000 km) under the proposed State Road Sector Project (APRSP). As part of the proposal, under APRSP Phase – I, APRDC has identified (i) about 900 km of State Roads (mainly State Highways) for improvement and upgradation; (ii) 1200 km roads for improvement under Public Private Partnership (PPP); and (iii) about 5000 km under Long Term Performance Based Maintenance Contract (LTPBMC). A feasibility report has been prepared and detailed engineering designs are being prepared for the priority roads in phases under all the three components - road improvement and up gradation, PPP and LTPBMC. The implementation of the APRSP is expected to start by 2008. The construction in the proposed project corridor is expected to start by 2008.

2. Social Management Plan

The project design includes a comprehensive environmental and Social Management Plan (SMP) and its components include the following:

- Resettlement Action Plan (RAP)
- Indigenous People Development Plan (IPDP)
- HIV/AIDS Prevention and Control Plan
- Road Safety Awareness Program

These components of SMP are briefly described below.

2.1 Resettlement Action Plan (RAP): The RAP includes compensating and assisting the project-affected persons (PAPs) and the project affected families (PAFs) to restore their livelihood. Implementation of the RAP is an important component of the overall project implementation.

2.2 Indigenous Peoples Development Plan (IPDP): The project envisages indigenous people (generally referred as tribal in India) development as an important component. The IPDP, relevant to the Package, will be implemented involving local communities along the project road. The implementation framework of IPDP would be integrated with implementation of other components of SMP. IPDPs are planned and implemented in the project areas with significant tribal population.

2.3 HIV/AIDS Action Plan: The plan is intended to prevent the spread of HIV/AIDS on the road corridors proposed to be developed under this project. The action plan envisages assessing the HIV/AIDS scenario, identifying factors that affect the vulnerability of different road sector related community groups and developing strategies to address their needs by increasing access to prevention services, promoting early diagnosis and assisting affected individuals with support services along the road corridors. The program components include behaviour change communication (BCC), counselling services, condom promotion, and increasing access to quality STI services, voluntary counselling and testing services, and care, support and treatment services.

2.4 Road Safety Awareness Program: The proposed activities under this program are designed to reduce the risk of accidents through raising the awareness among local inhabitants and road users of the project corridors. An important component program is generating awareness among road users and local communities.

3. Intuitional Arrangement for SMP Implementation

The overall responsibility of implementing and managing SMP is with APRDC and its Package level units (APSHP offices). In order to facilitate APRDC in the implementation of SMP, the project has provisions to access services of NGOs both at the project and at the Package levels. The Nodal NGO
(at the project level) will function as the technical support unit to APRDC for efficient and effective delivery of technical assistance to APRDC staff and network of Package NGOs will be contracted to facilitate implementation of Package level SMPs. The present Terms of Reference (ToR) is designed for engaging NGOs at the Package level and it highlights the roles and responsibilities, specific tasks and scope of services which the selected NGOs are expected to perform. There will be one NGO for every Package. However, NGO can take additional Packages if they have adequate institutional support and required man power.

4. Role and Responsibilities of the Package NGO

The specific roles and responsibilities of the Package NGO in the implementation of Package level SMP are as follows:

(i) To work closely with the local communities particularly the project affected people, vulnerable groups, road users and have regular interactions with the local communities and develop good working relationship.

(ii) To facilitate APRDC in the implementation and management of Package level SMP and its components.

(iii) To coordinate with different District level agencies and other development organizations for the successful implementation of SMP.

(iv) To put into practice the implementation strategies developed by Nodal NGO. This essentially requires close collaboration and working with APSHP, District Administration (particularly Revenue, Health), offices of the line Departments and other relevant agencies and ensures successful SMP implementation.

(v) Liaise with the District Administration and other development agencies to dovetail their development programs for the socio-economic improvement of affected communities and vulnerable groups.

(vi) To develop innovative mechanism/methodologies to ensure active involvement of various project stakeholders in the implementation of SMPs.

(vii) To help in the monitoring and evaluation of SMP at the Package level.

(viii) To work in close coordination with Nodal NGOs and APRDC staff in the implementation of SMP.

Specific tasks of the Package NGOs include (but not limited to) the following:

- To educate PAPs on their rights to R&R entitlements and availability of project support.
- To establish vulnerability criteria and identify them among the local communities (including potential PAPs). Design and implement methodologies to help vulnerable groups and ensure that they have access to project benefits.
- To ensure that the PAPs are given their full R&R entitlements before they are dispossessed of their assets and are displaced (physically/economically).
- To counsel and assist PAPs in their relocation and accordingly coordinate with the local authorities.
- Assist PAPs in redressing their grievances (through the grievance redress mechanisms proposed under the project).
- To assist the Package Unit in ensuring social responsibilities of APRDC such as, compliance with the labor laws, prohibition of child labour, gender issues, wage parity, employment to local communities etc.
- To Implement IPDPs (where relevant to a Package) and ensure community participation in the operation and management of any community assets created under the project.
- To enhance the level of awareness and knowledge and increase self risk perception of all stakeholders, particularly high risk groups, on HIV/ AIDS and safe sexual behaviours. To reduce the risk of spread of HIV/AIDS in the project area, work closely with the contractors to implement the
workplace intervention programs; and with the relevant agencies for various road users including truck drivers/helpers, service providers to road users, commercial sex workers, etc.

- To facilitate local communities to access condoms, medical care services (for treatment of STI and HIV/AIDS).
- To develop technical capacities of agencies (other NGOs/ CBOs) on promoting voluntary counselling/ testing for the diagnosis of HIV. In this regard, the NGO will undertake awareness program, using IEC material, on prevention of STI and HIV/AIDS in the project area.
- To educate local communities and road users on the road safety measures. This would essentially include undertaking awareness campaigns on road safety measures along the project corridors.
- To distribute IEC materials and educate them (including school children) on the use of safety signals and traffic movement.
- To submit progress reports on a monthly and quarterly basis for APRDC and provide input to the monitoring process of SMP envisaged under the project.

5. Scope of Work

The Package NGO will play an important role in the implementation of SMPs and in the process ensure mitigating the adverse effects and enhancing the positive impacts of the project on local communities and others. The NGO will be responsible for the development and implementation of comprehensive implementation strategies; help other stakeholders and road users to access opportunities available under the project; facilitate PAPs in their R&R process and in accessing project benefits. Specifically, the scope of work of the Package NGO will include (but not limited to) the following activities.

6. Developing Rapport with local communities:

The Package NGO will organise information dissemination sessions at strategic locations within the project area. SMU/Nodal NGO will provide the modules of information dissemination/awareness campaigns about the project and SMP. The Package NGO can also use other tested methodologies from their past experiences. The initial discussions will be about the project, its benefits and potential impacts of proposed interventions. In this connection, the NGO will explain to the PAPs the need for land acquisition, relocation, provisions of the State R&R policy, R&R entitlements, IPDP programs, road safety measures, HIV/AIDS plan, opportunities under the project, etc. The NGO will detail out the livelihood opportunities available within the project districts as well as under the project.

More importantly, the NGO will facilitate in developing good working relationship with PAPs, their representatives and the Package Management Unit, particularly with the Package Manager and relevant govt. agencies. This could be achieved through regular meetings (formal and informal) with the Package Manager, relevant officials, PRIs and PAPs. Formal meetings (prior date) with the Package Manager will be held at least fortnightly; and meetings with the PAPs will be held as and when required basis but at least once in a fortnight in each project village during the entire duration of the assignment. All meetings and decisions taken during formal meetings will be documented by the NGO and these will be submitted to the Package Manager as part of Monthly Progress Reports. Consultation conducted, its reporting mechanism and successful operationalization of the agreements during consultation will be an indicator of the performance of the Package NGO. In all of these consultations, the NGO will give special attention to the issues and needs of women and other vulnerable groups. The outcome of this exercise is that NGO establishes close rapport with PAPs and local communities and gain their confidence and at the same liaison with the Package Management Unit, District Administration and relevant agencies.

7. Implementation of RAP

7.1 Identification and Verification of eligible PAPs: The NGO will verify the Census survey of the PAPs within the proposed Corridor of Impact (CoI) of the project road. The NGO will cross check the information already contained in the RAP and the individual losses of the PAPs. Verification exercise will include actual detailed measurement exercise to determine the extent of loss/damage, and the valuation of the extent of loss/damage/affected in close coordination with the Package Manager. Based on the verification, the NGO will update the list of the eligible PAPs and their entitlements.
Before initiating the verification exercise, the Package NGO, in consultation with APRDC/PMU and Nodal NGO will develop the criteria for verification (such as proof of caste, income level, type of ration card, land holding size, etc.), which should be in conformity with the guidelines of the District Administration. During this process, the NGO will ensure that each PAP is contacted and relevant documents are checked. The NGO will prepare the list of the PAPs/PAFs including those requiring relocation and compute the extent of potential losses as a result of the proposed interventions under the project. The NGO will display the list of verified PAPs in the District/Mandal/Panchayat Offices, Bill boards and prominent public places in the project villages. After the public disclosure of the list of eligible PAPs, the Nodal NGO will hold formal consultations with the PAPs and their representatives, including PRIs, Village Revenue Officials, Peoples' representatives, etc. These consultations will focus on the cases not included in the list and/or wrong inclusion and their grievances with regard to their R&R entitlements (for each eligible PAP). The NGOs will record these grievances and mistakes in the list of PAPs and place it to the Package Manager for resolutions; and if not resolves at the relevant level of grievance redress mechanism. The NGO will inform/update the concerned (aggrieved) PAPs about the status of their grievances and resolution. Success in the resolution of such grievances will be an important indicator of performance of the NGO. The NGO will prepare final agreed list of PAPs and accordingly prepare and issue identity cards (see RAP for details) of eligible PAPs. The NGO will ensure that identity cards are received by all eligible PAPs. Thus the outcome of this exercise will be the final agreed list of PAPs and issuance of ID cards to the PAPs found eligible for R&R assistance.

7.2 Preparation of Micro Plans: The NGO will assist in determining the R&R entitlement of individual PAPs/PAFs on the basis of the R&R policy provisions and R&R entitlement matrix agreed for the project and included in the RAP. In case of any discrepancies, the NGO will resolve the issue in consultation with the Package Manager, Nodal NGO and APRDC/PMU. The R&R entitlements finalized at the individual PAP/PAF level is called as micro-plan. The micro plans will be prepared for each village (involving RAP activities) separately. The NGO will assist Package Manager in submitting these micro-plans to the District R&R Committee (DRRC) for (technical) approval. This approved RAP will be submitted to APRDC for administrative/financial approval. In this regard, the Nodal NGO will thoroughly examine the R&R entitlements of individual PAPs to conform that these are in accordance with the R&R entitlement framework agreed for the project and accordingly advise APRDC for approval. These approved micro plans will be sent to Package unit for implementation. The outcome of this exercise would be the approved Micro plans.

7.3 Land Acquisition and Compensation: All efforts are required to minimize the time in the LA process and in the final payment of compensation to the land losers and affected families. In this regard, with the help Nodal NGO/PMU, the Package NGO will develop alternate approaches to LA and compensation. One of the important methodologies being adopted in the state is the 'consent award' for compensating loss of land and other immovable assets for the project. This methodology is based on LA procedures adopted in state within the preview of LA Act 1894. Based on this methodology, the Package NGO will develop steps to be followed for consent award. In this connection, the Nodal NGO will assist APRDC in getting approval for consent award from the Government. The Nodal NGO will provide technical guidance to Package NGO for arriving at replacement value of land and other assets required for the project. This assumes importance in cases involving high prices of land. The Nodal NGO will facilitate in preparation of such case/cases for APRDC in getting required approval. The outcome of this exercise is speedy completion of LA process and complete payment of compensation before the PAPs/PAFs are dispossessed of their land and other assets required for the project. The time taken in the completion of LA and payment of compensation and the satisfactory resolution of the grievances will be an important indicator of the performance of the Package NGO.

7.4 Disbursement of R&R entitlements: The Package NGO will assist in distributing R&R entitlement to PAPs. In this connection the NGO will plan disbursement of R&R entitlements in such a manner that full transparency is maintained. It is also necessary to ensure that all R&R entitlements are extended to PAPs before they move out of the affected area. The outcome of this exercise is that all eligible PAPs/PAFs would have received their R&R entitlements well before they move out of the affected area. Here again, the time taken in the completion of disbursement of R&R entitlements, ensuring that all PAPs are given their entitlements before they are to leave the affected
area and satisfactory resolution of the grievances will be important indicators of the performance of the Package NGO.

7.5 Planning for Relocation: NGO will assist the project authorities in ensuring smooth transition to PAPs in their relocation process. This will include advance information to PAPs through proper notices for vacating the affected area; helping them to shift the construction materials that could be salvaged from the affected structures, transport of household belongings and other support during transition period. In close consultation with the Package Manager and PAPs, dates for shifting will be finalized and accordingly necessary should be extended to PAPs.

The NGO will prepare layout of the relocation site (where ever required) in consultation with the PAPs, Package Manager and the concerned line agencies. While doing lay out planning, the NGO will be conducting host population survey and their opinion about site development. The lay-out plan should be in agreement with the host population. The NGO will make every effort for Government sponsored site development, but this will be done in full agreement with PAPs. At the same time, efforts will be made to promote 'self relocation' and in this process the NGO will help willing PAPs in selecting alternate sites, negotiating prices and ensuring proper linkages for civic amenities. The NGO will ensure that no PAF will be forced to move out of their original homes unless all assistance for relocation is extended to PAFs. The outcome of this exercise is the successful completion of relocation plan - physically displaced families from their homes, families displaced from their commercial places and cultural/common properties.

7.6 Flow of funds for R&R assistance: The NGO will assist PAPs in opening bank accounts explaining the implications, the rules and the obligations of a joint account, and flow of funds against their R&R entitlements, PAPs should be explained how they can access the resources available with District Administration, and other development agencies. The NGO will ensure proper utilisation of the R&R budget available to each PAP. The NGO will identify the methodology for disbursement of R&R entitlements and accordingly advise the Package Manager for disbursement to the eligible persons/families. The NGO/Package Manager will report to the APRDC/PMU on the level of transparency achieved in the disbursement of R&R entitlements under the project. It is expected that at the end of the RAP implementation, all R&R assistance has been extended to PAPs and that this has been used for productive purpose; and all accounts have been settled. The NGO will provide necessary documents to effect closure of joint accounts in the Banks.

7.7 Economic rehabilitation: The NGO will assess the economic opportunities (both within the project and outside) available to PAPs who have suffered loss of their livelihood due to the project. These will be explained to PAPs and local communities and facilitate them to access to these opportunities. The Package NGO will ensure that the PAPs have found economic investment options (under the economic rehabilitation component of RAP) suitable to them and are able to restore their livelihood against the loss of land and other productive assets. In this connection, efforts will be made to involve Indira Kranthi Patham/DWACRA groups who could impart training, help PAPs in skill up gradation and training for self employment. In this regard, the Package NGOs could help PAPs in the following ways:

- Exploring alternate methods of livelihood using the local skill and resources and accordingly advise Package NGOs to plan the economic rehabilitation component in their assigned areas.
- Co-coordinating (and imparting wherever required) the training and capacity building of the PAPs to upgrade their skills for income restoration. This will include the training not only in the skill acquisition in the chosen enterprise but also in marketing, etc.
- Helping PAPs in optimizing the indigenous technology knowledge (ITK) through use of local resources and skills.
- Contact financial institutions like NABARD, SIDBI, and the Lead Bank of the area and help PAPs access them for the credit required. The NGO will maintain a detailed record of such facilitation, and plan for each PAF for repayment of loan.
- Establish linkages with the District Administration for ensuring that the PAPs are benefited from the schemes available. However, the focus of the NGOs will be the vulnerable PAPs and restore their income. The NGO will maintain a detailed record of such facilitation.

- Ensure that local people (including PAPs) interested in wage employment and other economic activities have access to these opportunities under the project.

The outcome of implementing this component of RAP is that all economically displaced PAPs are properly rehabilitated in the sustainable economic activities.

7.8 Addressing Grievances of PAPs: The NGO will make the local communities and PAPs aware of the functioning of District Resettlement and Rehabilitation Committee (DRRC) and any other Grievance redress mechanisms available under the project (and the District Administration) to present their grievances for resolution. The NGO will train the PAPs on the procedures to file a grievance, filling up necessary application and on presenting documents in support to their claims. The NGO will help clarify their doubts about the procedure and the functioning of DRRC. The NGO will record the grievances and bring the same to the notice of the DRRC within the stipulated time (after receipt of the grievances from the PAPs). The NGO will prepare a draft resolution with respect to a particular grievance suggesting multiple solutions (where possible), and deliberate on the same in the DRRC meeting through the representatives (particularly from NGO, PAPs, PRIs and other elected members) in the DRRC. The Package NGO will accompany the PAPs to the DRRC meeting to help them express their grievances in a formal manner if requested by DRRC. The NGO will inform the PAPs of the decisions taken by the DRRC. (The time frame for the DRRC to take a decision is 15 days). In this connection, the Package NGO will ensure that maximum grievances have been resolved at the village/Tahsil level and very few are required to go the DRRC. This will hasten up the process of implementation and will help PAPs in resolving their problems and issues in a timely manner. Number of grievances placed in DRRC as well as those at the village/Tahsil level and resolved will be an indicator of performance of NGO. The outcome of this responsibility is that all PAPs are satisfied with the implementation of RAP and related activities.

8. Implementation of IPDP

In the relevant Package which triggers IPDP (tribal development plan), the NGO will follow specific consultations envisaged under the project level Tribal Development Strategy and the formats for consultation developed by the Nodal NGO. This, however, requires close coordination and working with the Package Manager (particularly on wage employment and infrastructure development) and District Administration (on the socio-economic development programs for vulnerable groups). The NGO will ensure that the project impact on ST families is minimized by adopting suitable measures. The NGO will develop profile of STs, their village resource mapping, identify the needs of the people and conduct public meeting to reach consensus on the activities to be taken under this component

The NGO will ensure that every eligible tribal PAPs receives the R&R entitlements within the framework of RAP. In this regard, the NGO will liaise with DRDA, Tribal Department and other agencies for skill improvement. During relocation, ensure that the ST affected families do not lose resources available to them prior to their displacement. Further, the NGO will contact the District Administration and District offices of line Department to identify development schemes (such as rural development programs, Tribal sub-plan, total literacy mission, etc.) which could be dovetailed for the socioeconomic development of local communities (particularly the vulnerable including tribal). The extent of coordination with and dovetailing of development schemes of the District Administration – DRDA, ITDP, etc will be performance indicator of the NGO working. Under ITDP, the focus of work will be on community efforts and no individual based activities should be promoted and encouraged.

With regard to HIV/AIDS prevention and control, the Package NGOs shall conduct a desk review of all the on-going programs on HIV/AIDS and undertake a community level needs assessment of the project area identifying the issues, potential stakeholders and available resources. In this regard, it is important to identify other organizations (APSACS, NGOs, CBOs, Civil Societies, Contractors, Private sector) working in this sector/area and agencies providing, referral services and explore the possibilities of their involvement and helping local communities/road users to access their programs. The needs assessment
should help the NGO to identify the different vulnerable and at-risk population groups along the corridor; establish the baseline information, develop the intervention plan; and institutionalise a robust monitoring mechanism. The NGO shall prepare and agree with APRDC/Nodal NGO on a detailed Implementation Plan for education, prevention and service delivery in the relevant Package which would be monitored by Nodal NGO and an external monitoring agency. The Plan for interventions will be in-line with the NACP III strategic approaches. This would essentially require the package NGO to collaborate with APSACS and its partner NGOs in the area, District Health Office and other agencies and ensure proper implementation of HIV/AIDS Plan for the Package Area.

The NGOs shall deliver the HIV/AIDS prevention messages and services as given in the agreed HIV/AIDS Plan. The intervention approaches will include: While the details of the HIV/AIDS action plan and the proposed interventions are given in Annex I, some of the specific areas are given below:

- Focused behaviour change interventions among the identified at-risk groups such as migrant/construction workers, truckers, female sex workers, IDU's, MSM and others.
- Work with the Self help groups in the local area to raise awareness among the women and others
- Mobilise the youth in the communities and workforce to serve as Peer Educators
- Conduct Life skills education for the out of school adolescents and youth in the communities.

Some of the methods expected to be used to raise awareness include:

- Public meetings; Group discussions, meeting with the different audiences;
- Posters, larger bill boards, banners and mobile hoardings;
- Leaflets of other objects with HIV/AIDS safety messages,
- Street plays, magic shows, puppet shows, short films, Road site retro boards;
- Mobile loudspeaker/address system (fixed in vans);
- Focus group discussion in construction camps, truck parking places and other public gathering places;
- Workshops and training of CBOs.
- Local radio broadcasts;
- HIV/AIDS kiosks; and
- Other method to be described in the Implementation Plan.

The other key program components will include

- Promotion of condoms (free distribution and social marketing)
- Counselling Services
- Referral for STI treatment
- Referral to VCTCs
- Create an environment of reduced stigma and discrimination
- Referral for care, support and treatment for people living with HIV/AIDS (PLHIV)

10. Implementation of Road Safety program:

One of the important components of SMPs is implementing road safety measures in respective packages. While engineering aspects relating to road safety are being taken care in the project technical designs, NGOs will be working mostly on soft aspects including generating awareness and disciplining the local communities/road users in following traffic rules and avoiding accidents. Specifically, in implementing the proposed road safety measures, the NGO will undertake (but not limited to), the following:

- Make local residents aware that road safety is a major community concern.
• Encourage local communities to identify specific road safety problems faced by them and the measures required to address them.

• Strengthen local NGOs and Community Based Organisations (CBOs) and their linkages to external institutions with a role in road safety measures.

• Educate communities/road users in the safe use of the road and actions to be taken in the event of an accident.

• Linking community facilitators and APRDC on road safety program and ensure sustainability of programme.

• Involve local schools in controlling traffic flow and educating the locals on road safety measures.

11. Ensuring the Social Responsibilities

The Package NGO will assist the Package Manager to monitor regulations under different Act towards the fulfillment of social responsibility of the project. In this regard, the NGO will disseminate the required information at the construction camps, work place and other relevant places along the project road. The NGO will provide the information about these clauses to the Package Manager and will report the interactions with contractors and others. The NGO assist Package Manager to ensure that the contractors are abiding by the various provisions of the applicable laws, concerning the workers’ safety, health and hygiene; issues relating to women and child labor.

The stipulated regulations include (but not limited to) the following:

(a) The Contract Labor (Regulation and Abolition) Act 1948;
(b) The Minimum Wages Act, 1948.
(c) The Equal Remuneration Act, 1979.
(d) The industrial Employment (Standing Order) Act, 1946;
(e) The Child Labour (Prohibition and Regulation) Act, 1986;
(f) The Maternity Benefit Act, 1951;
(g) The Building and Other Construction Workers (Regulation of Employment and Conditions of Service) Act 1996;
(h) The Cess Act of 1996 and

As per these laws, there are specifications regarding the facilities/requirements at the construction camp/site, including basic health care facilities, Mother and Child Welfare units and facilities for vaccinations, day care facilities, etc. The NGO will work in co-ordination of the Female social Worker/resident engineers of the Contractor, or any other representative of the Contractors, to ensure these facilities are provided in a satisfactory manner, and all social responsibilities of the Contract is implemented satisfactorily (please refer contract clauses of the Works Contract).

12. Monitoring SMP

The Package NGO will prepare monitoring reports in the formats developed by Nodal NGO and prescribed by APRDC/PMU. These reports will be submitted at the specified frequency. The NGO will also help the external M&E agency in undertaking monitoring of SMP implementation. The NGO will also prepare implementation progress reports as would be required by Package Manager/PMU. The NGO, in their monitoring reports will identify good practices in the planning and implementation of various components of SMP, particularly those relating to RAP.

13. Time frame for Services

The NGOs will be contracted over a period of three years. Initially their contract will be for one year and contract will be renewed on their good performance. Before the end of the contract period, the NGO would have developed a withdrawal methodology in built in their proposals and this would be agreed with the Nodal NGO/APRDC.
14. Reporting

The Package NGO will be reporting to Package Manager and APRDC/Nodal NGO during the course of this assignment on this project. The NGO will submit the following reports:

(i) Inception Report: This will be submitted within a fortnight of the signing of contract with the Project. Besides giving a brief account of their approach to undertake the assignment, specifically the report should include the man power deployment including the professionals agreed in the Contract. This should be agreed by APRDC/Package Manager. The report should also include schedule of proposed activities along with time line for its implementation.

(ii) Monthly Reports: The NGO will prepare progress reports on monthly basis and submit to Package Manager, Nodal NGO and PMU/APRDC highlighting their field visits, observations and discussions with relevant stakeholders on the implementation of SMP components. The report should specifically include the progress (both physical and financial) in SMP implementation and achievement against the targets, during the period of reporting. All communication materials (prepared and distributed) and monitoring reports (and formats prepared) should form part of the report. The report should also include training modules prepared and training programs organized. The report should highlight the problems and issues faced, remedial measures taken, good practices observed, etc. While report on grievances, the report should include number of grievances registered and number resolved and status of the reaming and proposed measures.

(iii) Annual Report: This report to be prepared and submitted to the Package Manager/APRDC/Nodal NGO should highlight the implementation progress; identify good practices, issues/problems faced, and suggestions for effective/improved implementation and time frame along with schedule of activities for the next year. This could also include case studies of good practices in the implementation of SMP.

(iv) Final Report: This report will coincide with the Completion of SMP implementation and will provide input in the implementation of SMP in other Packages. The report will identify issues/problems encountered in SMP implementation and suggestions how these were be addressed and how one could plan to face these challenges in future operations and measures required to improve implementation effectiveness.

(v) Any other report: As and when required, the NGO would prepare report for Package Manager/APRDC on the planning and implementation of SMP under the project.

(vi) All reports should be submitted in 10 hard copies along with a soft copy. Reports will be finalized within a fortnight of receiving comments and suggestions from APRDC and the Nodal NGO.

NOTE:

(i) All reports should be submitted in 10 hard copies along with a soft copy. Reports will be finalized with a fortnight of receiving comments and suggestions from APRDC and the World Bank.

(ii) All documents created, generated or collected during the period of contract, in carrying out the services under this assignment will be the property of the APRDC.

(iii) No information gathered or generated during and in carrying out this assignment will be disclosed by the NGO without the explicit permission of the APRDC/Package Manager.

(iv) All consultations should be properly documented in terms of photos, video graphs, audio recordings, proceedings of the meetings, etc. These should be submitted along with the reports.

15. Project Team

The NGO will constitute a team of professionals and place it at the project site. The constitution of the team, their qualification, expertise and experience is given below:

<table>
<thead>

</tr>
</tbody>
</table>

* This number will depend on the coverage of area. It is stipulated that there should be at least one Outreach Worker for every 5-8 villages.
ANNEX - I

APRDC will prepare a brief account of the Package indicating the length of the corridor, districts covered, estimated number of villages coming within the corridor, estimated number of project affected families, whether the Project Corridor triggers IPDP/tribal Development.

This will help the prospective bidders to estimate the magnitude of work and accordingly plan their manpower requirement and their financial proposal.

ANNEX – II

Specific Activities Under HIV/AIDS Action Plan

The Implementation of the Plan will identify:

- The project audiences are and key behaviours to be changed;
- The methods and materials (existing materials to be used wherever feasible) to be used for BCC;
- Timing of/ frequency of intervention in relation to the construction program;
- Intervention approaches specifically for the contractors’ camps and for the communities.
- Services to be directly offered by the project and the referral systems to be accessed for treatment of STI and voluntary counselling and testing centres for the diagnosis of HIV/AIDS.
- Linkages and networking with SACS, other NGOs/CBOs, Govt. programs, clinics both private and govt. and other agencies to complement and strengthen the HIV control effort in the project; and
- Monitoring mechanisms, including indicators which the project will report progress on.

HIV/AIDS Prevention Interventions

- Focused behaviour change interventions among the identified at-risk groups such as migrant workers, truckers, female sex workers, IDUs, MSM and others.
- Work with the Self help groups to raise awareness among the women
- Mobilise the youth in the communities and workforce to serve as Peer Educators
- Conduct Life skills education for the out of school adolescents and youth in the communities

Methods to use to raise awareness include (but not limited to) the following:

- Public meetings: Group discussions, meeting with the different audiences.
- Posters, larger bill boards, banners and mobile hoardings;
- Leaflets of other objects with HIV/AIDS safety messages embedded; street plays, magic shows, puppet shows, short films, Road site retro boards.
- Travelling loudspeaker vans;
- Construction camp or truck lay bye focus groups;
- Workshops and training of CBOs;
- Local radio broadcasts;
- Distribution of condoms and
- Other method to be described in the Implementation Plan.
TERMS OF REFERENCE FOR THE NODAL NGO
FOR THE IMPLEMENTATION OF SOCIAL MANAGEMENT PLAN UNDER
ANDHRA PRADESH STATE ROAD SECTOR PROJECT

1. About the Project

Andhra Pradesh Road Development Corporation (APRDC), which is part of the Road and Building (R&B) Department, Government of Andhra Pradesh (GoAP), through Government of India, has requested for support from the World Bank towards the improvement and maintenance of core road network (about 12000 km) under the proposed State Road Sector Project (APRSP). As part of the proposal, under APRSP Phase – I, APRDC has identified (i) about 900 km of State Roads (mainly State Highways) for improvement and upgradation; (ii) 1200 km roads for improvement under Public Private Partnership (PPP); and (iii) about 5000 km under Long Term Performance Based Maintenance Contract (LTPBMC). A feasibility report has been prepared and detailed engineering designs are being prepared for the priority roads in phases under all the three components - road improvement and upgradation, PPP and LTPBMC. Implementation of the project is expected to start by 2008.

2. Social Management Plan

The project design includes a comprehensive environmental and social management plan. The specific components of the Social Management Plan (SMP) are:

- Resettlement Action Plan (RAP)
- Indigenous People Development Plan (IPDP)
- HIV/AIDS Prevention and Control Plan
- Road Safety Awareness Program

The SMP has provisions for engaging a Nodal NGO at the project level and NGOs at the package level for road strengthening and PPP components to facilitate implementation of SMP. In this context, APRDC wishes to contract an NGO having strong management and human resource capabilities to support the implementation and management of all the four components of SMP, especially providing support to the Package NGOs and provide technical support as and when required by APRDC. The Nodal NGO will be managing the overall SMP of the Project.

The main components of SMP are briefly presented below.

2.1 Resettlement Action Plan (RAP): The RAP includes compensating and assisting the project-affected persons (PAPs) and the project-displaced persons (PDPs) to restore their livelihood. Implementation of the RAP is an important component of the overall project implementation.

2.2 Indigenous Peoples Development Plan (IPDP): The project envisages indigenous people (generally referred as tribal in India) development as an important component. The IPDP, relevant to the Package, will be implemented involving local communities along the project road. The implementation framework of IPDP would be integrated with implementation of other components of SMP. IPDPs are planned and implemented in the project areas with significant tribal population.

2.3 HIV/AIDS Action Plan: The plan is intended to prevent the spread of HIV/AIDS on the road corridors proposed to be developed under this project. The action plan envisages assessing the HIV/AIDS scenario, identifying factors that affect the vulnerability of different road sector related community groups and developing strategies to address their needs by increasing access to prevention services, promoting early diagnosis and assisting affected individuals with support services along the road corridors. The program components include behaviour change communication (BCC), counselling services, condom promotion, and increasing access to quality STI services, voluntary counselling and testing services, and care, support and treatment services.

2.4 Road Safety Awareness Program: The proposed activities under this program are designed to reduce the risk of accidents through raising the awareness among local inhabitants and road users of...
the project corridors. An important component program is generating awareness among road users and local communities.

3. Implementation Mechanism

The overall responsibility of implementing and managing SMP is with APRDC and its Package level units (APSHP offices). In order to facilitate APRDC in the implementation of SMP, the project has provisions to access services of NGOs both at the project and at the Package levels. The Nodal NGO (at the project level) will function as the technical support unit to APRDC for efficient and effective delivery of technical assistance to APRDC staff and network of Package NGOs contracted to facilitate implementation of Package level SMPs. The second tier would be the network of implementation NGOs at Package level.

The present Terms of Reference (ToR) is designed for the Nodal NGO, which highlights the roles, responsibilities and specific tasks which the selected NGO is expected to perform.

4. Role and Responsibilities of the Nodal NGO

The specific roles and responsibilities which the selected Nodal NGO is expected to perform are as follow:

(a) Assist in the implementation and management of SMP and its components.
(b) Coordinate with relevant agencies for the successful implementation of SMP.
(c) Provide ongoing technical assistance to Package NGOs/APRDC staff, build their capacities and ensure program sustainability.
(d) Develop innovative implementation strategies within the framework of SMP and achieve the overall objectives of different components of SMP. This essentially involves close collaboration and working with APRDC, Revenue Department, District Administration and line Department offices including Indira Kranti Patham (IKP), District Rural Development Agencies (DRDA), APSACS and other relevant agencies and ensures SMP is successfully implemented.
(e) Monitor the implementation of SMP and help APRDC in preparing required monitoring reports.

5. Specific Tasks

The specific tasks for Nodal NGO will include (but not limited to) the following:

- Plan the overall implementation mechanism of different components of SMP to achieve the social development objectives of the project and prepare the annual action plans of SMP and get their approval from APRDC.
- Assess the conformity of the individual entitlement matrix (micro-plan) prepared by Package NGOs within the framework of approved RAP. Review the annual action plan prepared by Package NGOs, assesses its conformity with the agreed SMP and ensures its timely approval by APRDC.
- Support APRDC in selecting Package NGOs.
- Institutionalize the system for planning, implementation, monitoring and evaluation of SMP with the stakeholder participation well before the implementation is initiated.
- Assist APRDC in getting approval of SMP (including RAP) from relevant authorities, District Administration, etc.
- Work in close coordination with Package NGOs and provide necessary guidance to APRDC and Package NGOs for smooth implementation of the SMP.
- Develop Strategies to help the local communities (specifically those affected by the project) to access the ongoing Government socio-economic development programs.
- Develop a communication strategy and prepare Information, Education and Communication (IEC) materials for community participation in implementation of SMP. However, in the case of HIV/AIDS prevention program, the NGO will work with APSACS on developing IEC materials to
be used in the project area. Likewise, in the road safety program, IEC materials available with the relevant agencies will be extensively used.

- Promote project partners using gender sensitive and participatory approaches in planning for interventions development, management and evaluation.

- Develop training programs/modules (including exposure visits, experience sharing workshops) for the capacity enhancement of Package NGOs' functionaries and APRDC staff. Facilitate APRDC in organizing the exposure visits and training programs. The NGO will prepare a calendar of training program for each year and get approval of APRDC.

- Help APRDC in establishing a good redressal mechanism in the context of formation of District R&R Committee (DRRC). Document grievances received at the project level and ensure their addressal in coordination with relevant agencies. The Nodal NGO will provide necessary guidance to Package NGOs in establishing similar grievance redress system and documentation of grievances at the Package level.

- Be pro-active in providing information and guidance to Package NGOs and APRDC staff to access technical support available with different agencies so as to ensure effective implementation of SMP.

- Evaluate RAP implementation within the project period after its substantial completion.

- Develop internal monitoring systems for assessing the improved delivery of R&R entitlements and utilization of services and assess the level of satisfaction.

- Maintain regular interaction with PIU & Package Managers and DRRC.

- Evolve workable guidelines from experiences for adoption in new interventions within each target group by enabling partners to document and use best practice.

- Undertake any other relevant task assigned by APRDC/PMU for the successful completion of SMP.

6. Scope of Work

The Nodal NGO will play an important role in the implementation of the SMP, mitigating the adverse effects of the project and providing guidance for enhancing the effectiveness of SMPs. The Nodal NGO will remain responsible for the development of a comprehensive implementation plan to facilitate the Project stakeholders to take advantage of the options available in the projects and dovetailing existing Government developmental schemes. The scope of work towards the implementation of the SMP will include (but not limited to) the following:

6.1 Implementation of RAP

Identification and Verification: The Nodal NGO will verify the information of the list of PAPs prepared by the Package NGO through field verification using random sampling method. Based on the sample verification and supporting documents, the Nodal NGO would vet the list of PAPs and submit it to APRDC for approval. The NGO will ensure that the approved list is submitted to the District Administration along with the action plan for implementation. The NGO will also ensure that the final list of PAPs is adequately disseminated including putting it on the billboards/other public offices as per the provisions of Andhra Pradesh Resettlement and Rehabilitation Policy (APRPRP) 2005. The Nodal NGO will also ensure that Package NGOs prepare ID cards along with R&R entitlement for each PAP (included in the approved list), get their approval and distribute to PAPs. The Nodal NGO would be responsible in minimizing litigation regarding land acquisition and R&R assistance.

Preparation of Relocation Plan: The Nodal NGO would provide technical guidance in the identification of relocation sites with the active involvement of affected community and help in preparing relocation plan (lay-out of the relocation site) in close consultation with the District Administration. In this regard, the Nodal NGO would provide technical assistance in preparing relocation site lay out and assist APRDC in finalizing allotment of house plots in the relocation site. Technical guidance would be also provided Package NGOs in identifying suitable government land in consultation with the Revenue Department Officials. Where Government land is not
available, the strategies will include identifying private land, willing sellers and negotiating with them to arrive at reasonable prices. Wherever required, the Nodal NGO will develop a survey format to collect information from the host population which will form basis for developing strategies to involve them in preparing relocation plan. The Nodal NGO is responsible to ensure successful implementation of the relocation plan.

Developing suitable methodology for consent award: The Nodal NGO should develop methodology for consent award for land acquisition which would be based on LA procedures adopted in the state within the preview of LA Act 1894. The NGO will also develop steps to be followed for consent award. In this connection, the Nodal NGO will assist APRDC in getting approval for consent award from the Government.

The Nodal NGO will provide technical guidance to Package NGO for arriving at replacement value of land and other assets required for the project. This assumes importance in cases involving high prices of land. The Nodal NGO will facilitate in preparation of such case/cases for APRDC in getting required approval.

Developing Mechanism for Inter-Agency Linkages: The Nodal NGO will assist Package NGOs and Project Staff in the implementation of relocation plans and provide support in coordinating with relevant Government agencies (particularly for alternate housing, civic amenities and income generation activities). The need is to help Package NGOs to plan for 'innovative schemes' to enhance living conditions of PAPs. Essentially, this requires the Nodal NGO to coordinate at the State level with financial institutions, relevant development agencies, Government Departments, Training Institutions, etc. The strategy on alternate Income Generation Activities (IGA) should include imparting new skill and/or upgradation of existing skill among PAPs in general and vulnerable among them in particular.

Documenting Grievances: Nodal NGO will provide technical and other support to Package NGOs for speedy redressal of grievances. In this regard, the Package NGOs need to be trained in addressing grievances of PAPs. This include providing guidance in the preparation of application, registering grievances with relevant authorities and negotiating with the grievances redressal committee and concerned authorities.

The nodal NGO will help Package NGOs in documentation of grievances and their resolution. The grievances not resolved at DRRC would be brought to APRDC and State level R&R Committee by Nodal NGO for further consideration. The Nodal NGO will ensure that the grievances received in APRDC/State level Committee are properly documented, recorded and redressed. The Nodal NGO would be in direct consultation with the NGO representatives in state level Committee and suggest acceptable resolution of the grievances. Where required, the Nodal NGO will facilitate PAPs representing their grievances at the State level Committee.

6.2 Implementation of Indigenous Peoples Development Plan (IPDP)

The Nodal NGO will coordinate with Social Welfare Department and other Government agencies for dovetailing Government run programs in the specific packages where impact on indigenous (locally referred as tribal) people is significant. The Nodal NGO will also develop strategy to integrate rural development program in the packages where ST people are getting affected. The focus of the strategy will be involvement community-based organizations and local NGOs working along project stretches in the planning of IPDP. These strategies will be operationalized by the Package NGOs in consultation with District Administration.

6.3 Implementation of HIV/AIDS Action Plan

With regard to HIV prevention, the Nodal NGO will be responsible for working with APSACS and RDC in developing/adapting the technical approaches to address the needs of the different target groups/audiences. In this regard, there is need to liaise with the APSACS and other projects/departments to facilitate accessing varied products/services by the Package NGOs who would provide them to road users and local communities along the project corridors. The products/services include: IEC Materials, Training, Condoms, Treatment for Sexually Transmitted Infections (STI), Voluntary Counselling and Testing Services (VCTC) and Care, support and treatment.
The program implementation is mainly classified into two separate aspects: (i) Contractors themselves implement HIV/AIDS prevention programs for their workforce directly/indirectly engaged by the project and others who deliver goods and materials at the work sites; and (ii) Package NGOs implementing HIV/AIDS prevention programs along the corridors where construction activity takes place.

The responsibility of the Nodal NGO will be to guide the contractors and support them in implementing workplace intervention programs for the workforce directly/indirectly engaged by them on the project. Another key responsibility will be to support the Package NGOs to assist in developing their implementation plan, strengthen program implementation, build their capacities, and monitor the interventions program.

6.4 Implementation of Road Safety Awareness Program

The Nodal NGO shall make an assessment (including the review of report already prepared by RDC) of the project area, focusing on the following:

(i) Whether NGOs, CBOs, lorry owners/operators association or other public service deliverers operating in the project area that have an interest in the implementation of the Plan under the Project;

(ii) Accident blackspots based on the secondary data on number of road deaths and serious injuries in the project area;

(iii) Places where road users gather including Schools, Panchayat junction, truck parking bays and other places;

(iv) Target stakeholders and key behaviours to be influenced under the project; and

(v) Availability of existing public awareness materials and media channels.

This assessment will help Nodal NGOs in providing proper guidance to Package NGOs in the implementation of road safety plan in the respective packages. The Nodal NGO shall train Package NGO about road safety program, techniques, and community involvement and will share findings of above assessment/information.

7. Documenting Best Practices

Scope of services of the Nodal NGO include identifying and documenting best practices as case studies and prepare steps for follow up and replication in other stretches. These good practices should be popularised and adequate steps should be taken for their application elsewhere in the project areas.

8. Monitoring and Evaluation

The Nodal NGO will develop Monitoring formats for both Package NGOs and Package Management Units and should work closely with the Package NGOs and facilitate in establishing their internal monitoring systems. The monthly progress reports to be prepared at the Package level will include achievement against the agreed SMP targets and indicators. In addition to reviewing the reports, the Nodal NGO would conduct formal monitoring visits to the Packages and cross check the reports on sample basis.

The monthly progress reports prepared by Package NGOs, quarterly progress reports prepared by Nodal NGO and feedback of the Nodal NGO on the monthly reports (submitted by Package NGO) will be inputs for external social auditor. However, these data are only indicative information for external monitor. The observation of external auditor on these reports will be one of the performance indicators of Nodal NGO.

The Nodal NGO will keep record and supporting documents of their work and the R&R process followed under the project for project level monitoring committee, and social audit under the provision of APRRP 2005. Further, the Nodal NGO will participate actively in social audit process along with the external auditor. The active participation connotes their involvement in consultation process and observing data collection process of Social Auditor. The observation made by Nodal NGO will be a performance indicator for the Social Auditor.
In addition to the compliance mentioned above, the Nodal NGO will assist in realizing recommendation of the external auditor for further additional studies to be undertaken by the project, in improving implementation process.

Nodal NGO would be responsible for sustainable management and implementation framework of SMPs and would make withdrawal plan for Package NGOs.

9. Assistance in Managing Corporate Social Responsibilities

The Nodal NGO will prepare operational manuals including list of regulations under different Acts as mentioned below towards fulfillment of social responsibilities by APRDC. The Nodal NGO will ensure that the Package NGO are providing information on the status of compliance in their monthly progress reports and ensure that the contractors are abiding by various provisions of the applicable laws, concerning the workers safety, health and hygiene and issues relating to women and child labour.

The stipulated regulations include (but not limited to) following:

(a) The Contract Labor (Regulation and Abolition) Act 1948
(b) The Minimum Wages Act, 1948
(c) The Equal Remuneration Act, 1979
(d) The Child Labour (Prohibition and Regulation) Act, 1986
(e) The Maternity Benefit Act, 1951
(f) The Building & Other Construction Workers (Regulation of Employment & Conditions of Service) Act 1996
(g) The industrial Employment (Standing Order) Act, 1946
(h) The Cess Act of 1996
(i) The Factories Act, 1948

As per these laws, there are specifications regarding the facilities/requirements at the construction camp/site, including basic health care facilities, Mother and Child Welfare units and facilities for vaccinations, day crèche facilities, etc. The NGO will work in co-ordination of the Female social Worker/resident engineers of the Contractor, or any other representative of the Contractors, to ensure these facilities are provided in a satisfactory manner, and all social responsibilities of the Contract is implemented satisfactorily (please refer contract clause).

The Nodal NGO will ensure, through Package NGOs, that relevant information is disseminated to Engineers (Supervision Consultant), contractor/concessionaire (as the case may be), Package NGOs, APRDC officials and other concern stakeholders and organize training sessions.

10. Reporting:

The Nodal NGO will be reporting to PMU and APRDC during the course of this assignment on this project. The NGO will submit the following reports:

(i) Inception Report: This will be submitted within a fortnight of the signing of contract with the Project. Besides giving a brief account of their approach to undertake the assignment, specifically the report should include the manpower deployment including the professionals agreed in the Contract. This should be agreed by APRDC/PMU. The report should also include schedule of proposed activities along with time line for its implementation.

(ii) Quarterly Reports: The NGO will prepare reports on quarterly basis based on the monthly progress reports submitted by Package NGO to APRDC and their own field visits, observations and discussions with relevant stakeholders on the implementation of SMP components. The report should specifically indicate the achievements in terms of program implementation during the period of reporting. All communication materials (prepared and distributed) and monitoring reports (and formats prepared) should form part of the report. The report should also include training modules prepared and training programs organized.
(iii) Annual report: This report to be prepared and submitted to APRDC should highlight the implementation progress; identify good practices, issues/problems faced, and suggestions for effective/improved implementation and time frame along with schedule of activities for the next year. This essentially means the report would include man power requirement and their placement. The report could also include case studies of good practices in the implementation of SMP and 'impact evaluation' of completed RAP.

(iv) Midterm Report: This will coincide with the Midterm review of the bank. The report which will provide input to this review will identify issues/problems face in SMP implementation.

(v) Final Report: This report will coincide with the Implementation Completion Review (ICR) by the Bank. Similar to Midterm Review, this report will provide input to the ICR and will identify issues/problems encountered in SMP implementation and suggestions how these could be addressed in future operations and measures required to improve implementation effectiveness.

(vi) Any other report: As and when required, the NGO would prepare report for APRDC on the planning and implementation of SMP under the project.

(vii) All reports should be submitted in 10 hard copies along with a soft copy. Reports will be finalized within a fortnight of receiving comments and suggestions from APRDC and the World Bank.

NOTE:

(i) All reports should be submitted in 10 hard copies along with a soft copy. Reports will be finalized with a fortnight of receiving comments and suggestions from APRDC and the World Bank.

(ii) All documents created, generated or collected during the period of contract, in carrying out the services under this assignment will be the property of the APRDC.

(iii) No information gathered or generated during and in carrying out this assignment will be disclosed by the NGO without the explicit permission of the APRDC/Package Manager.

(iv) All consultations should be properly documented in terms of photos, video graphs, audio recordings, proceedings of the meetings, etc. These should be submitted along with the reports.

11. Duration of the assignment: The present assignment for the entire project period which is 5 years. However, initially the contract will be for first two years which would be extended (on yearly basis) on the satisfactory progress and good working of the Nodal NGO.

12. Key Persons Required

The Nodal NGO will constitute a team of professionals with the following professional background, expertise and experience. The actual number of professionals working on this assignment will vary depending upon the project implementation progress and the number of Packages (on upgrading and PPP components) under implementation. The stipulated man months requirement of each professional in a year is also included in the following.

<table>

INDICATORS OF MONITORING

To evaluate performance of impact indicators, M&E agency must ensure that the input indicators and process indicators during the implementation process is in tune with the guidelines set by in the policy framework.

The monitoring indicators can be divided into three types of benchmarks viz., process, output and impact. These indicators would provide end-term result i.e. outcome indicator in other words project has been implemented successfully with a particular degree of confidence. These indicators are explained in the following table.

<table>
<thead>
<tr>
<th>Physical</th>
<th>Economic</th>
</tr>
</thead>
<tbody>
<tr>
<td>• extent of land acquired</td>
<td>• Entitlement of EPs-land/cash</td>
</tr>
<tr>
<td>• number of structures demolished</td>
<td>• number of business re-established</td>
</tr>
<tr>
<td>• number of land users and private structure owners paid compensation</td>
<td>• utilization of compensation</td>
</tr>
<tr>
<td>• number of families affected</td>
<td>• extent of agricultural land/house sites/business sites purchased</td>
</tr>
<tr>
<td>• number of government agricultural land identified for allotment</td>
<td>• successful implementation of Income Restoration Schemes</td>
</tr>
<tr>
<td>• number of EPs allotted agriculture land</td>
<td></td>
</tr>
<tr>
<td>• extent of agriculture land allotted</td>
<td></td>
</tr>
<tr>
<td>• number of families approaching Land Purchase Committee for purchase of agriculture land</td>
<td></td>
</tr>
<tr>
<td>• Number of families purchasing land and extent of land purchased.</td>
<td></td>
</tr>
<tr>
<td>• extent of government land identified for house sites</td>
<td></td>
</tr>
<tr>
<td>• number of EPs receiving assistance/compensation</td>
<td></td>
</tr>
<tr>
<td>• number of EPs provided transport facilities/shifting allowance</td>
<td></td>
</tr>
<tr>
<td>• number of EPs allotted house under EWS/LIG housing scheme</td>
<td></td>
</tr>
<tr>
<td>• number of EPs granted free plot/house construction allowance</td>
<td></td>
</tr>
</tbody>
</table>

Financial

• Amount of compensation paid for land/structure
• cash grant for shifting oustees
• amount paid to NGOs
• consultancy fee paid to M&E agency
• Establishment cost
• Staff salaries
• Vehicle maintenance
• Operational expense of office

Social

• Area and type of house and facility
• Morbidity and mortality rates
• Communal harmony
• Dates of consulting Project and District level committee
• number of time Project and District level committees met
• number of appeals placed before APWD/grievance redressal cell
• women time disposition

Following section outlines methodology of monitoring and evaluation. Methodology for M&E would be structured, stratified, systematic, multistage, random sampling survey of project affected persons, open ended interview with secondary stakeholders, verification of NGOs progress, controlled consultation, induction of innovative ideas to smoothen implementation. Table 8.3 explains standard practices of M&E.

Project monitoring will be the responsibility of the SMU. Social Management Specialist will prepare monthly progress reports. The reports will compare month wise progress of the project to targets set up at the commencement of the project in the planning document. The list of impact performance indicators will be used to monitor project objectives. The socio-economic survey conducted by the consultant and NGOs will provide the benchmarks for comparison.
The indicators and benchmarks for achievement of the objectives under the RAP implementation are of three kinds:

a. **Input indicators**—staffs, logistics and institutional requirement of PIU and contract packages.

b. **Process indicators**—indicating project inputs, expenditures, staff deployment, mechanism to implement R&R Programmes, Commitment of commitment with social development goals etc.

c. **Output indicators**—indicating results in terms of numbers of affected people compensated and resettled, number and types of training held, credit disbursed within the time frame mentioned in RAP and construction schedule etc.

d. **Outcome indicators**—related to the long-term effect of the project on people's life and living standards. Best practices so achieved may be replicated in other implementation project (Fig. 3)

The results of first two types of indicators related to process and immediate outputs would be monitored internally by the project. This information would serve to inform project management about progress and results so as to adjust the work program where necessary, if delays or problems arise.

### Table: Meaning and Scope of Indicators

<table>
<thead>
<tr>
<th><strong>Column - 1</strong></th>
<th><strong>Column - 2</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>The indicators and benchmarks for achievement of the objectives under the RAP implementation are of three kinds:</td>
<td>Indicators mentioned in Column 1 are also called Core indicators because they are cent percent applicable in ideal situations. Normally implementation is done in a particular social and cultural environment where deviations from the above mentioned indicators are expected. Role of Social Development Advisor would be to provide/develop adequate mechanism to minimize the deviations from the principles agreed upon at the preparatory stage of Resettlement Plan.</td>
</tr>
<tr>
<td>a. <strong>Input indicators</strong>—staffs, logistics and institutional requirement of PIU and contract packages.</td>
<td></td>
</tr>
<tr>

<td></td>
</tr>
</tbody>
</table>

### Goals of Indicators of Monitoring

- **Output Indicators**
  - Policy Guidelines
  - Disbursement of Compensation & Assistance
  - Redressal of Grievances
  - Develop model of implementation
  - Status of PAPs after implementation
  - Number of PAPs resettled

- **Process Indicator**
  - Effective Communication
  - Mechanism of verification
  - Preparation of micro plan
  - Functioning of GRC & RPDAC
  - Role of implementing agencies
  - Functioning of other project input

- **Input Indicator**
  - Institutional strengthening and capacity building of PIU
  - Allocation of budget for implementation
  - Formation of GRC / RPDAC / VLC
  - Hiring of NGOs establishing social cell at package offices

**Outcome Indicator Deviation of Implementation process from RAP & identification of best practices**

**Best practices ready for replication**
Checklist of M&E Agency

Following checklist would be part of evaluation matrix of implementation. The evaluation would be done based on quantitative as well as qualitative analysis of implementation.

C. Decision on Categorization

After reviewing the answer above, the consultant team concludes that the role of ESMU in implementation:

☐ Is pro-active and considered as ideal, SMU should coordinate the implementation in other projects also.

☐ Is submissive and interested in completing the implementation process.

☐ Apathetic and considers R&R activities as social obligation of the highways project.

---

### Role of Social Manager (AE) and Package Unit in Implementation

**FINAL COMMENTS OF M&E CONSULTING AGENCY:**

Score

Ranking
TOR FOR THE MONITORING AND EVALUATION AND SOCIAL AUDITOR

FOR THE SUPPORT IN IMPLEMENTATION OF SOCIAL MANAGEMENT PLAN UNDER ANDHRA PRADESH STATE ROAD PROJECT (APRDC)

The Government of Andhra Pradesh, through the Department of Economic Affairs, Govt of India has requested the assistance of the World Bank for the improvement and strengthening of State Highways and Major District Roads in the state of Andhra Pradesh. APRDC, GoAP, has identified about 900 km of State Roads (mainly State Highways) for improvement under APRSP phase-I. The present road improvement proposal includes widening, strengthening and maintenance of various State Highways as well as important District roads. Feasibility report has been prepared and detailed engineering designs are being prepared for the priority roads in phases.

The project design also includes a comprehensive environmental and social management plan. The following components are included in the Social Management Plan.

- Resettlement Action Plan (RAP)
- Indigenous People Development Plan (IPDP)
- HIV/AIDS Prevention and Control Plan
- Road Safety Awareness Program

The Social Management Plan has provisions for engaging a Nodal NGO at the project level and NGOs at the package level to facilitate implementation of SMP. In this context APRDC wishes to contract an NGO having strong management and human resource capabilities to support the implementation and management of all the four components of SMP, especially providing support to the Package level NGO's and provide technical support as and when required by APRDC. The Nodal NGO will be managing the overall SMP of the Project.

The proposed road improvement is largely confined to the public land, i.e., the existing right of way (RoW), which is controlled by the R&B Department. However, road improvement includes realignment of the road at some locations, which will involve expropriation of land from current users/owners. The project improvement will also necessitate the eviction of squatters and encroachers from existing RoW. The R&R benefit for the project affected persons on account of the road improvements are covered under the Resettlement and Rehabilitation Plan (RP) prepared for the project. An Executive Summary of the RP is attached as Annex 1.

All possible steps have been taken to minimize land acquisition and demolition of structures so as to reduce adverse affect on people. The consultants engaged for preparing the RP conducted baseline socio-economic surveys and a census of the project affected persons (PAPs). Among others, the RP stipulates involvement of a consulting agency for monitoring and evaluation (M&E) of implementation of the RP, and compliance with the targets given in the RP.

The project will be implemented by the project implementation units (PIU), with headquarters at Hyderabad. The APRDC has a R&R Cell in the PIU consisting of the Project Director and a Resettlement and Rehabilitation Officer (RRO) to implement the RP, with support of non-governmental organizations (NGOs). In order to ensure effective implementation of the RP and achievement of the set targets, monitoring and evaluation of the R&R component of the project will be carried out to provide an assessment of the achievements of targets and the system and processes followed. It will also enable timely adjustment of implementation set-up and procedures.

It is in this background that the APRDC intends to hire the services of an independent consultant to monitor and evaluate implementation of the RP which is being implemented by the APRDC with the support of the NGOs deployed in the different packages.
Objectives of the Assignment

The objectives of the consultancy services are:

a. To assess whether the implementation of the RAP is as per the R&R framework agreed between the World Bank and APRDC.
b. To evaluate the different processes of RAP implementation with respect to the agreed R&R principle
c. To evaluate whether the outcomes of social development objectives of the project are being achieved, and,

Scope of Services

Technical Assistance to APRDC: The consultant will impart training/workshop for SMU and APSHP engineers, nodal NGOs and facilitating NGOs about the process of implementation of the RAP, the process of consultation, transparency, the process for delivery of the R&R services within the timeframe, the grievance redress process, the process related to the R&R committee, the process of disbursement of compensation and assistance, the process of relocation, the process of rehabilitation, which includes restoration of livelihood,

Six monthly Audit of the R&R component: The consultant will evaluate R&R process six monthly basis including the process of implementation of the RAP, the process of consultation, transparency, the process for delivery of the R&R services within the timeframe, the grievance redress process, the process related to the district level committees (DLCs), the process of disbursement of compensation and assistance, the process of relocation, the process of rehabilitation, which includes restoration of livelihood, training of staff of the APRDC and the Project affected Persons (PAPs), the institutional arrangement and capacity to implement the RAP and monitor the impact of the project specific measures to address the issues of (a) the quality of life of the PAPs; (b) health and hygiene; (c) gender sensitivity and empowerment; (d) sexually transmitted diseases (STDs) including HIV/AIDS, and (e) trafficking of women and children.

The Midterm & Final Evaluation of R&R component including assessment of whether goals of the RAP to improve/restore the livelihood of the PAPs has been achieved, assessment of the changes in the living standard and occupational pattern of the PAPs due to acquisition of land, assessment of whether the consultations and participation of the people enabled better implementation of the RAP, assessment of whether the vulnerable groups benefited form the project and to what extent, assessment of the effectiveness of the provisions of the RAP in the context of the diverse social and cultural groups, assessment of the impact of the project specific measures to address the issues of (a) the quality of life of the PAPs; (b) health and hygiene; (c) gender sensitivity and empowerment; (d) sexually transmitted diseases (STDs) including HIV/AIDS, and (e) trafficking of women and children, assessment of the people's perception about the processes adopted for implementation of the RAP including (a) compensation/assistance received, new relocation sites, relation with the host communities, grievance redress committee, district level committees, services of NGOs.

Specific Task of CA will be

The consulting agency (CA) shall conduct monthly monitoring of the implementation of the RAP for the first year of services, and quarterly monitoring for the second year. If required the service period may be extended to further duration as decided by the APRDC. The CA shall also undertake mid-term and end-term evaluation of the R&R components of the project.

The CA will vet the micro-plans, as submitted by the NGO and submit the same to the SMU after verification. In order to validate the data given in the micro-plans, the CA will carry out 15% verification of the households including the structural valuation.

The CA shall computerise the available R&R database to monitor the progress of the R&R activities - against the targeted performance indicators.

The CA shall collect data from secondary and primary sources, which shall include field visits and interviews with a section of the PAPs.

The CA will prepare Income Restoration Plan for the PAPs, in association with the NGO
The monthly and quarterly monitoring of the implementation of the RP for the project shall include but not limited to monitoring the following:

- Appointment of the required staff;
- Training;
- Land acquisition and payment of compensation;
- Consultation and participation of the people;
- Inclusion of the vulnerable groups in the decision-making process;
- Inclusion of women in the decision-making process;
- Verification of the PAPs and distribution of identity cards;
- Relocation and development of resettlement sites;
- Distribution of assistance;
- Rehabilitation;
- Progress of Social Awareness program, especially on HIV/AIDS and trafficking;
- Financial and physical progress;
- Any deviation from the RAP.

The CA shall undertake mid-term evaluation of the R&R components of the project, which shall include but not limited to the following aspects:

- The process of implementation of the RP;
- The process of consultation;
- Transparency;
- The processes for delivery of the R&R services within the timeframe;
- The grievance redressal processes;
- The processes related to the district level committees (DLCs); The processes of disbursement of compensation and assistance. The processes of relocation;
- The processes of rehabilitation, which includes restoration of livelihood;
- Training of staff of the APRDC and the PAPs;
- The institutional arrangement and capacity to implement the RP.

Evaluate the impact of the project specific measures to address the issues of (a) the quality of life of the PAPs; (b) health and hygiene; (c) gender sensitivity and empowerment; (d) sexually transmitted diseases (STDs) including HIV/AIDS; and (e) trafficking of women and children.

The CA shall undertake an end-term evaluation of the R&R components of the project, which includes but is not limited to the following:

- Evaluate whether the goal of the APRDC R&R Policy to improve or restore the livelihood of the PAPs has been achieved;
- Evaluate consultation and participation of the people enabled the implementation of the RP;
- Evaluate how the vulnerable groups benefited from the project;
- Evaluate the provisions of the RP in the context of the diverse social and cultural groups;
• Evaluate the impact of the project specific measures to address the issues of (a) the quality of life of the PAPs; (b) health and hygiene; (c) gender sensitivity and empowerment; (d) sexually transmitted diseases (STDs) including HIV/AIDS; and (e) trafficking of women and children

• People's perception about the processes adopted for implementation of the RP including about the (a) compensation and/or assistance received; (b) new Re-location sites; (c) relation with the host communities; (d) grievance redressal committees; (e) the district level committees; (f) the services of the NGOs; and (g) the APRDC.

**Reporting:**

The CA shall submit the following reports:

- Monthly Reports (12 reports in first year of service);
- Draft Quarterly Monitoring Reports & Final Quarterly Monitoring Reports (total 4 reports in the second year of service);
